

Number of comparative genes/transcripts present

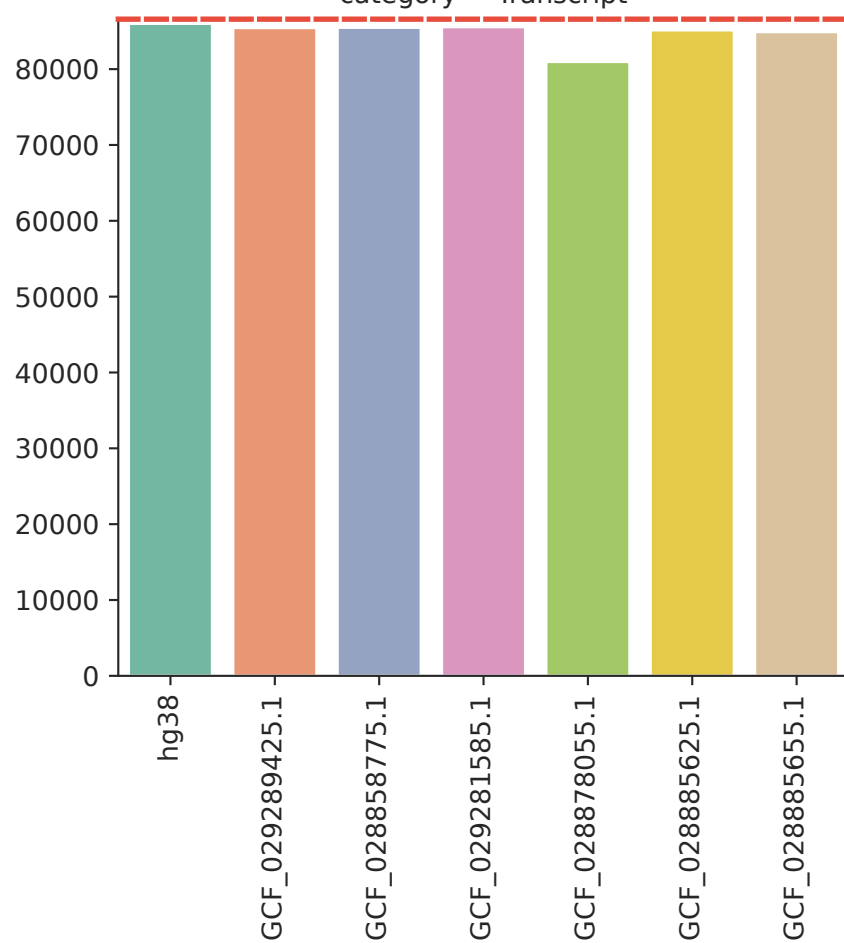

Number of comparative genes/transcripts present for biotype protein_coding

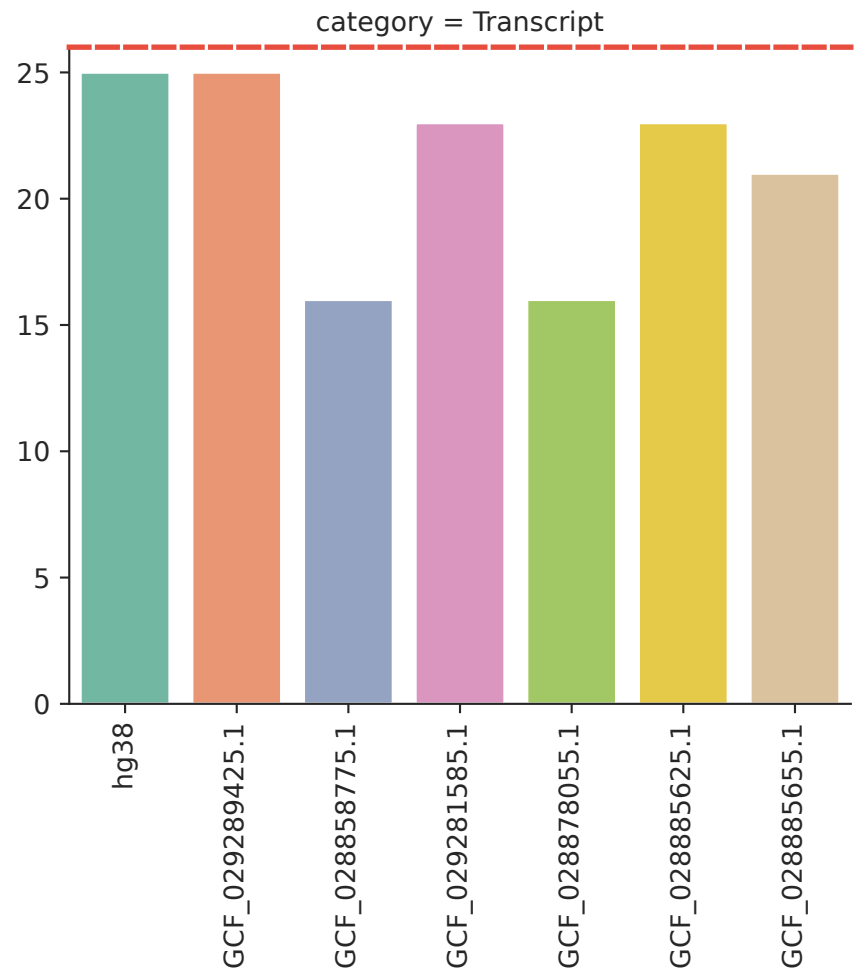

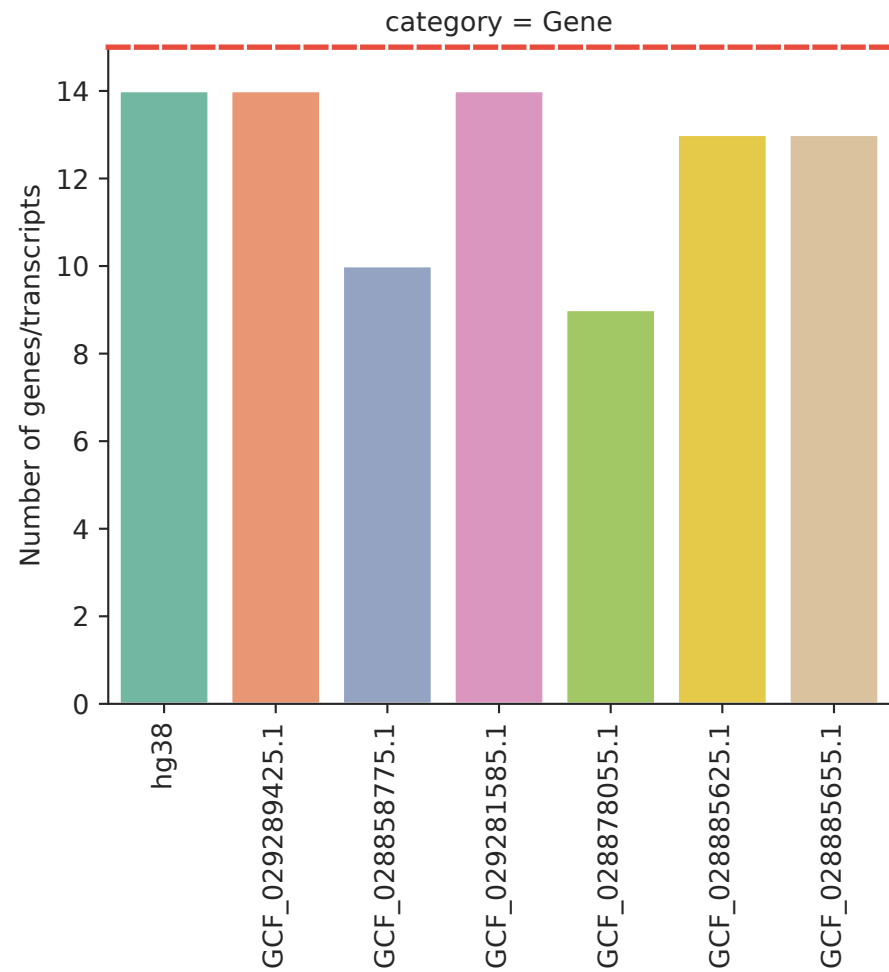

category = Gene

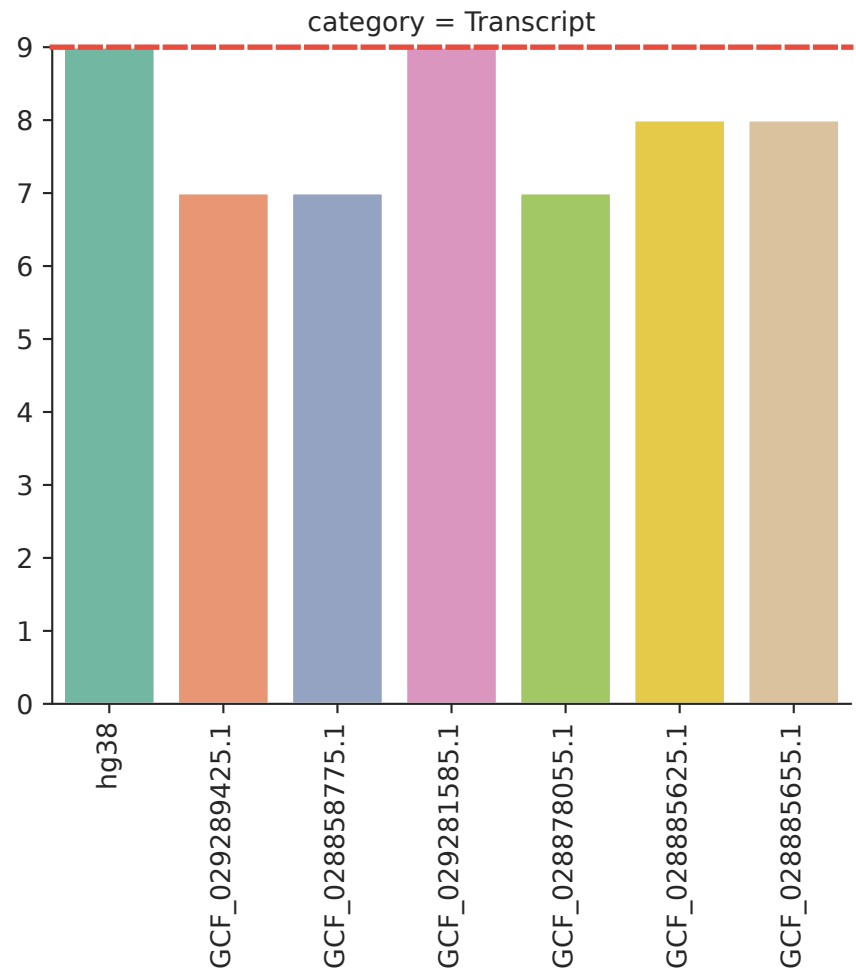

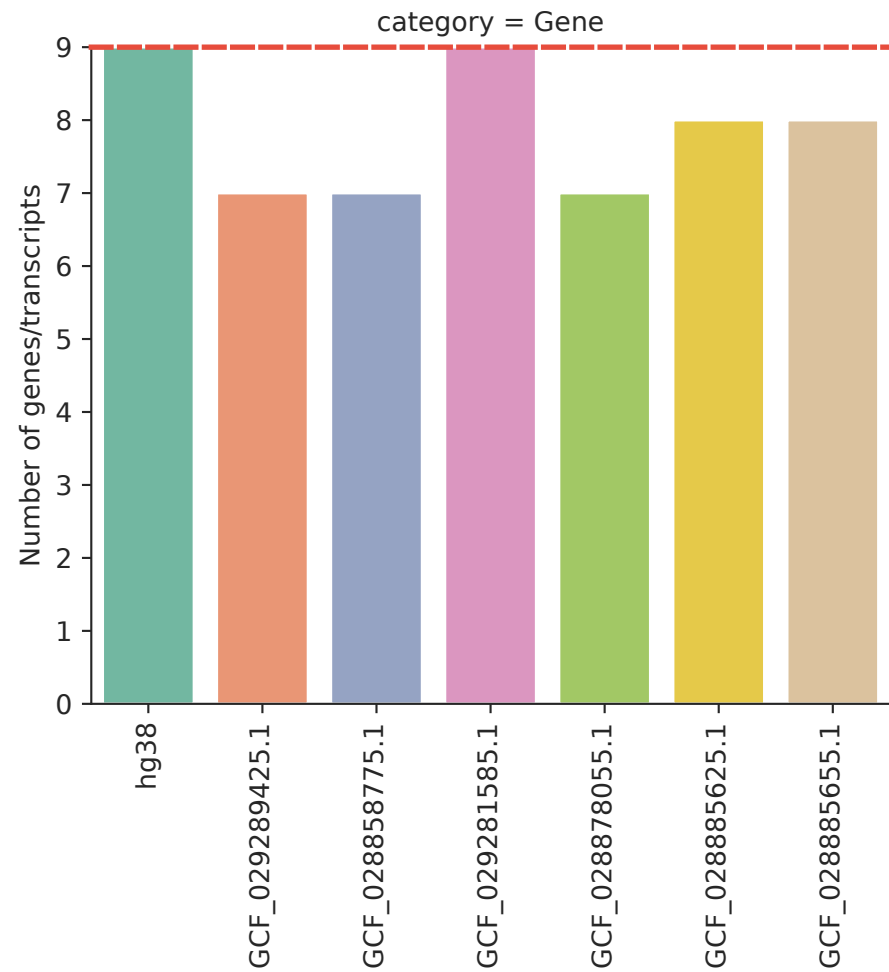

category = Transcript

Number of comparative genes/transcripts present for biotype IG_C_gene

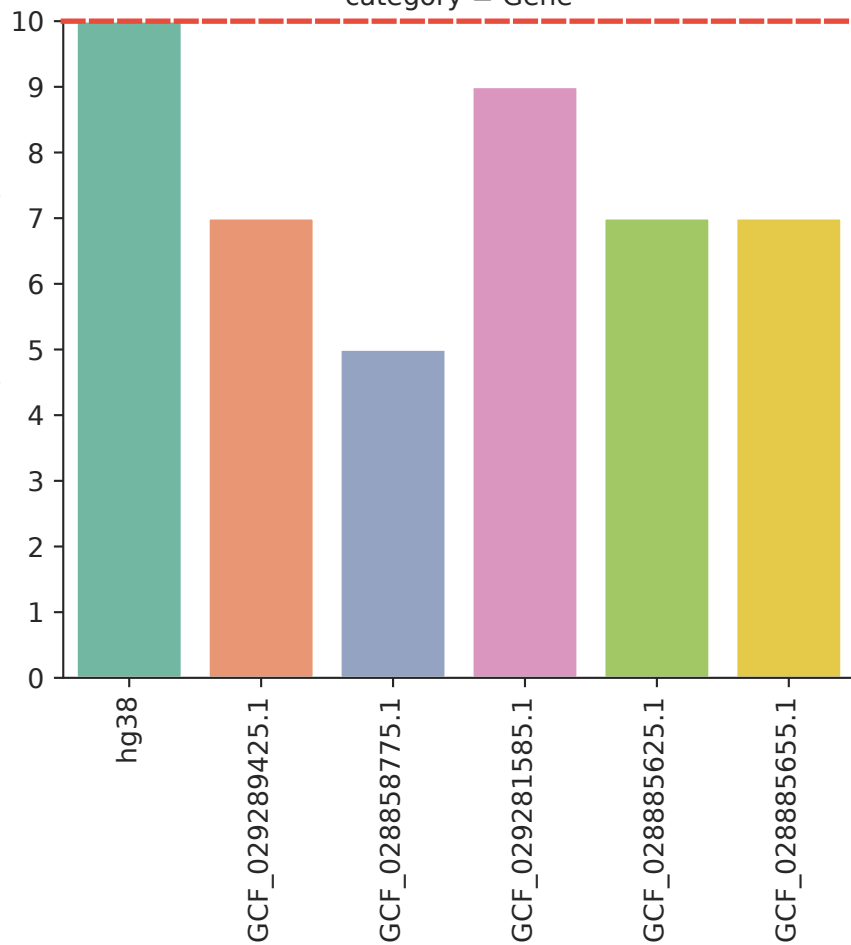

Number of comparative genes/transcripts present for biotype IG_C_pseudogene

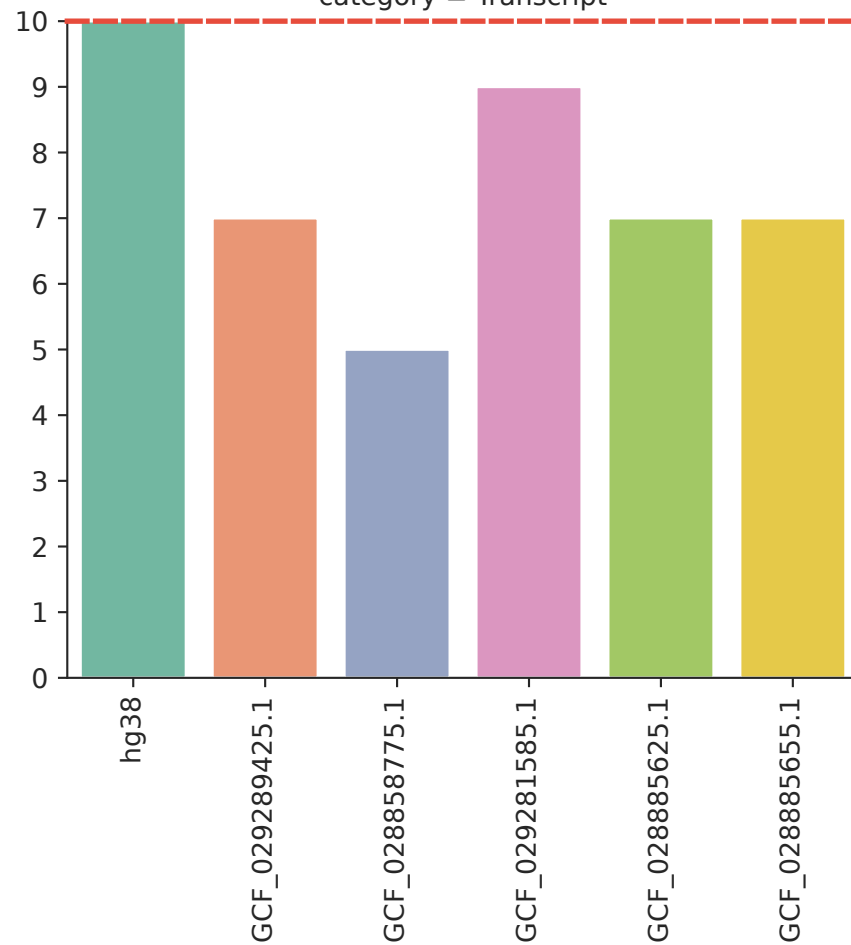

Number of comparative genes/transcripts present for biotype IG_D_gene

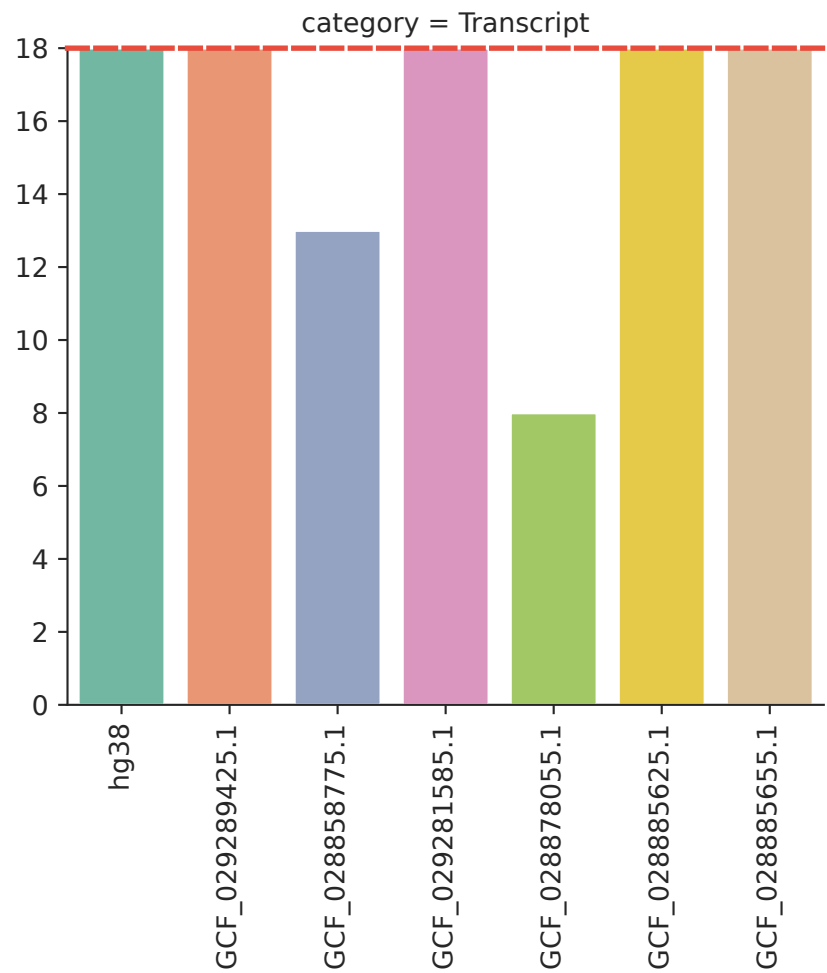

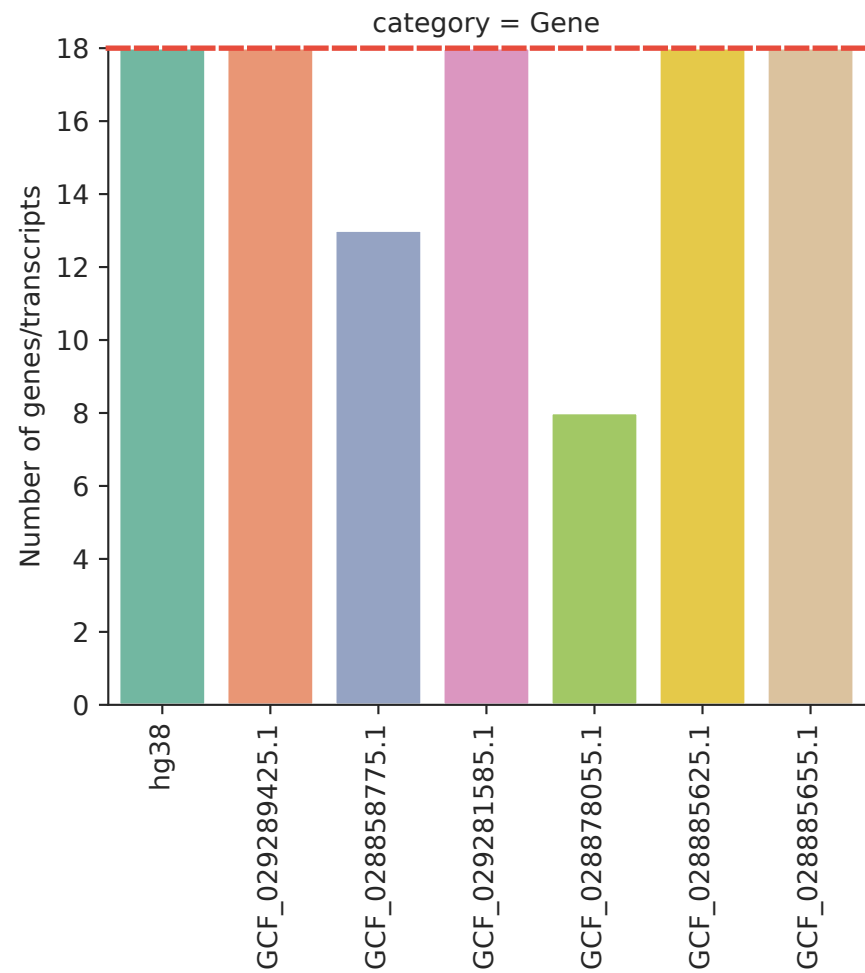

category = Gene

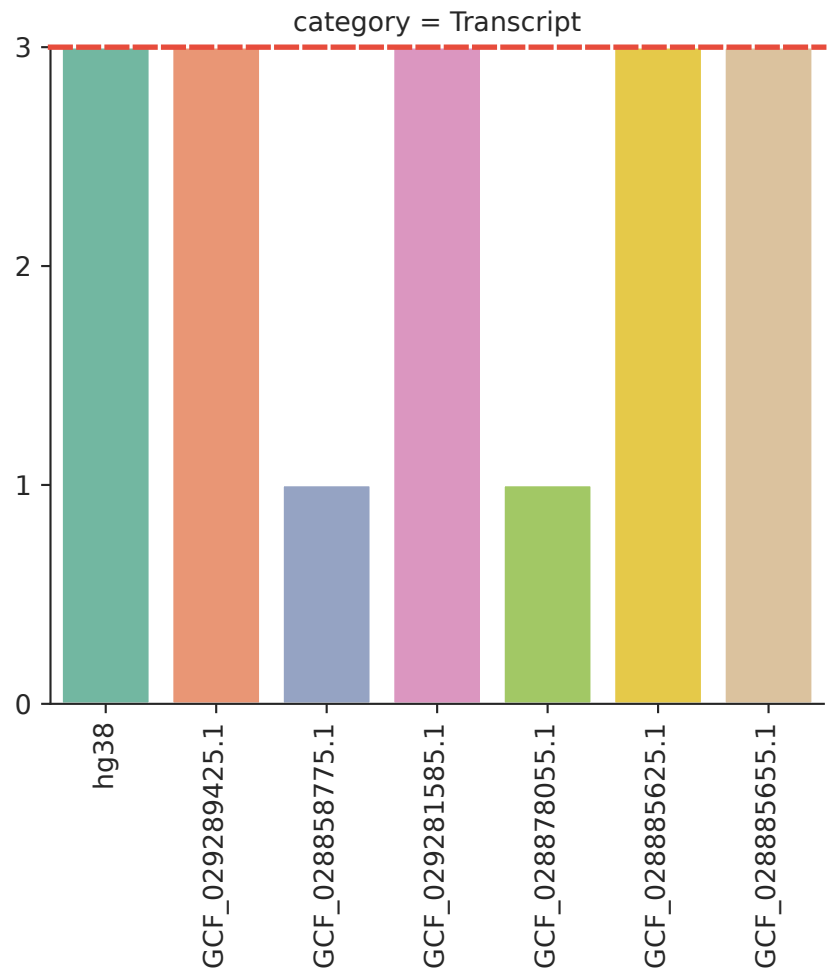

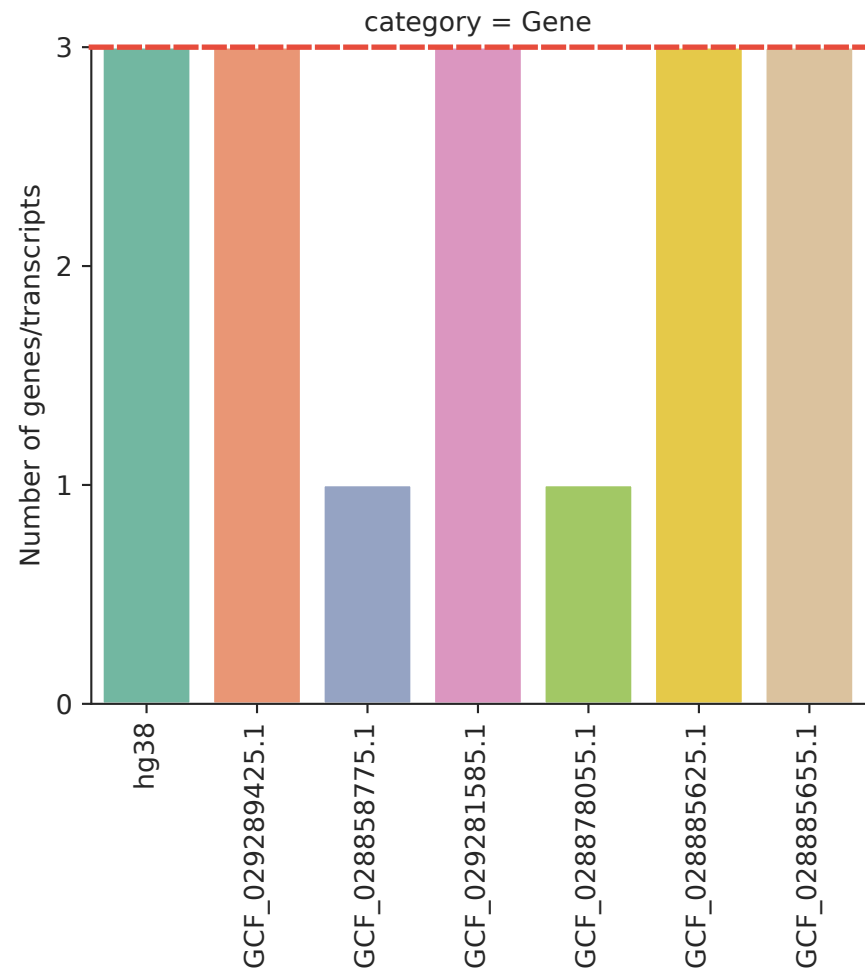

category = Transcript

Number of comparative genes/transcripts present for biotype IG_J_gene

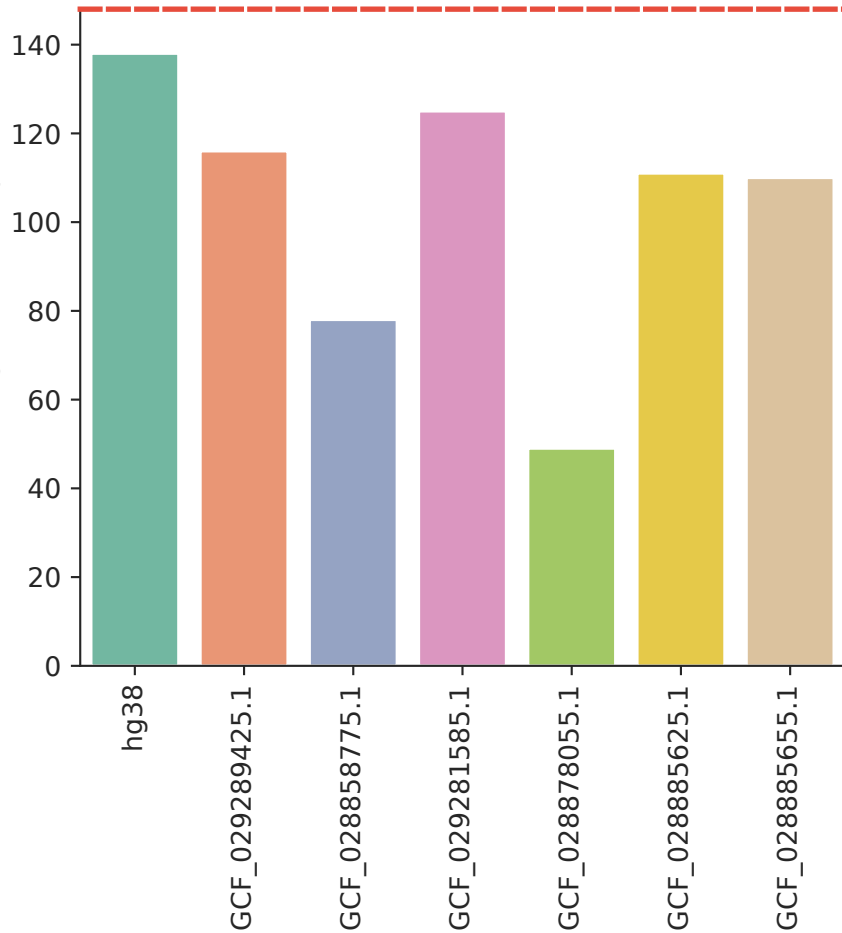

Number of comparative genes/transcripts present for biotype IG_J_pseudogene

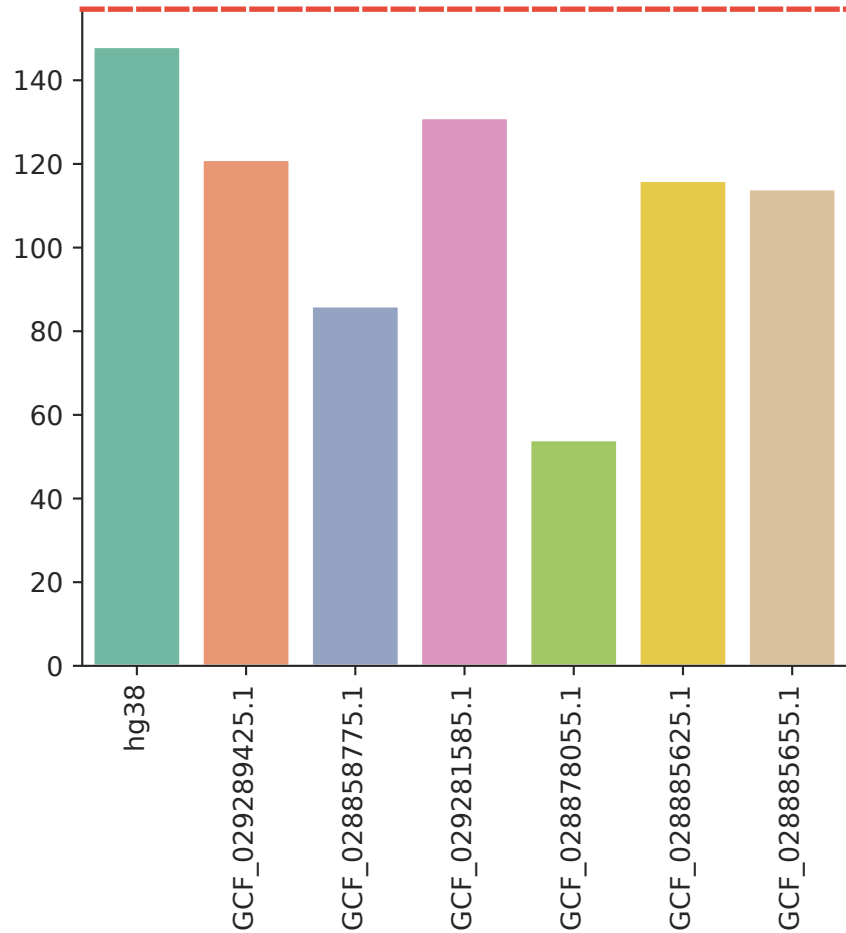

Number of comparative genes/transcripts present for biotype IG_V_gene

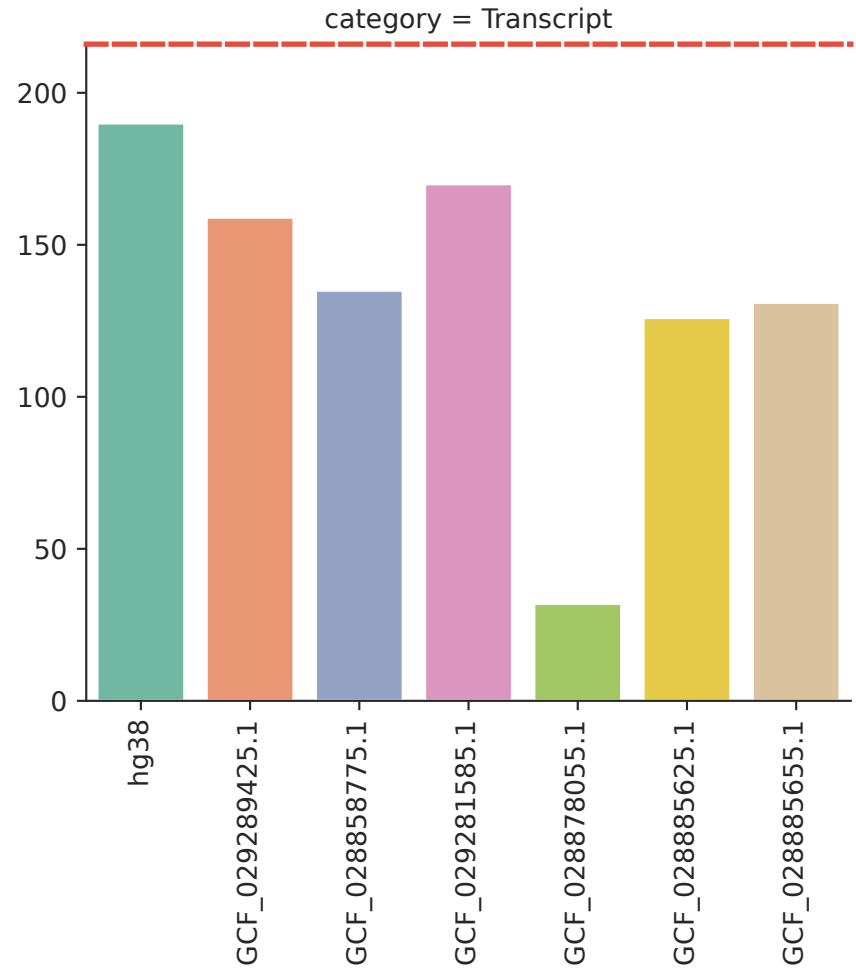

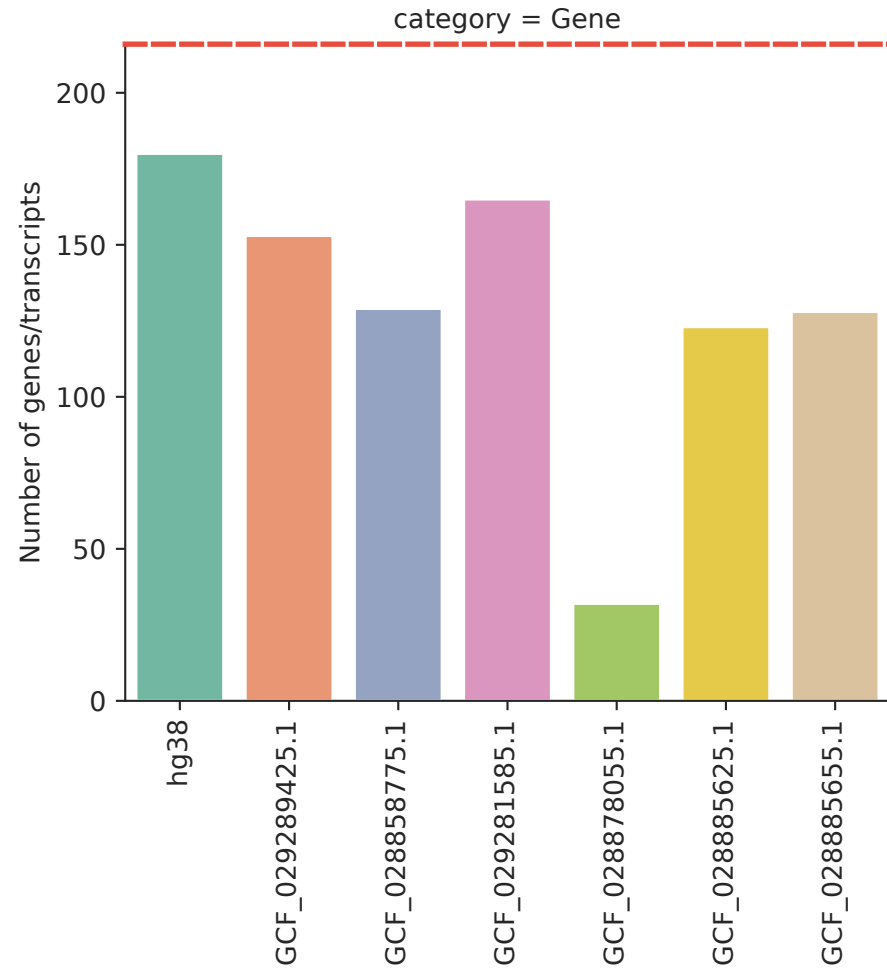

category = Gene

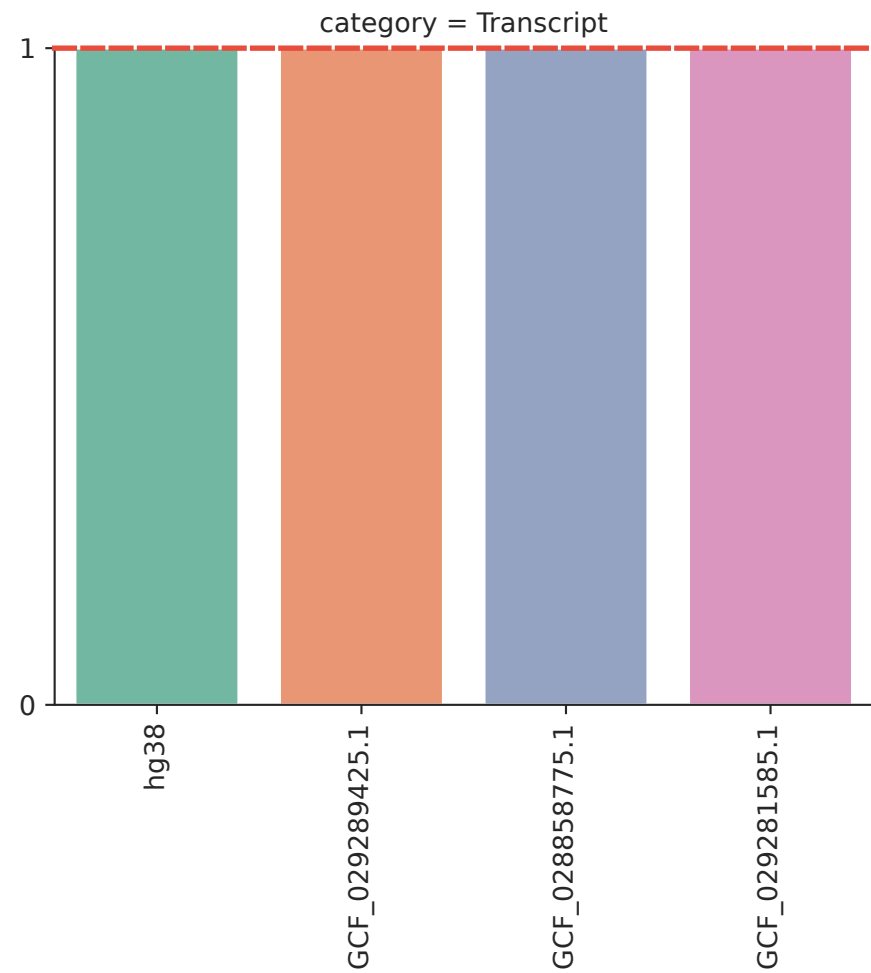

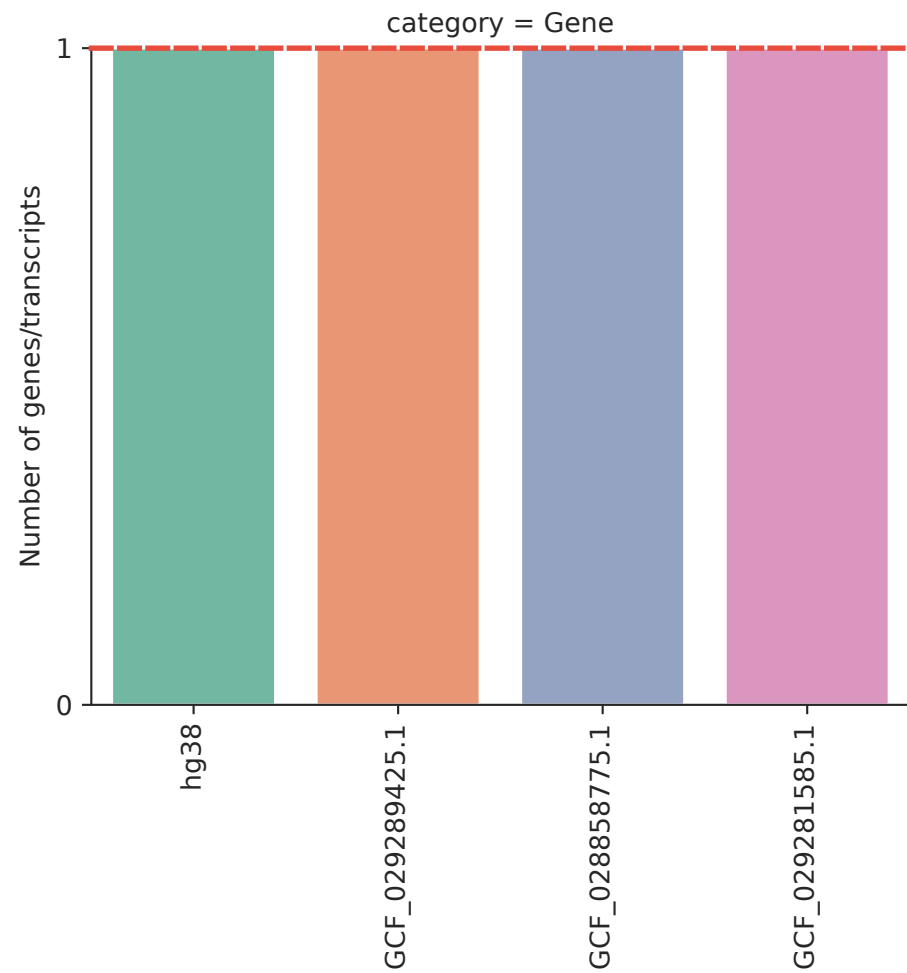

category = Transcript

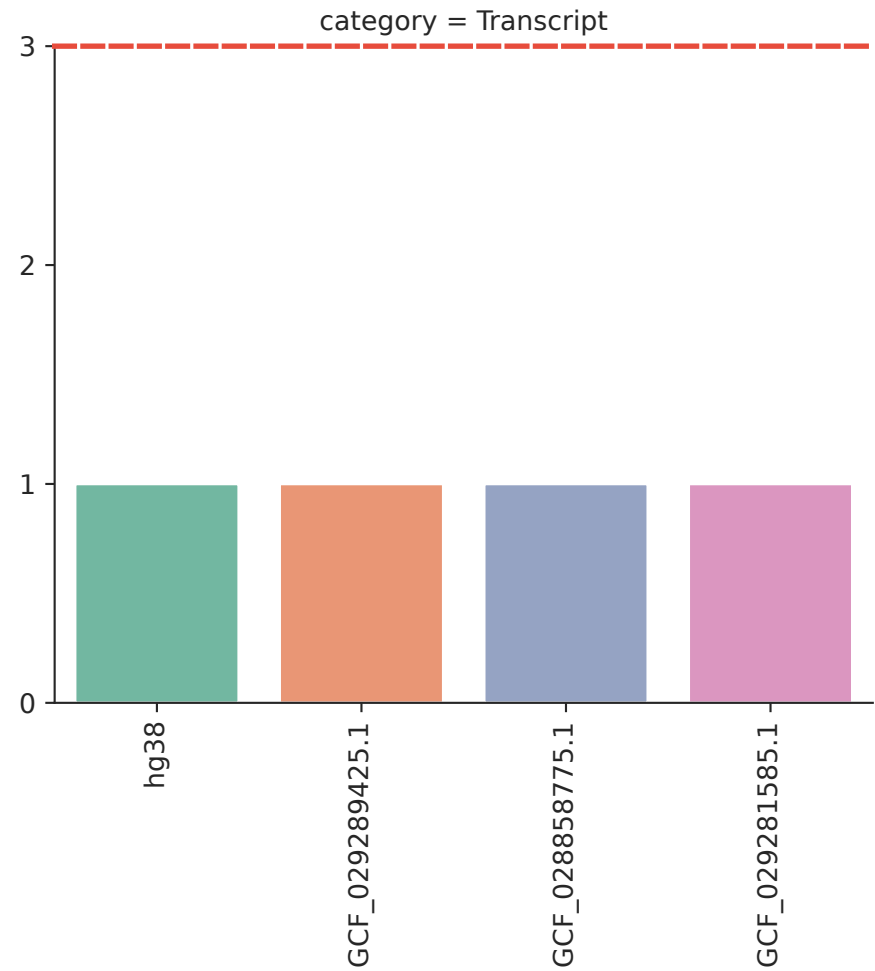

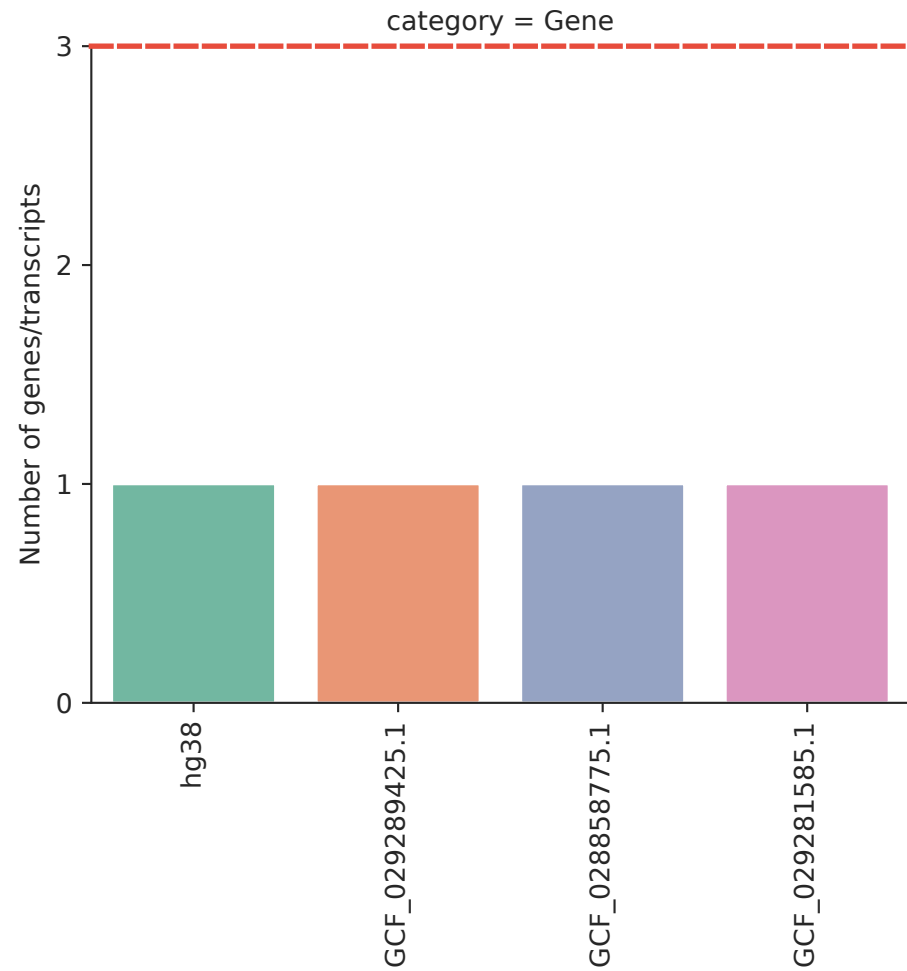

Number of comparative genes/transcripts present for biotype IG_V_pseudogene

Number of comparative genes/transcripts present for biotype IG_pseudogene

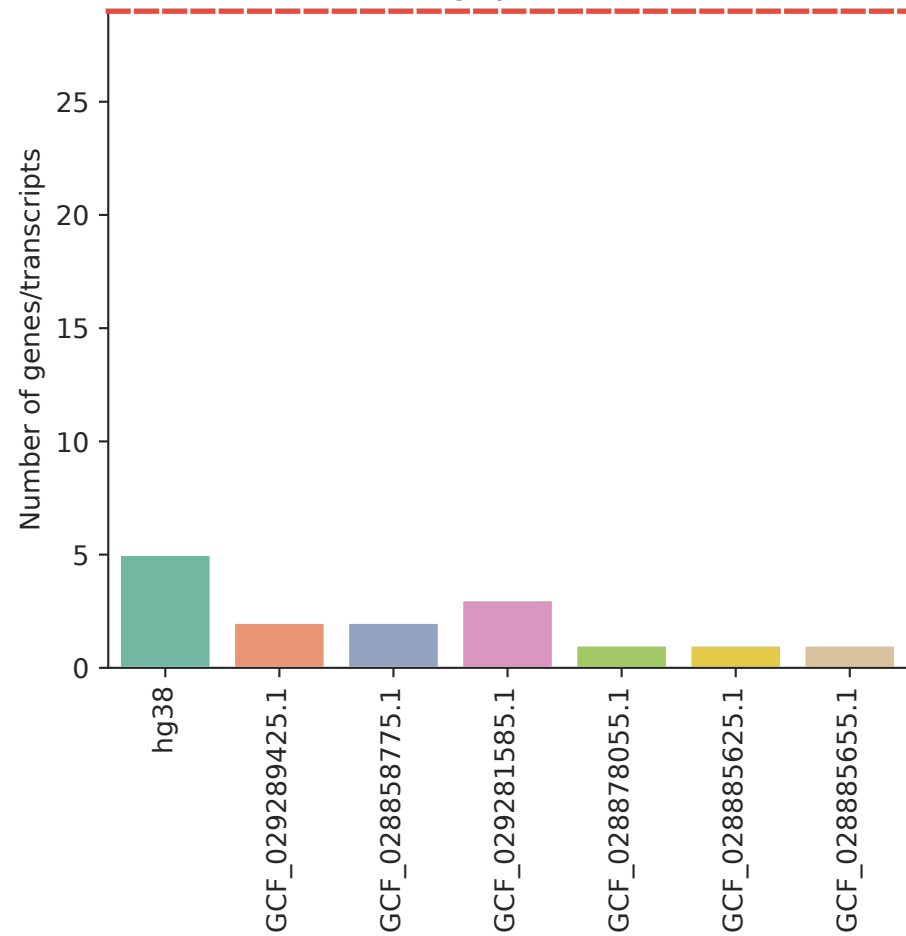

Number of comparative genes/transcripts present for biotype Mt_rRNA

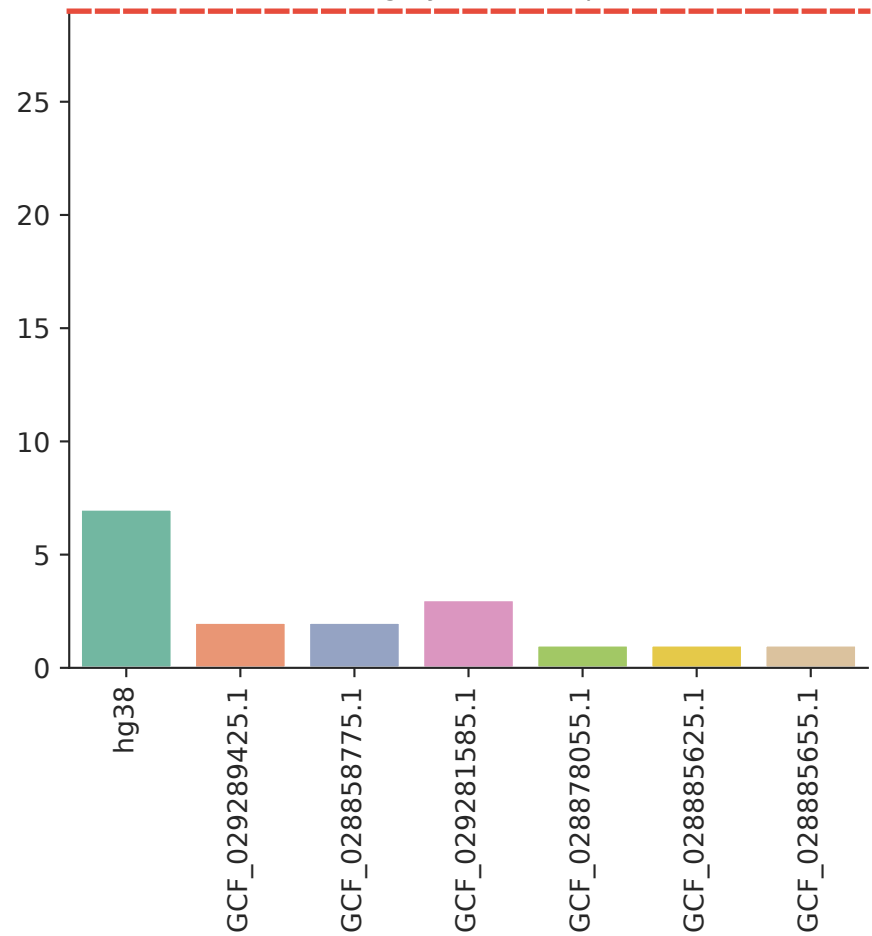

Number of comparative genes/transcripts present for biotype Mt_tRNA

category = Gene

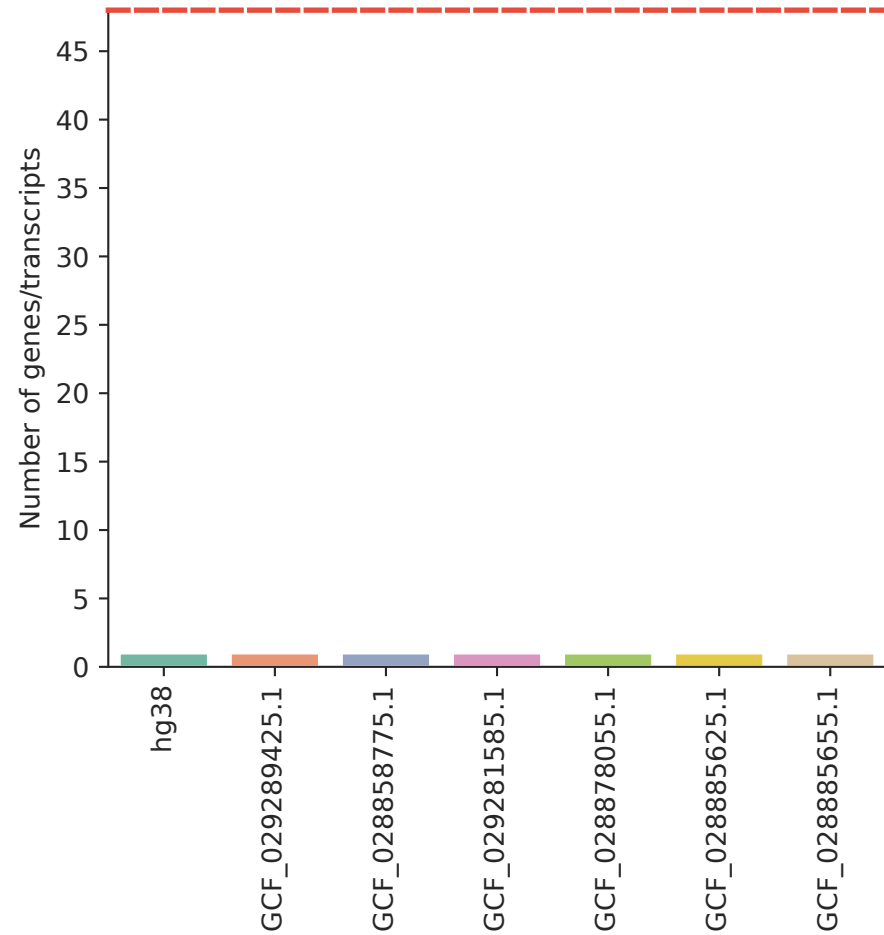

category = Transcript

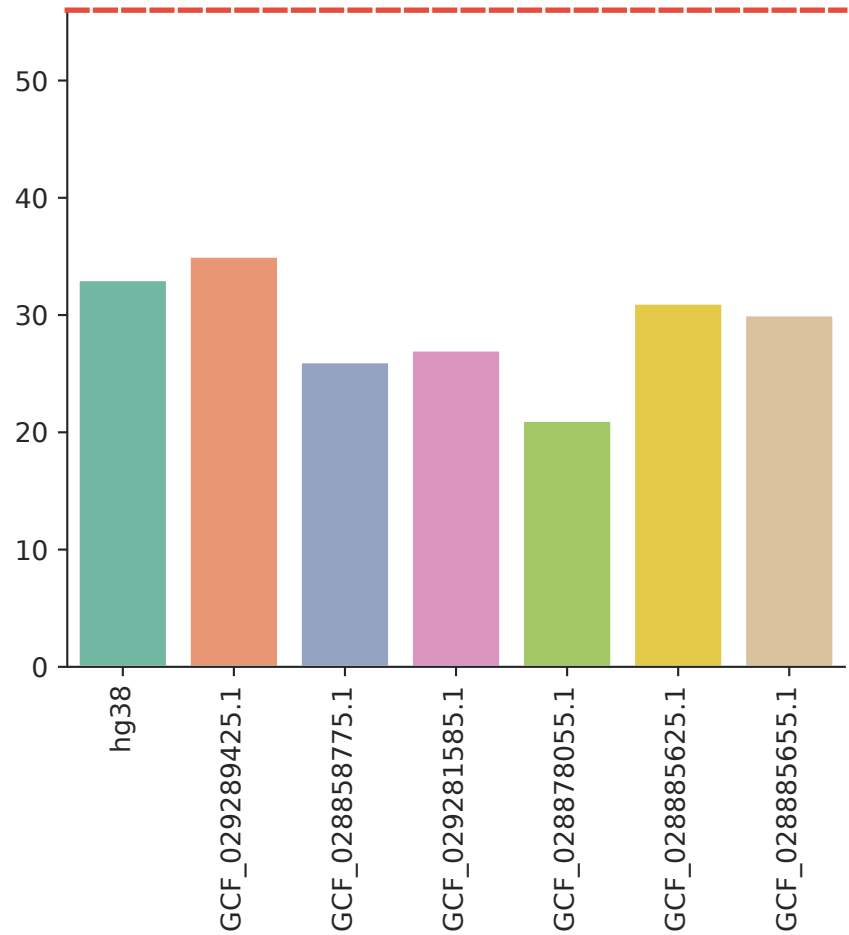

Number of comparative genes/transcripts present for biotype StringTie

category = Gene

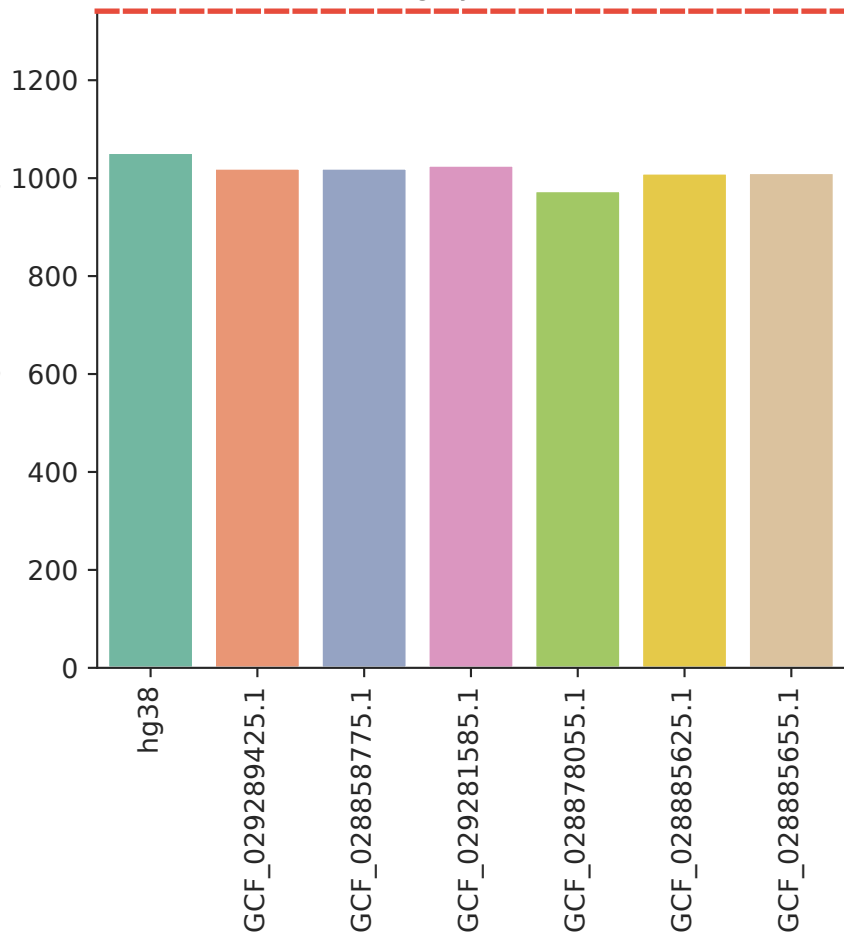

category = Transcript

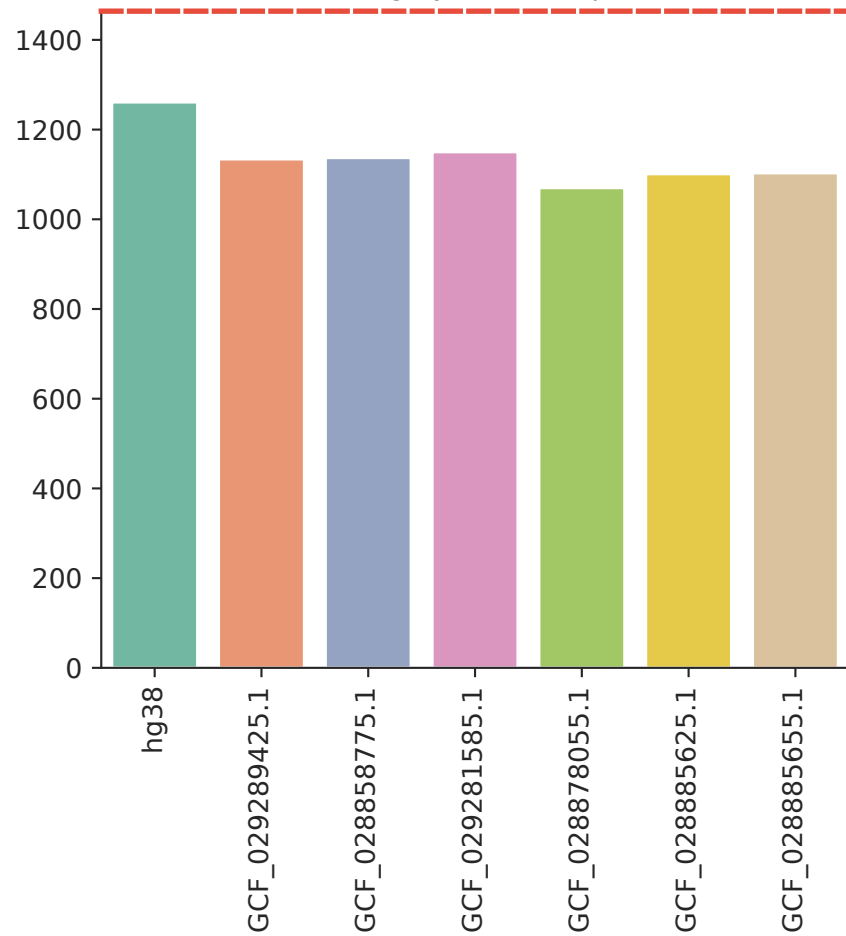

Number of comparative genes/transcripts present for biotype TEC

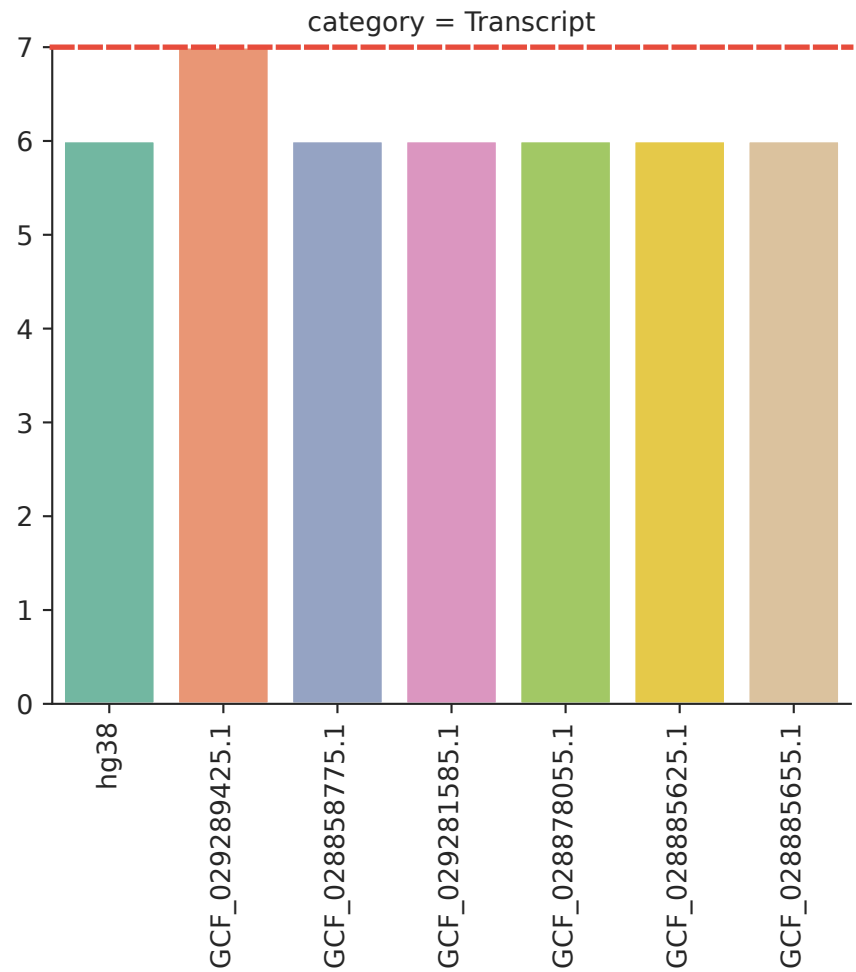

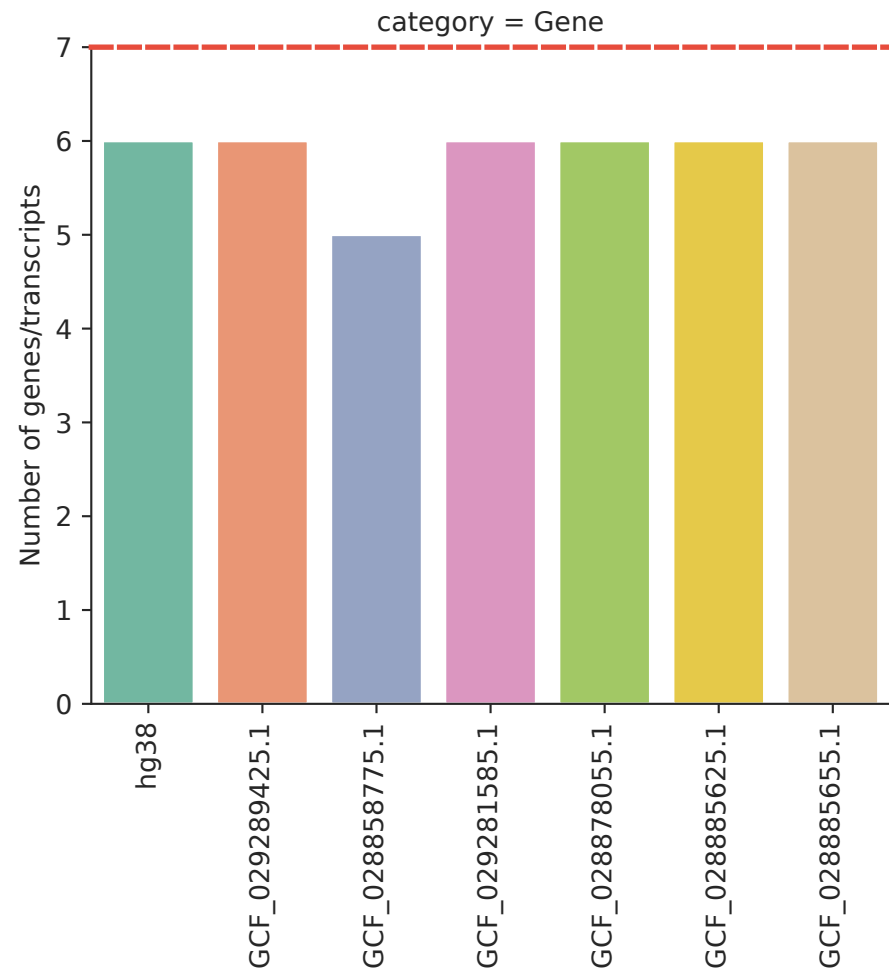

category = Gene

category = Transcript

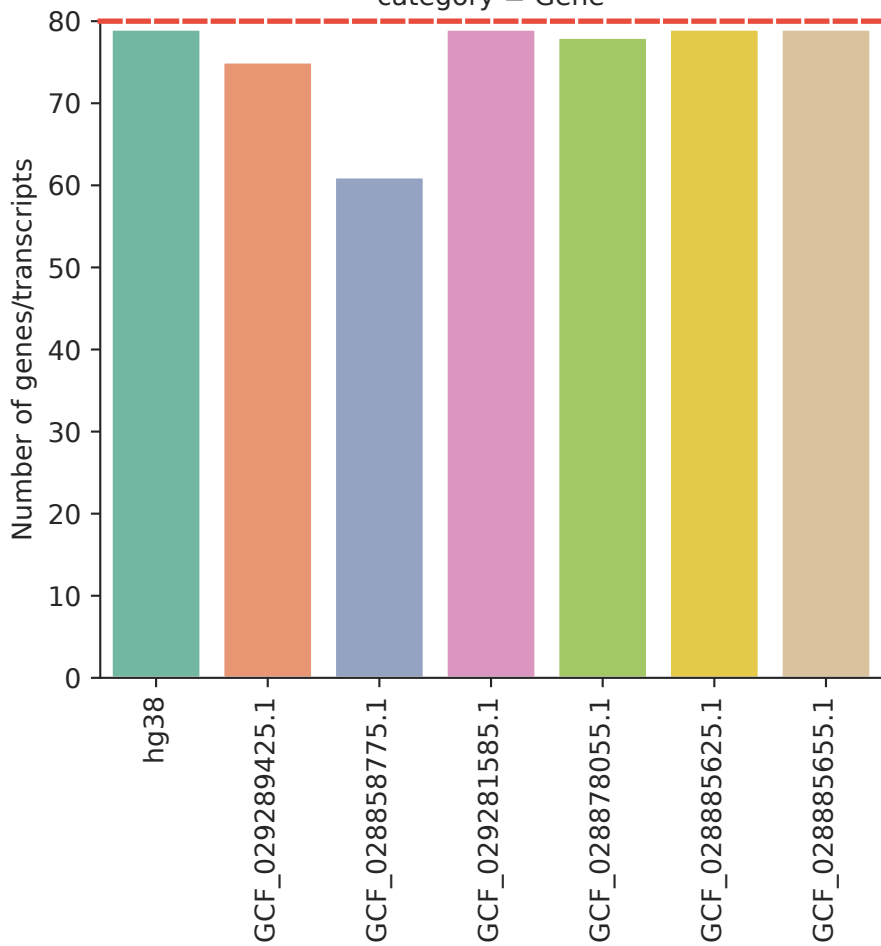

Number of comparative genes/transcripts present for biotype TR_C_gene

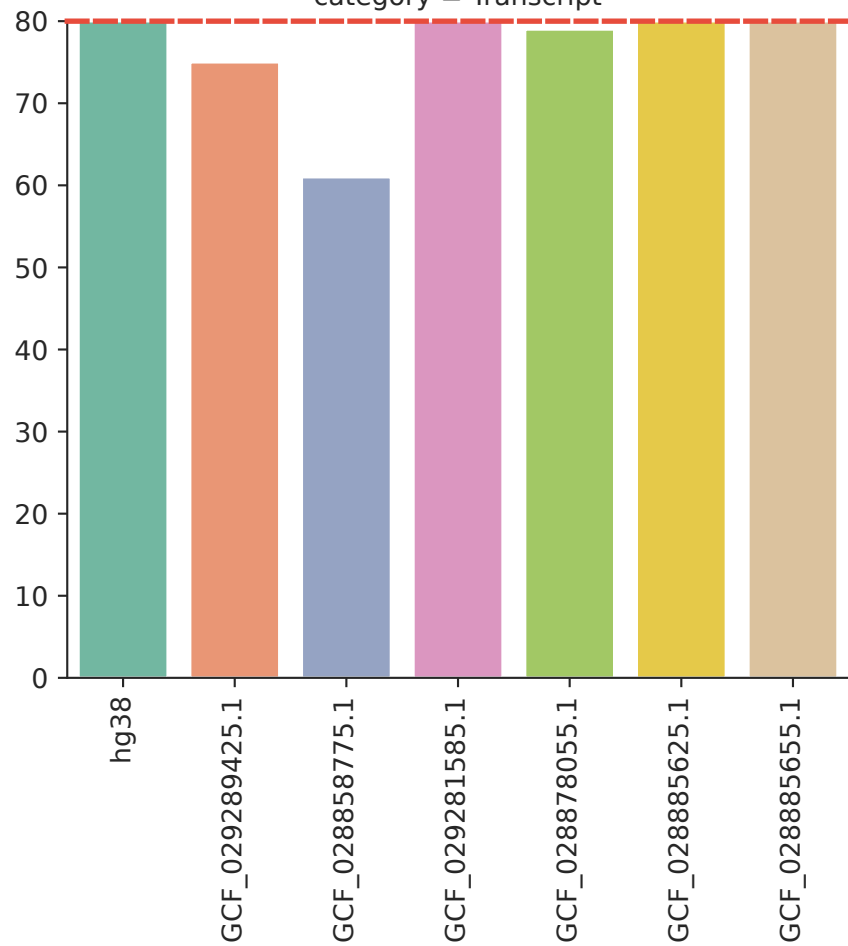

Number of comparative genes/transcripts present for biotype TR_J_gene

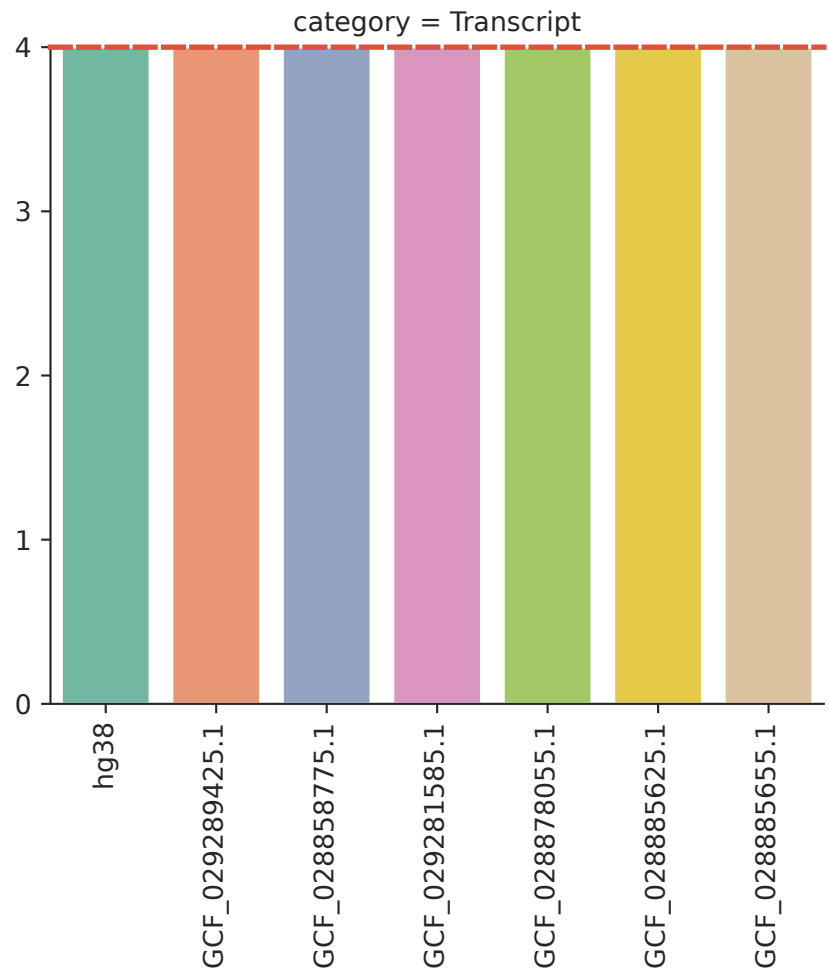

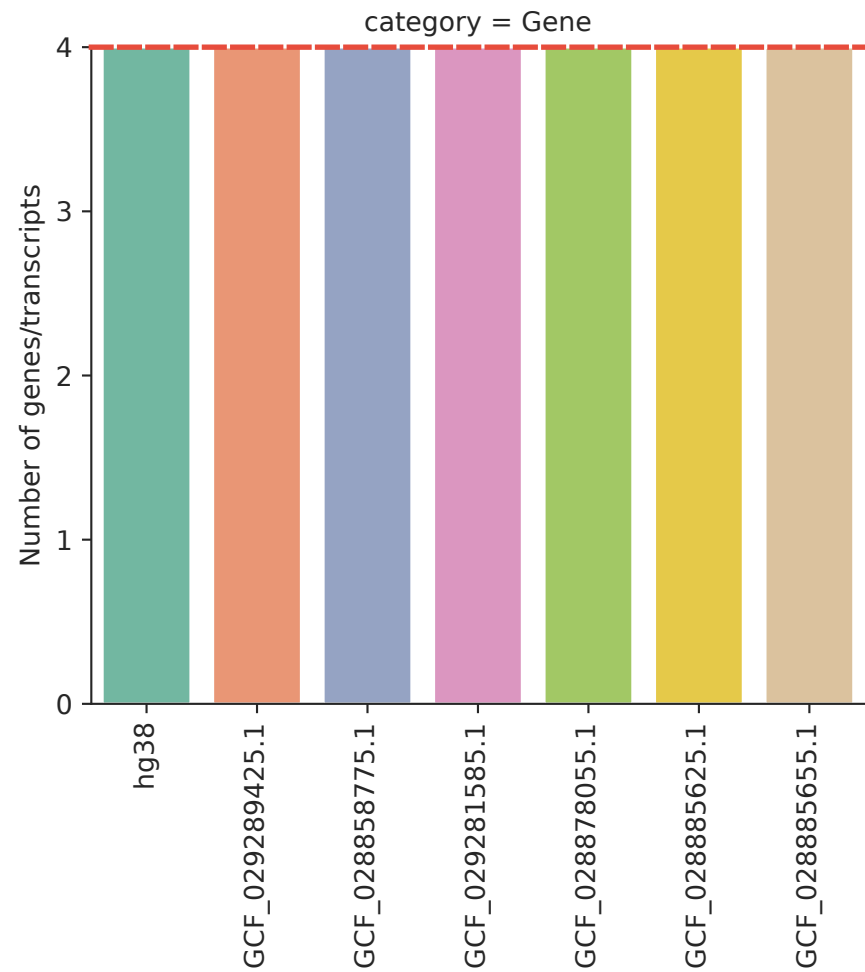

category = Gene

category = Transcript

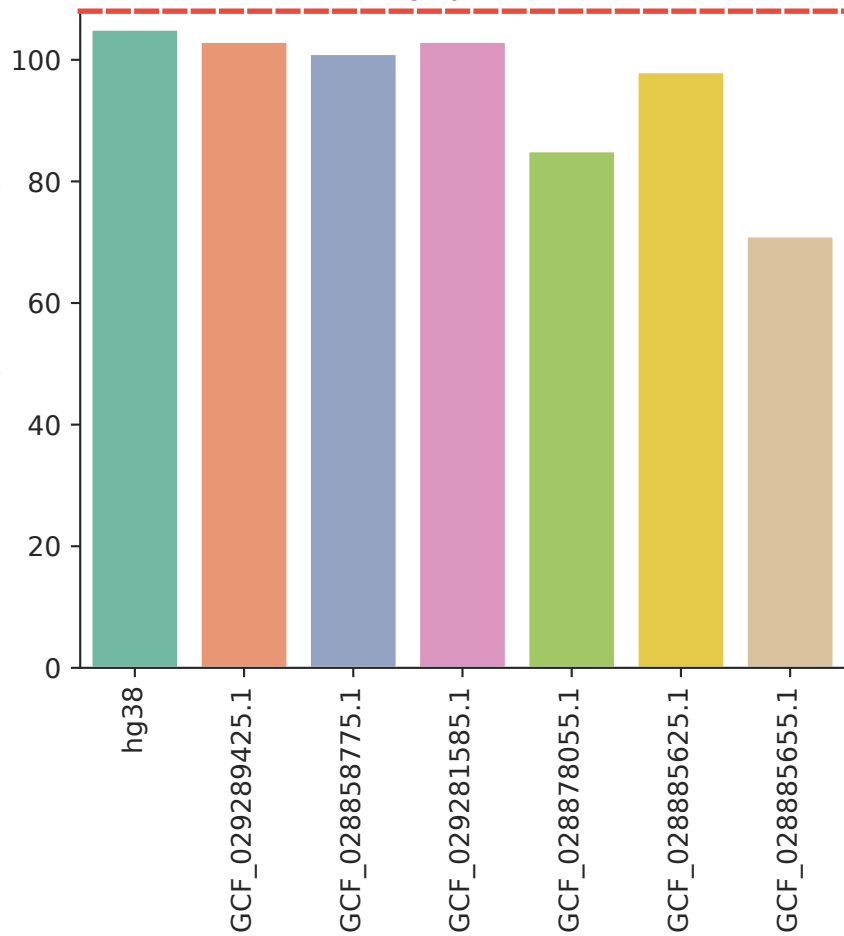

Number of comparative genes/transcripts present for biotype TR_J_pseudogene

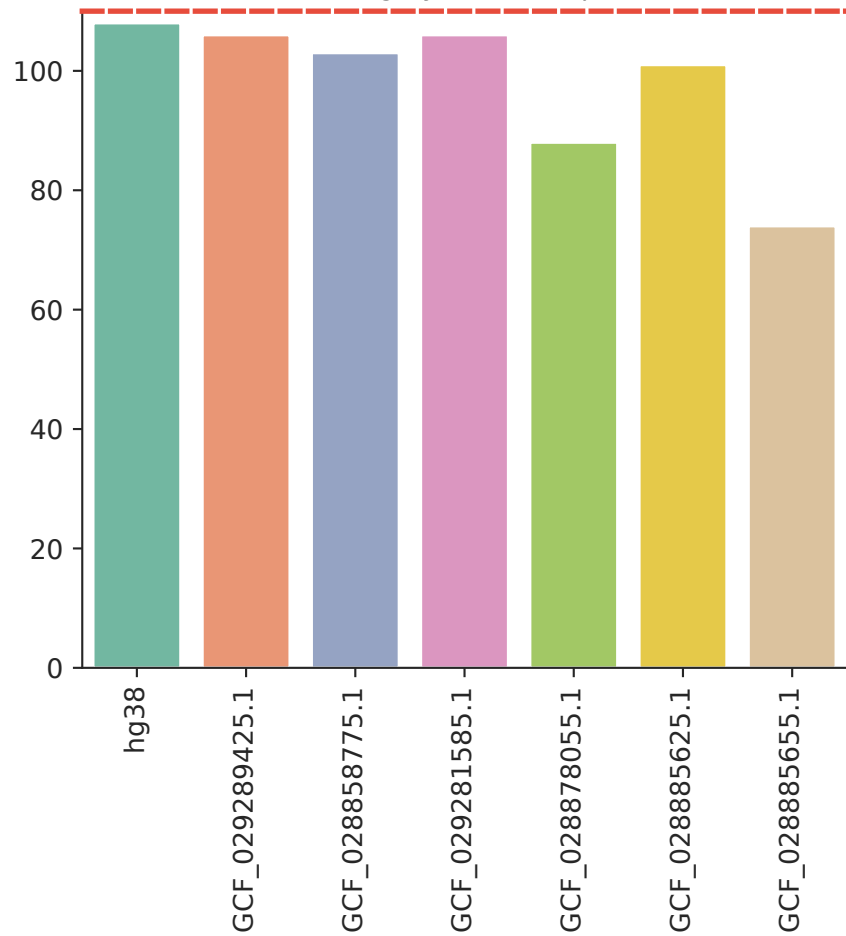

Number of comparative genes/transcripts present for biotype TR_V_gene

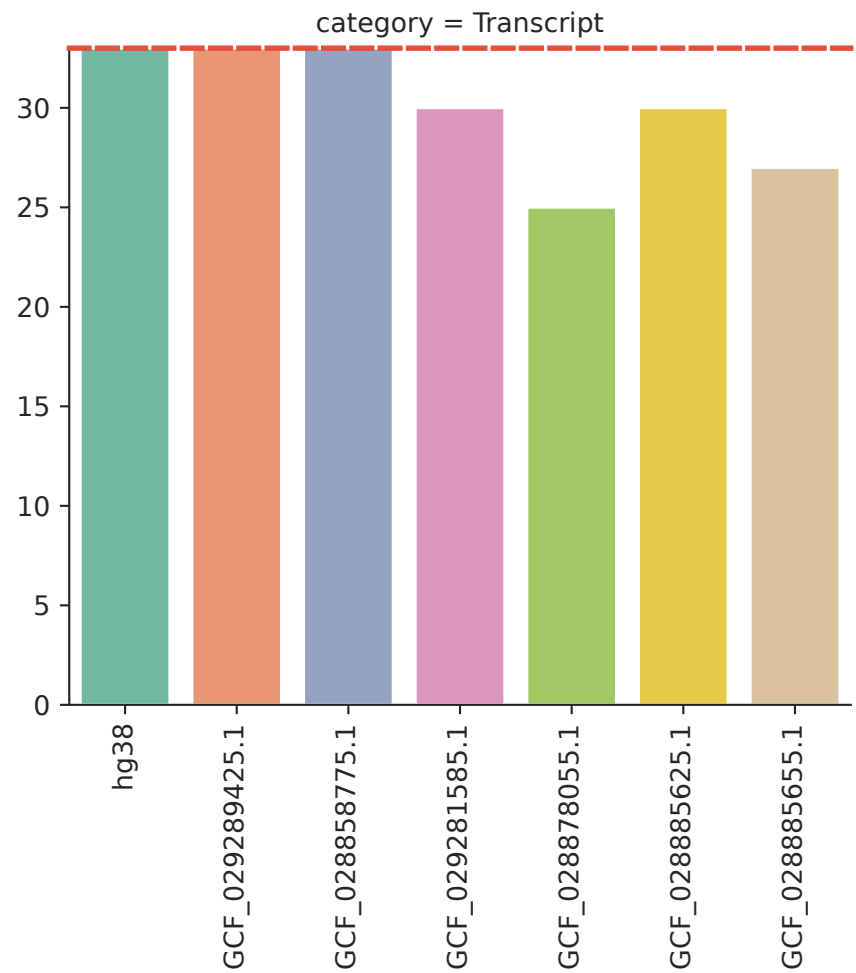

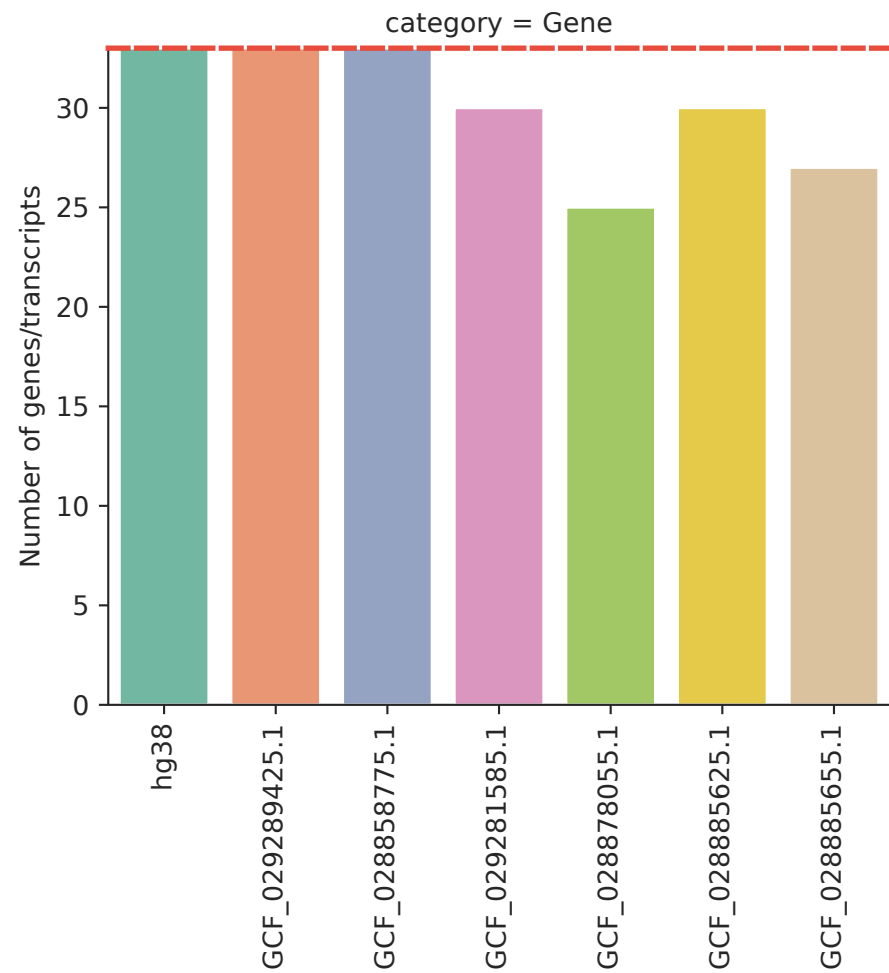

category = Gene

category = Transcript

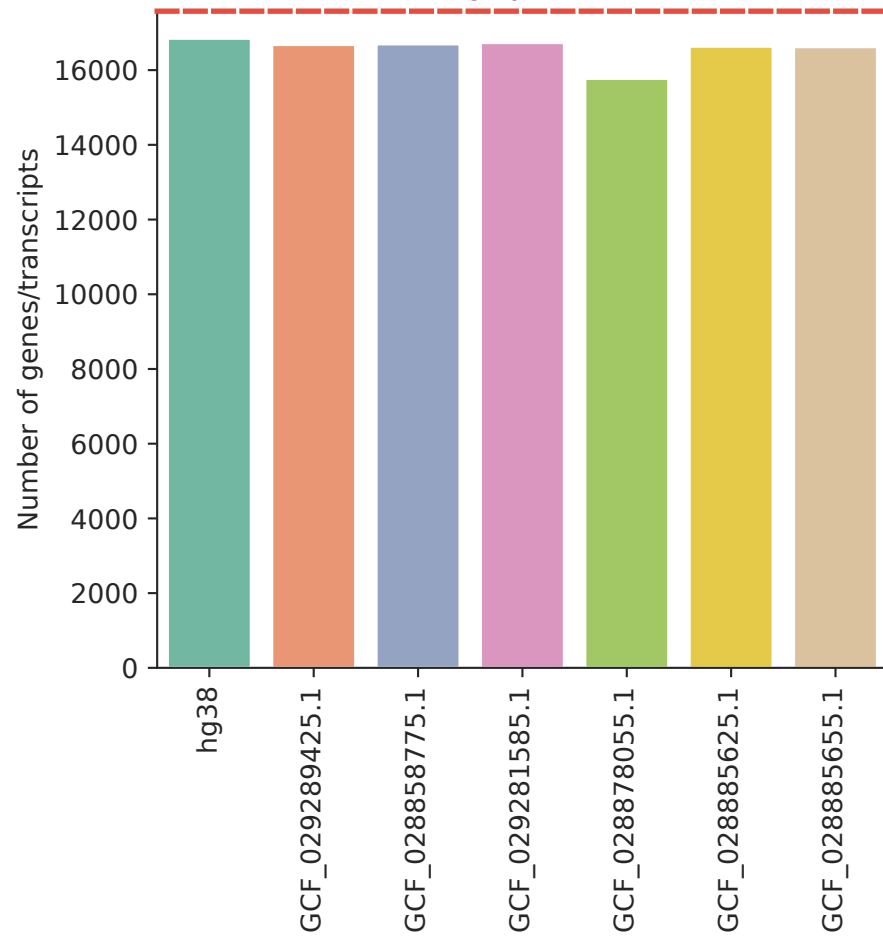

Number of comparative genes/transcripts present for biotype TR_V_pseudogene

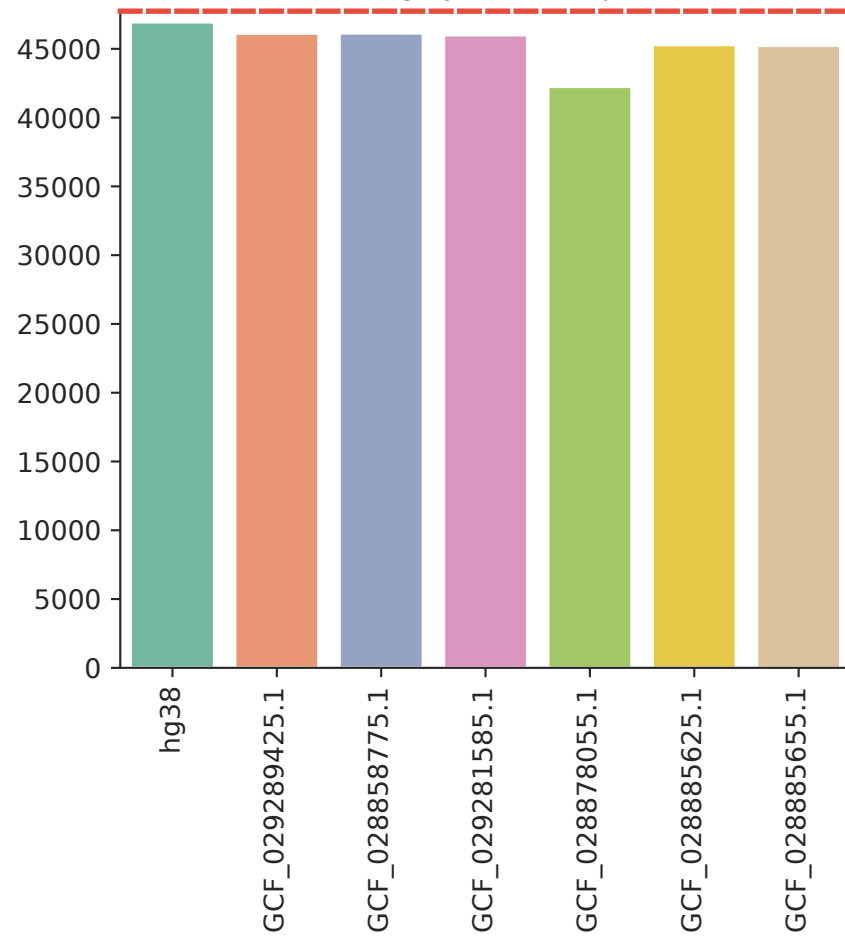

Number of comparative genes/transcripts present for biotype lncRNA

category = Gene

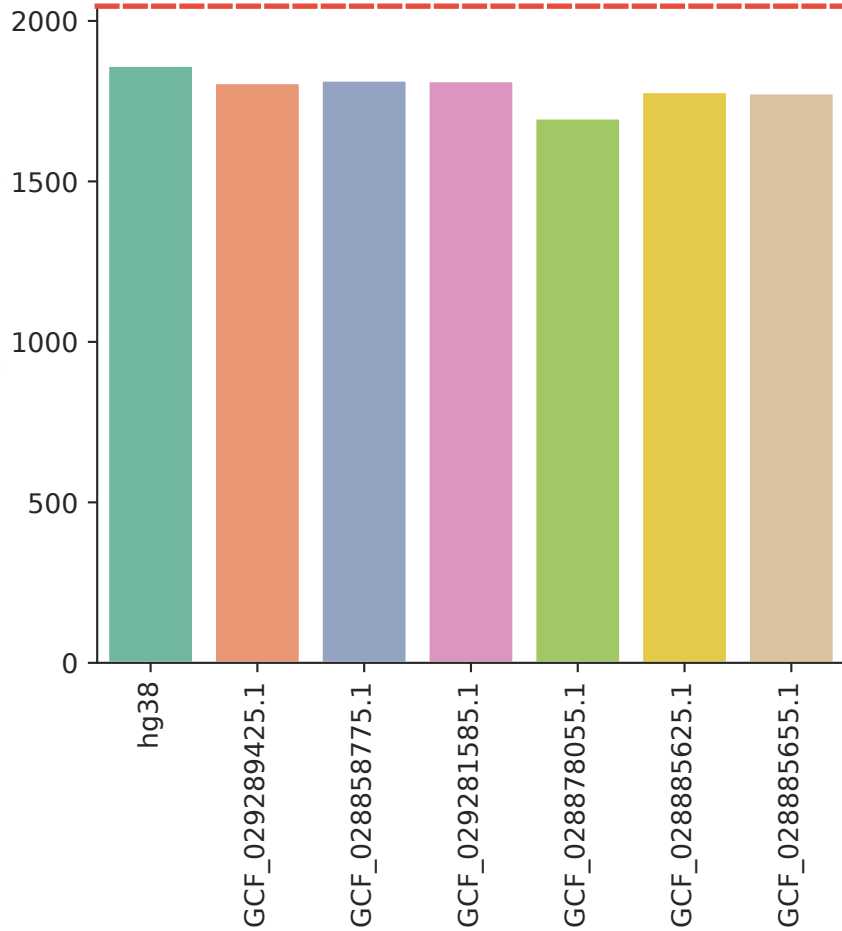

category = Transcript

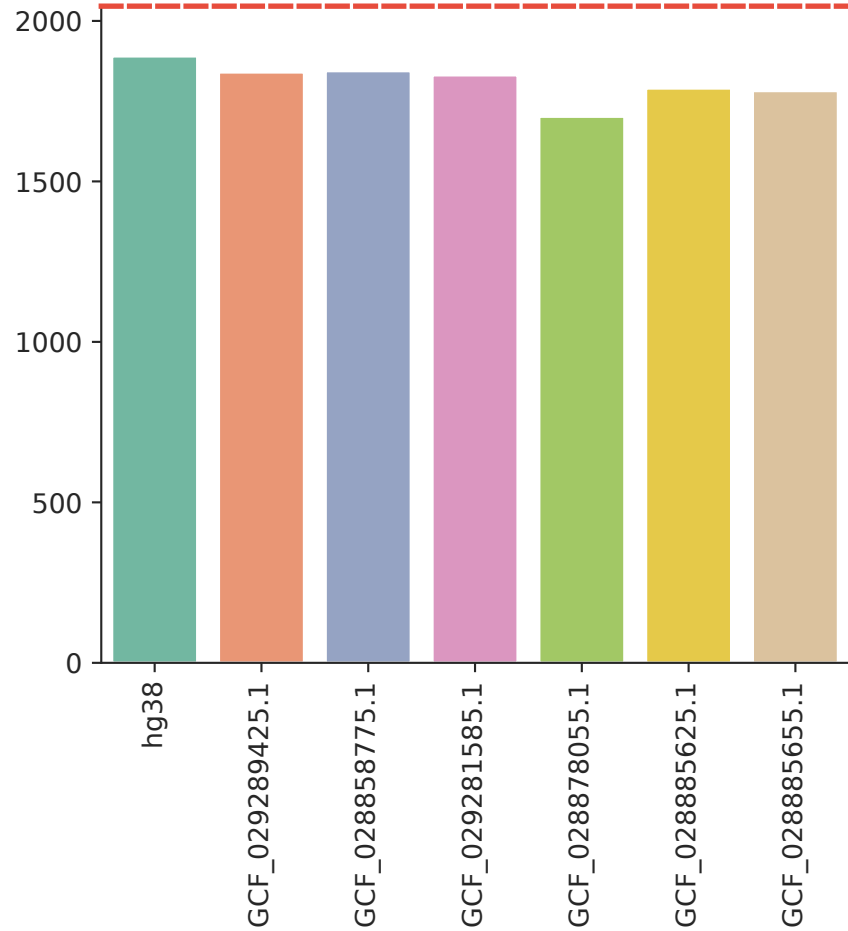

Number of comparative genes/transcripts present for biotype miRNA

category = Gene

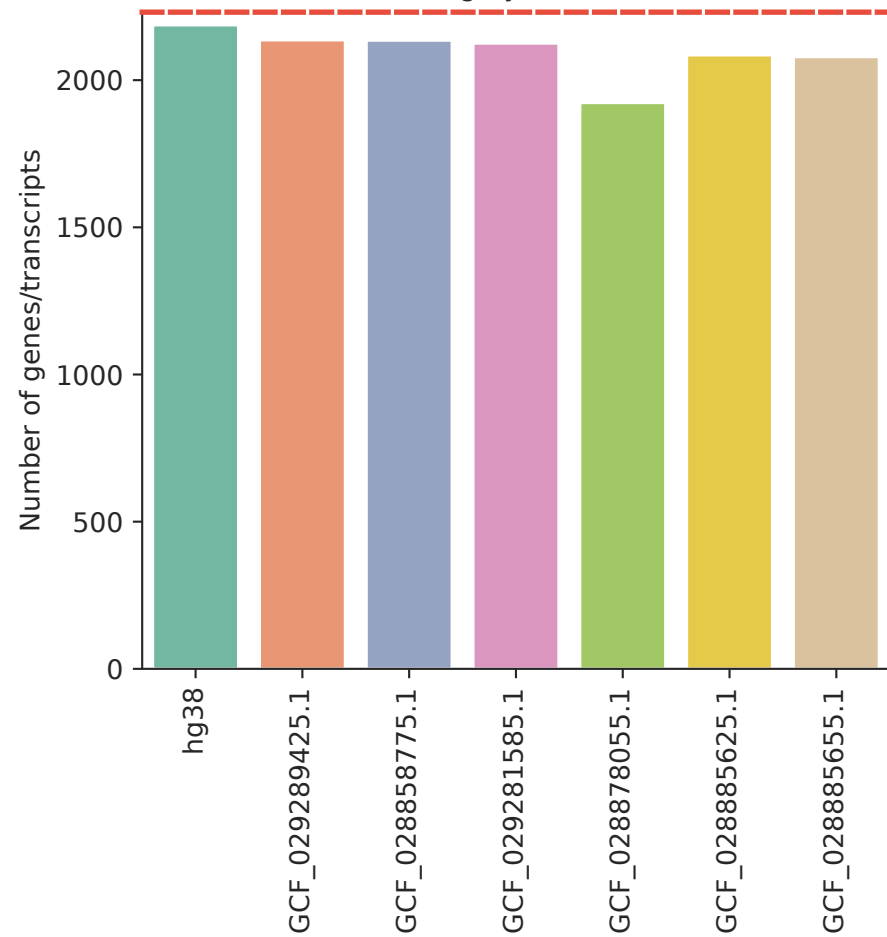

category = Transcript

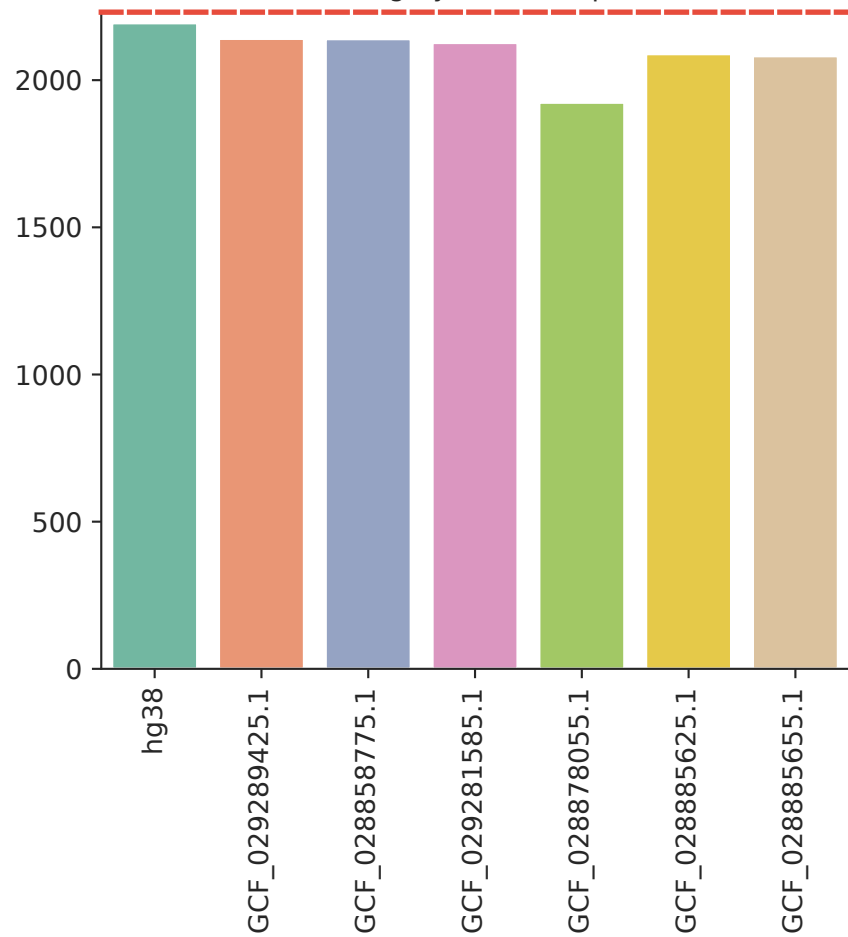

Number of comparative genes/transcripts present for biotype misc_RNA

category = Gene

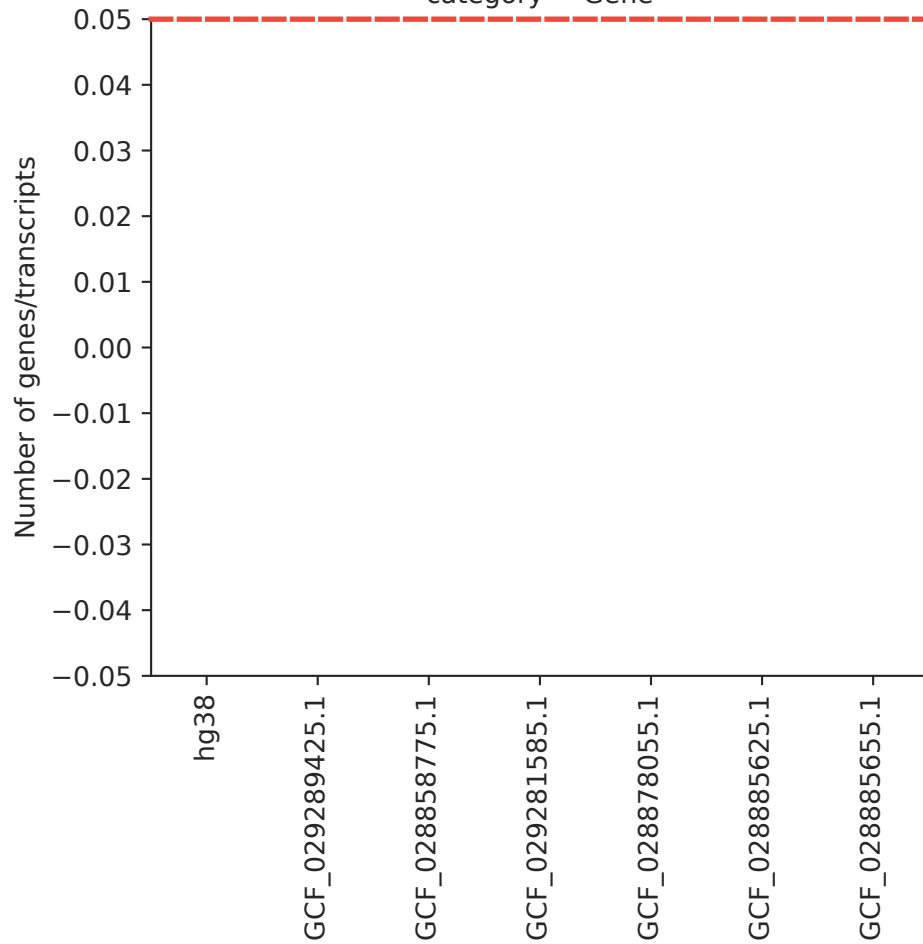

category = Transcript

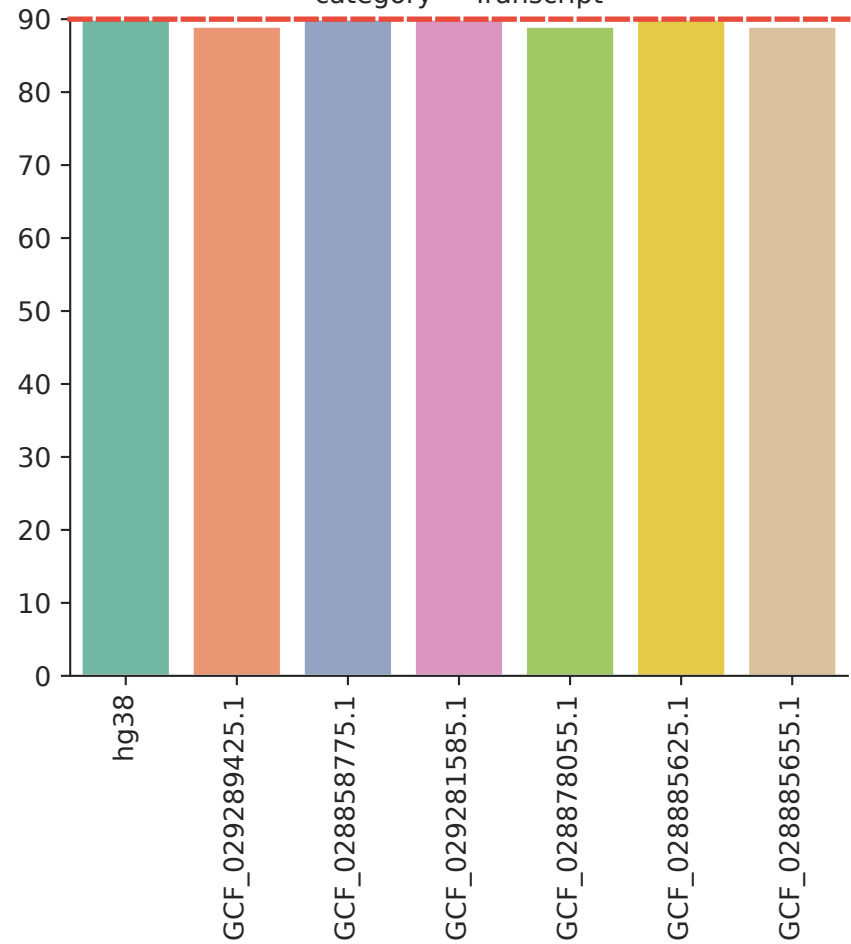

Number of comparative genes/transcripts present for biotype non_stop_decay

category = Gene

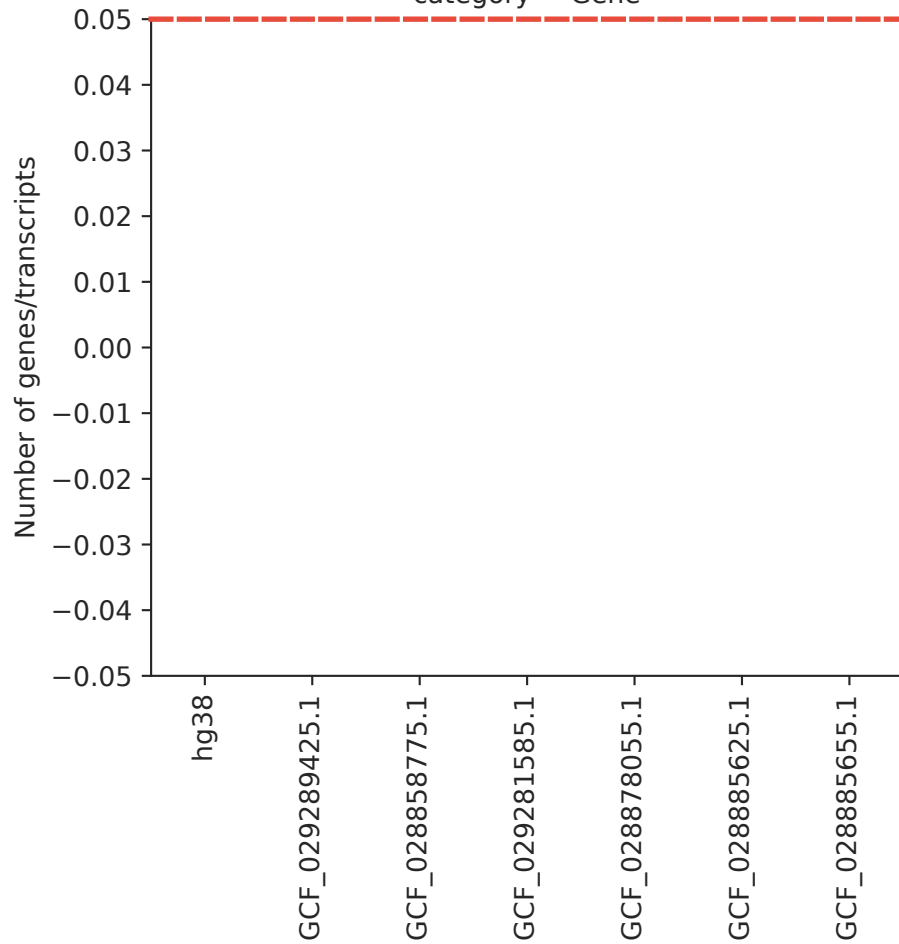

category = Transcript

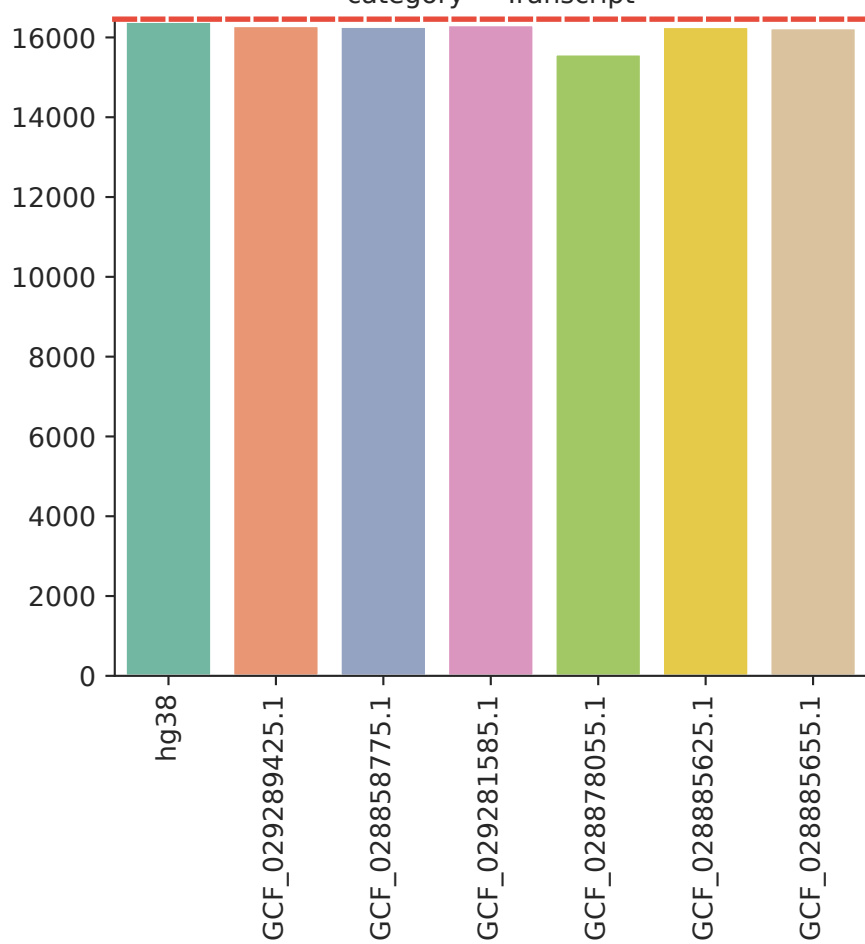

Number of comparative genes/transcripts present for biotype nonsense_mediated_decay

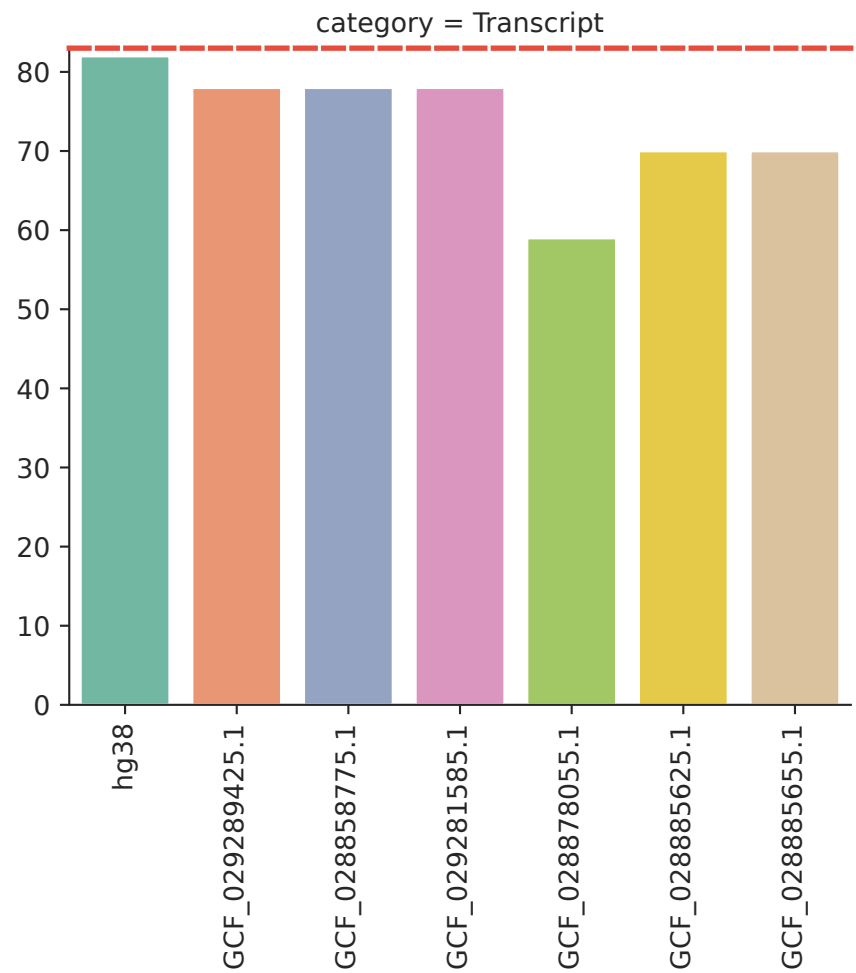

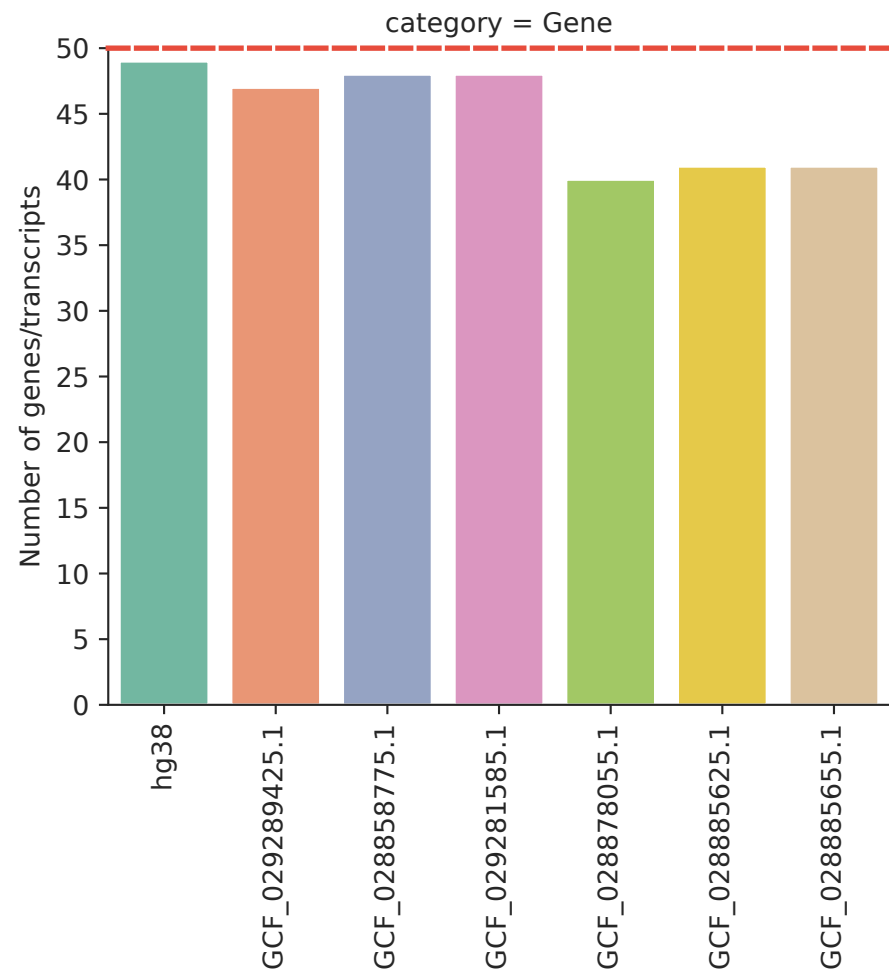

category = Gene

category = Transcript

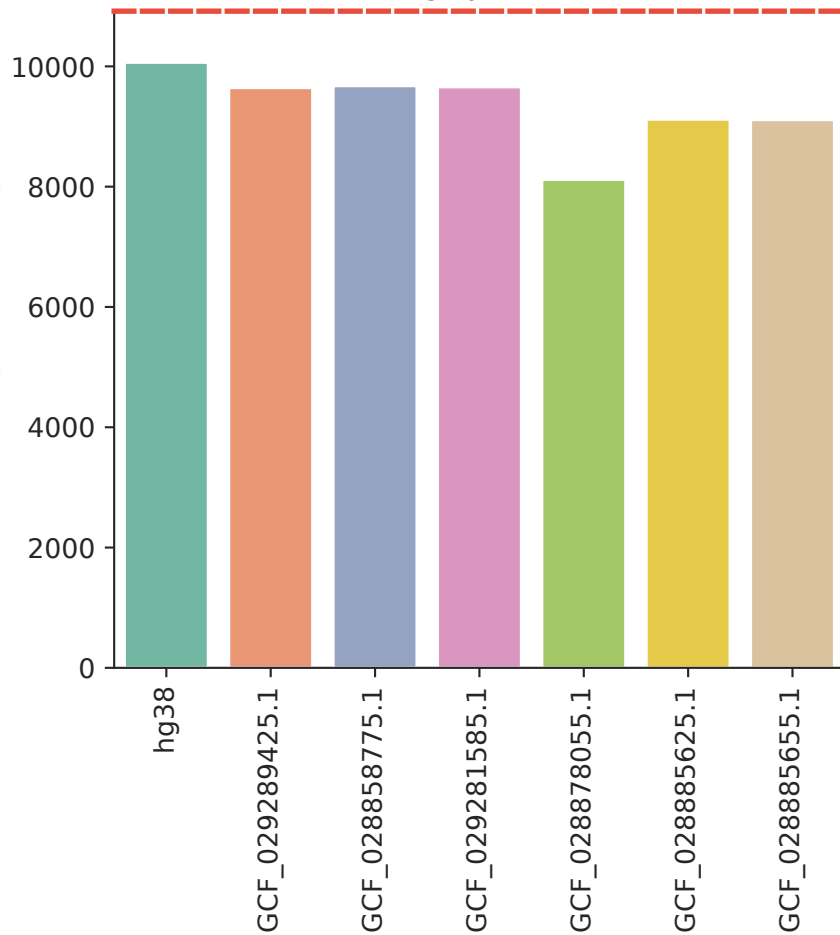

Number of comparative genes/transcripts present for biotype polymorphic_pseudogene

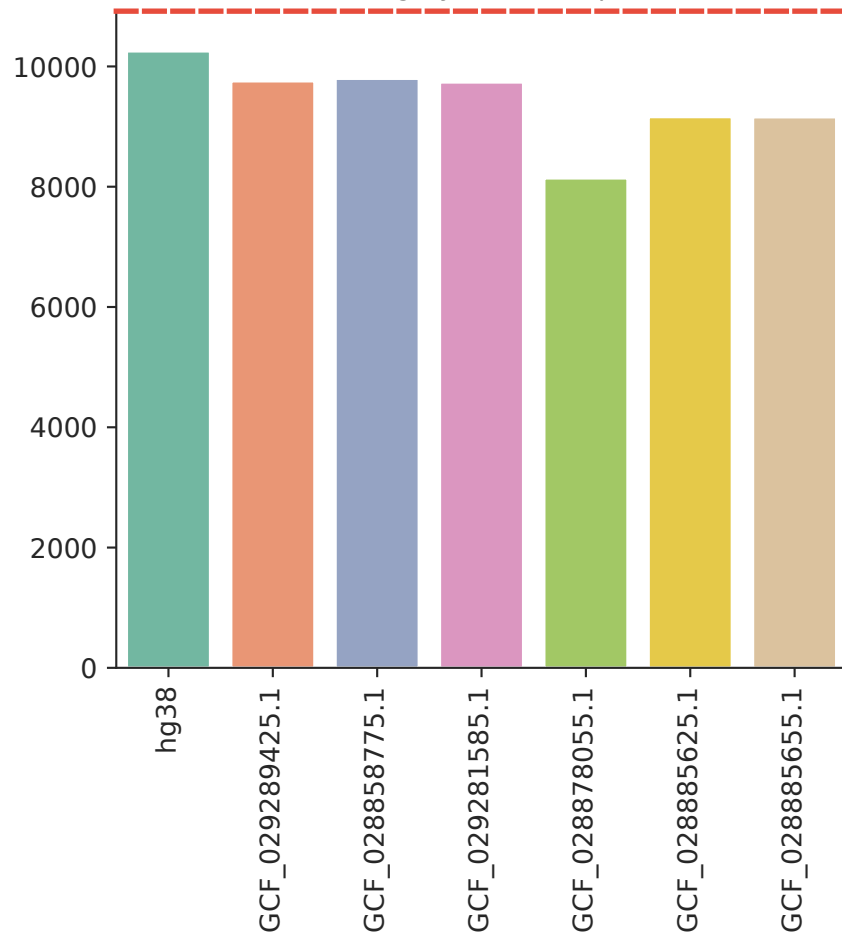

Number of comparative genes/transcripts present for biotype processed_pseudogene

category = Gene

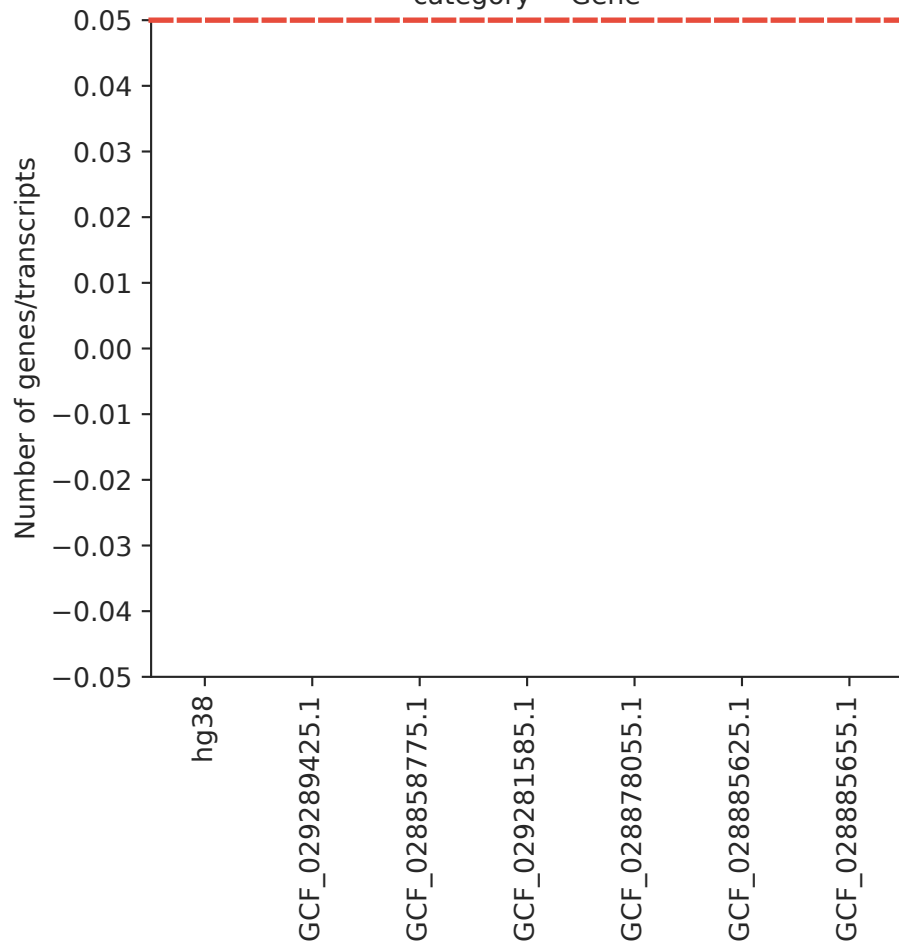

category = Transcript

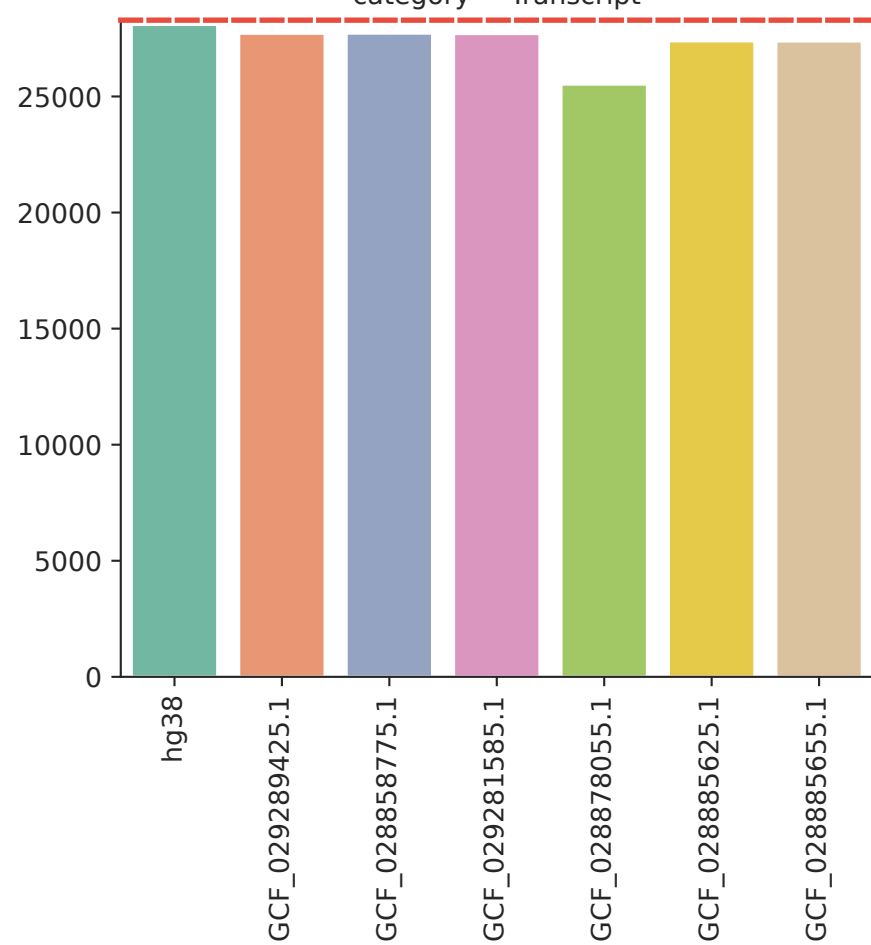

Number of comparative genes/transcripts present for biotype processed_transcript

category = Gene

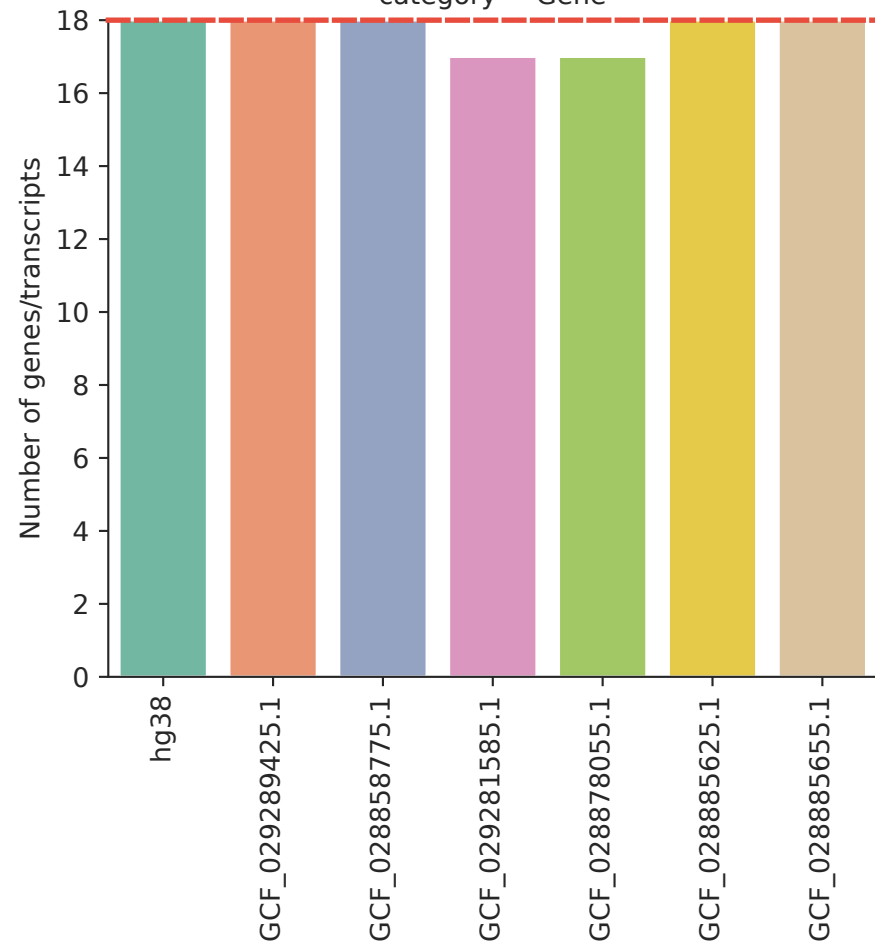

category = Transcript

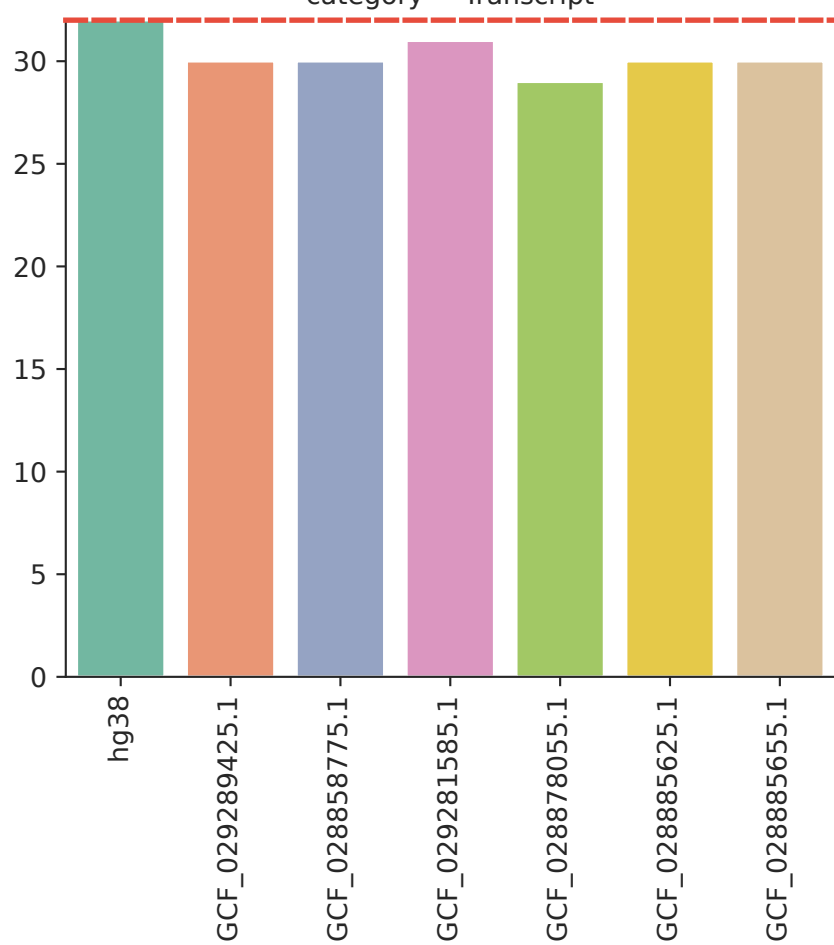

Number of comparative genes/transcripts present for biotype pseudogene

category = Gene

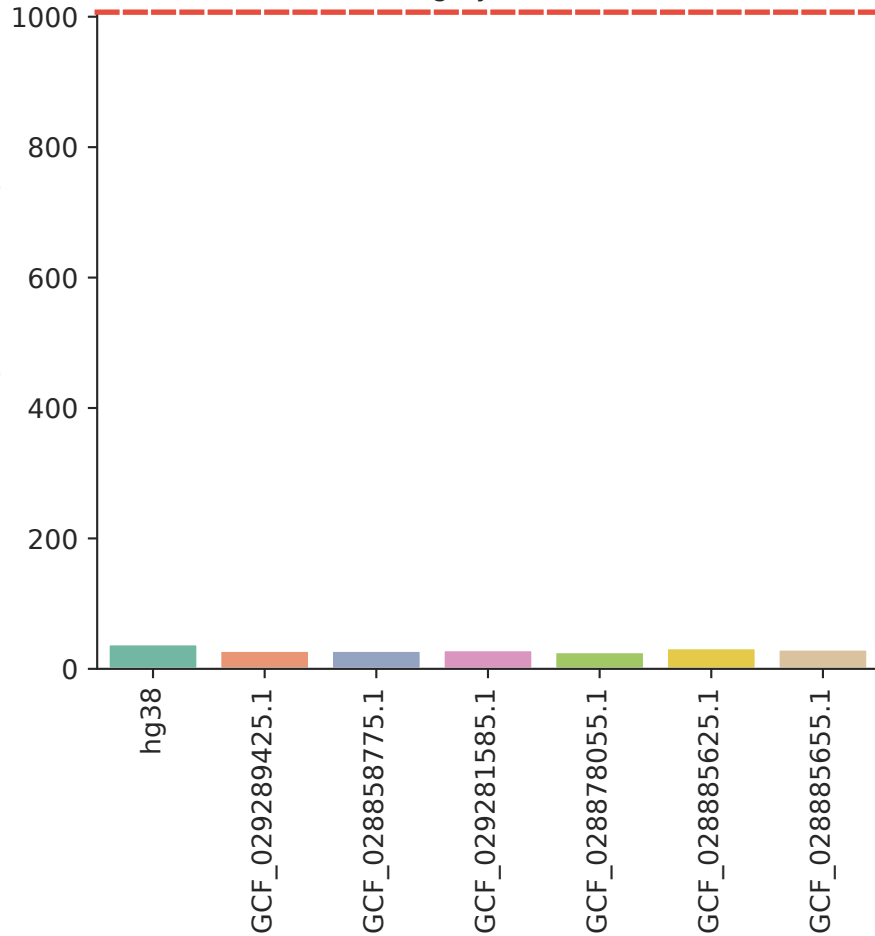

category = Transcript

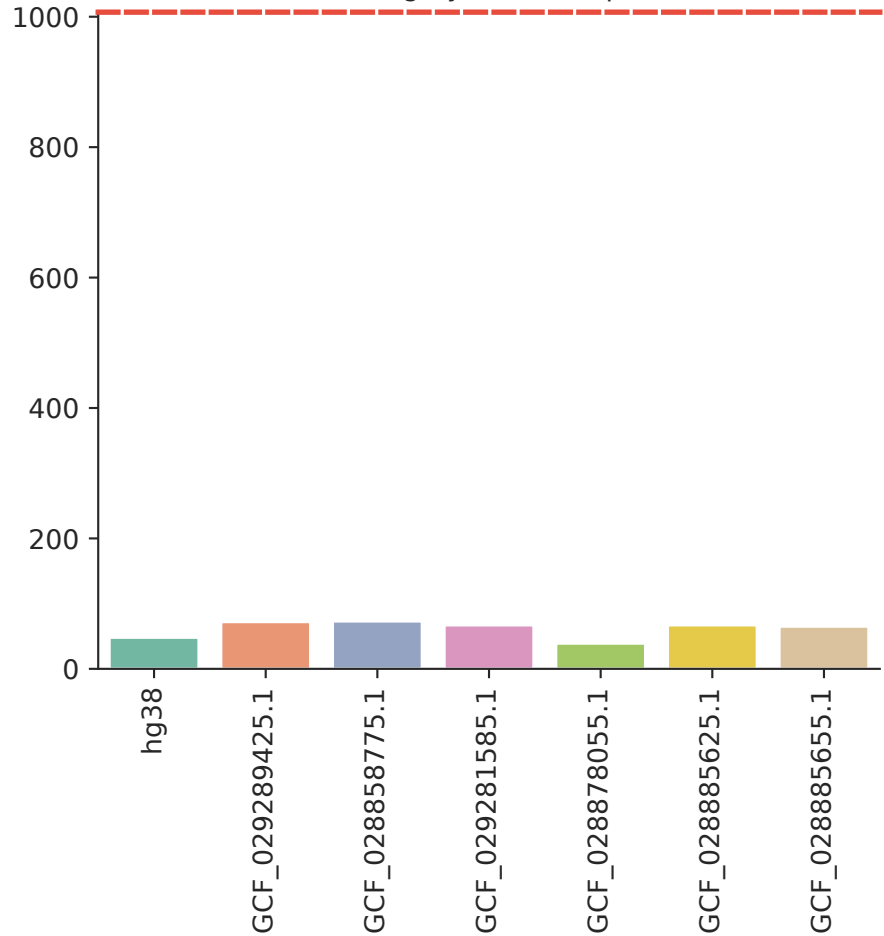

Number of comparative genes/transcripts present for biotype rRNA

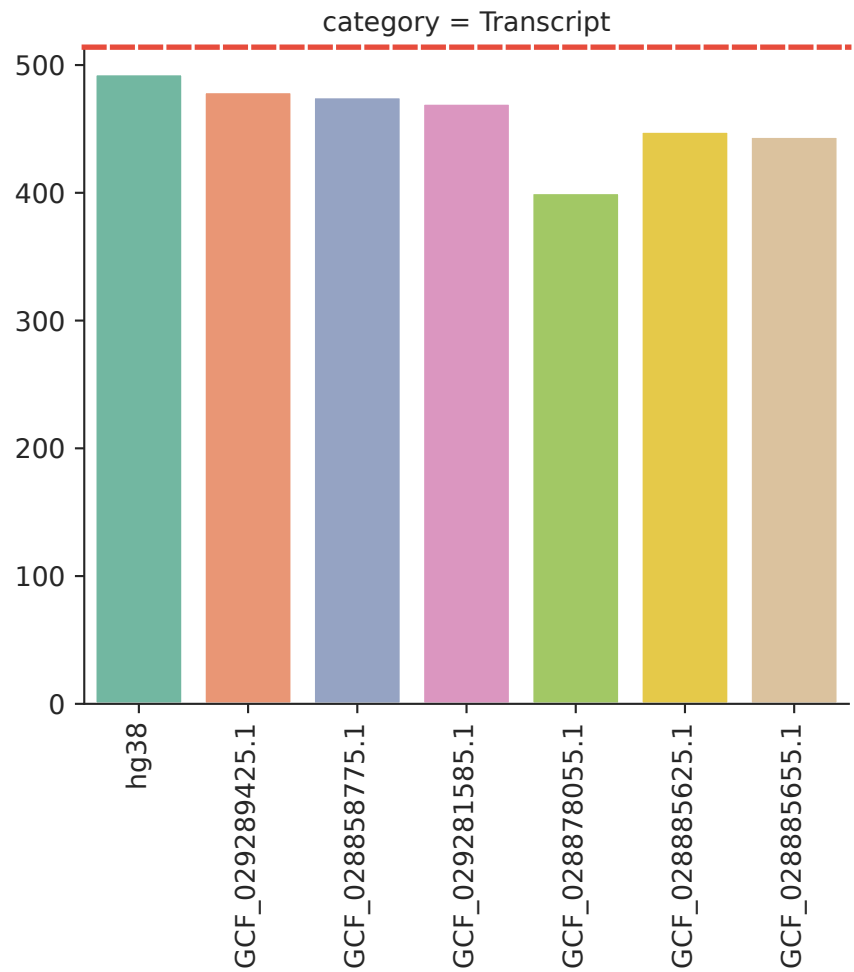

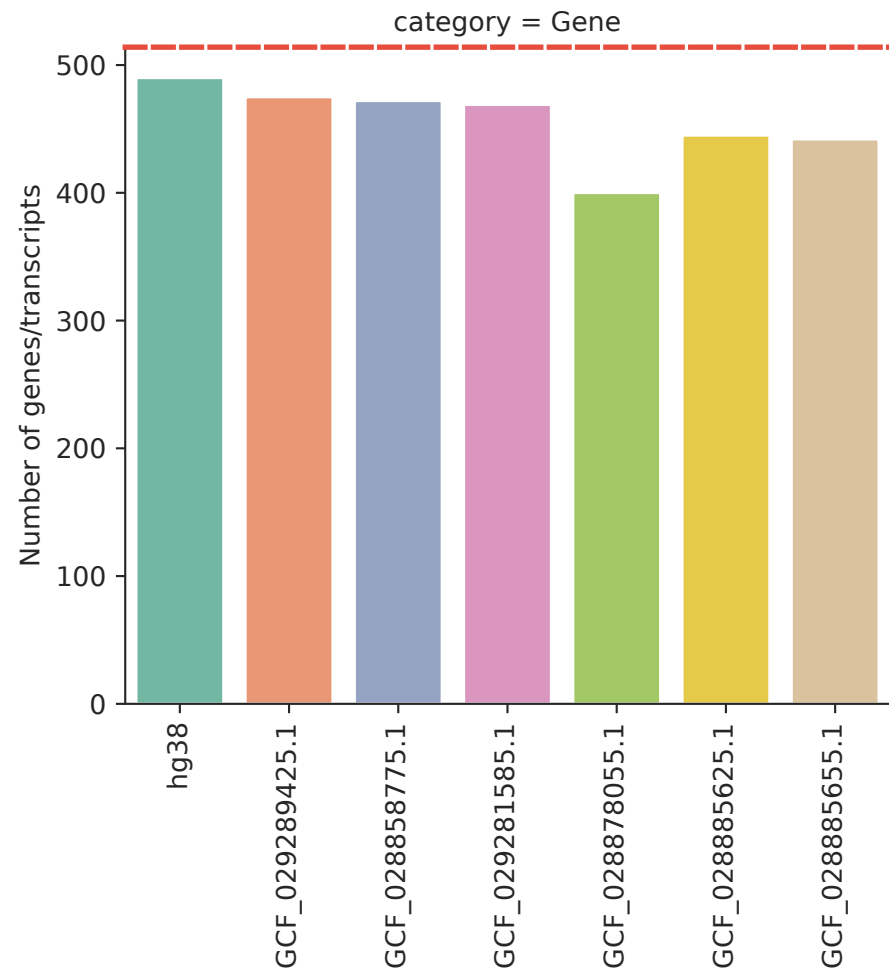

category = Gene

category = Transcript

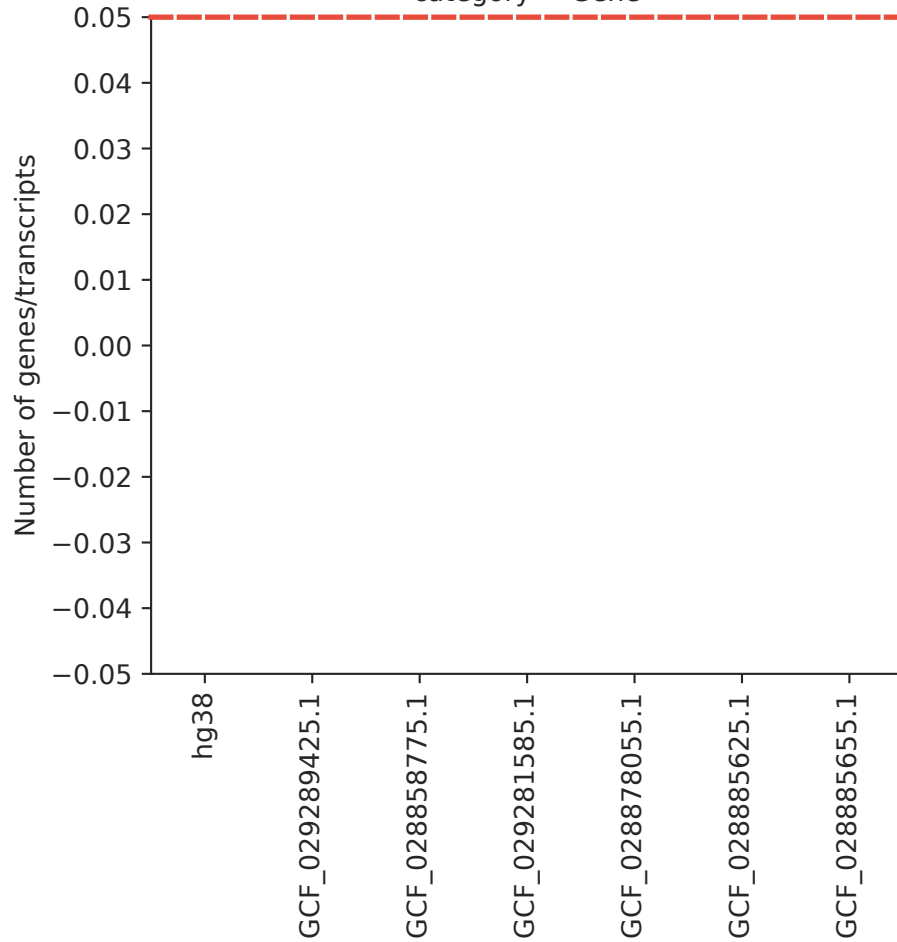

Number of comparative genes/transcripts present for biotype rRNA_pseudogene

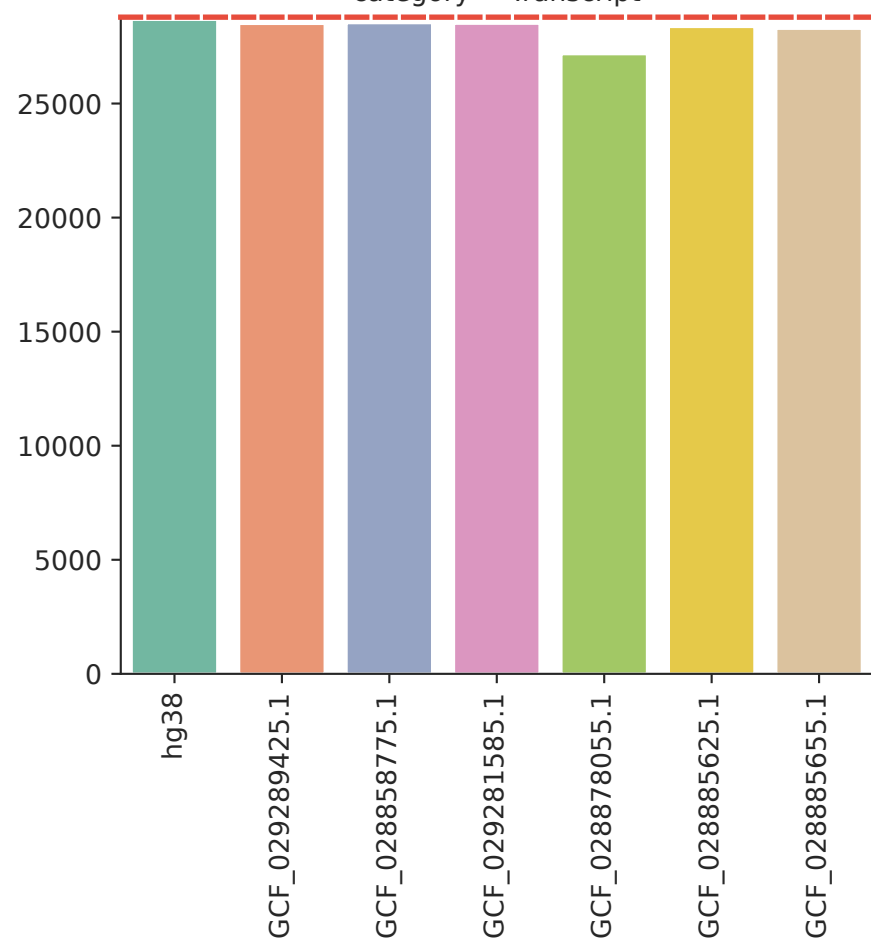

Number of comparative genes/transcripts present for biotype retained_intron

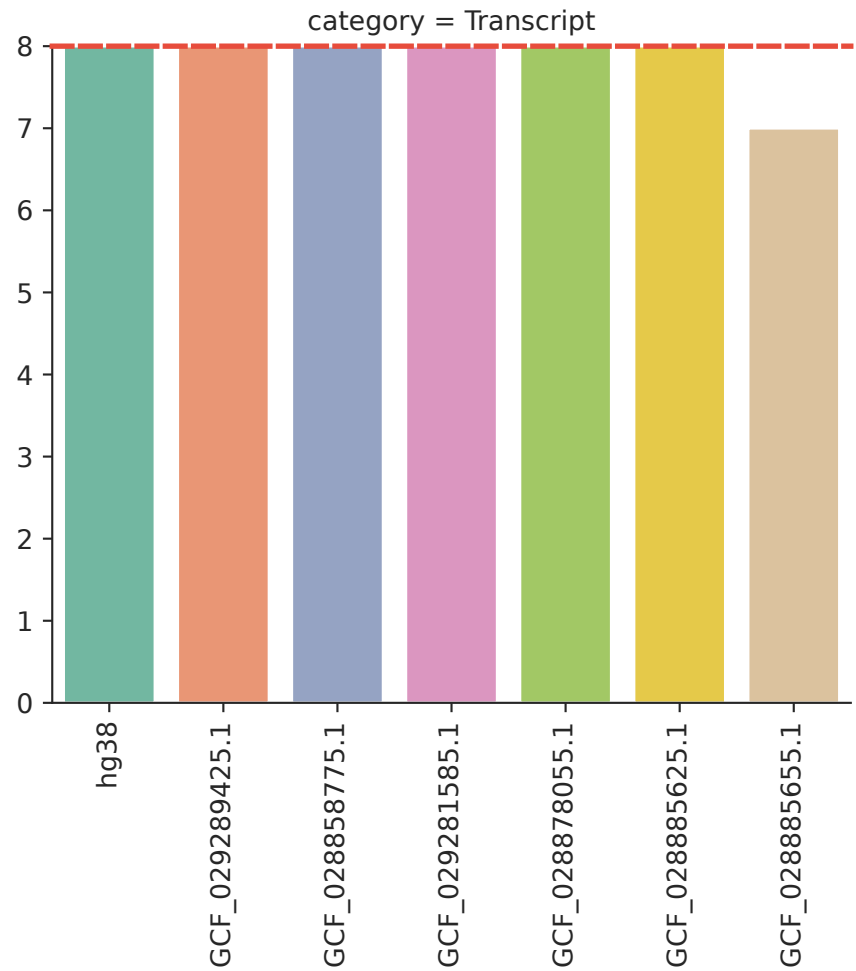

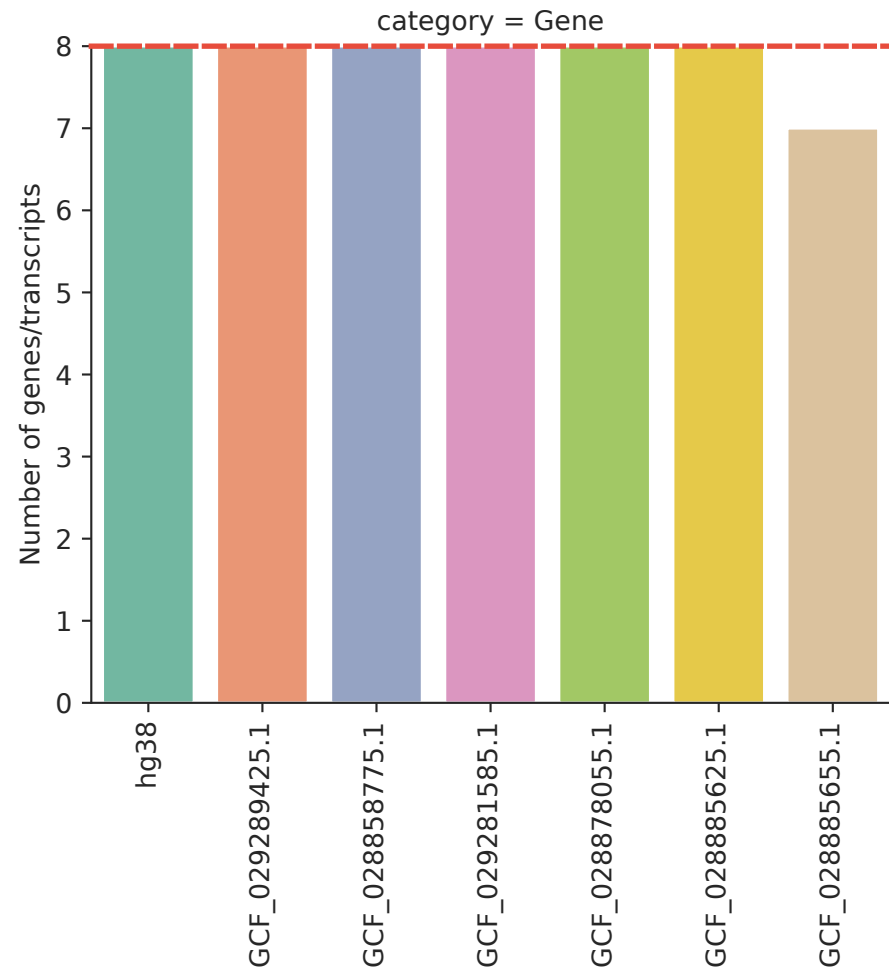

category = Gene

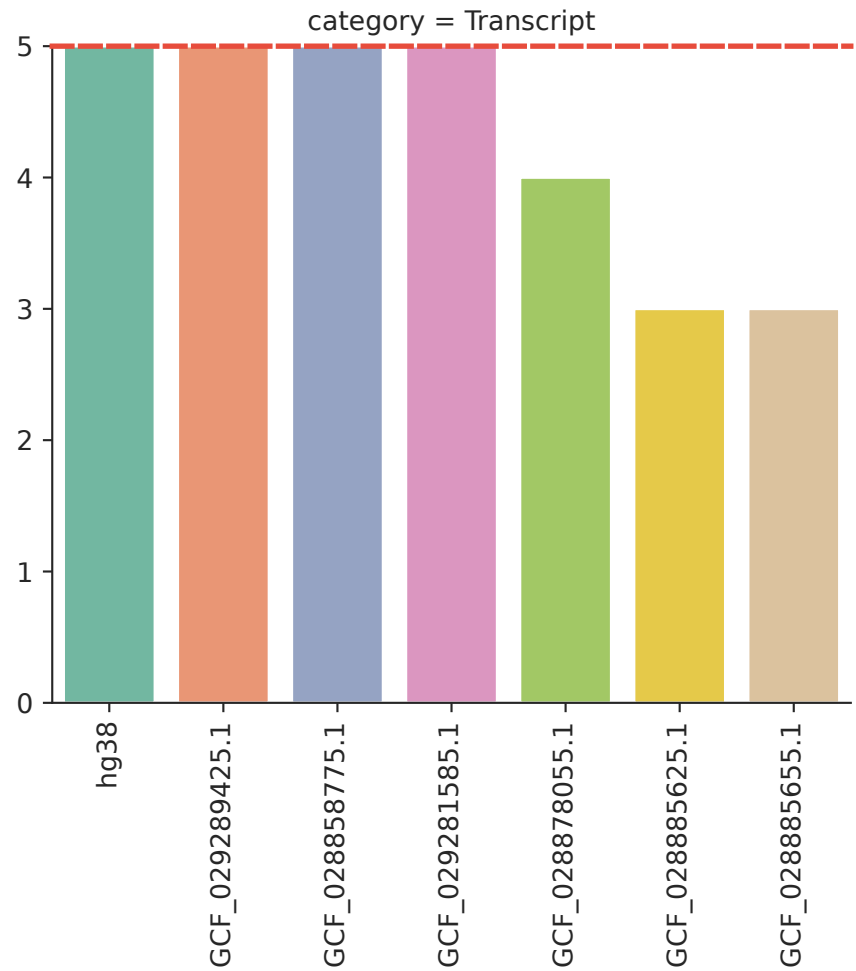

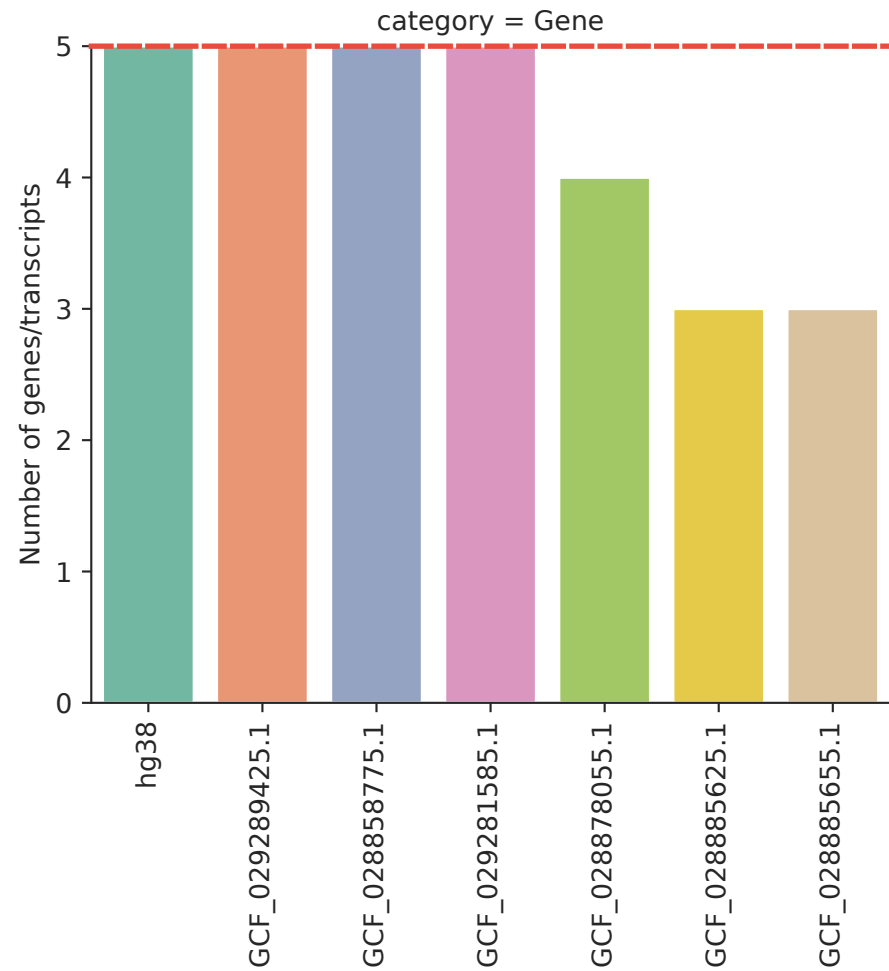

category = Transcript

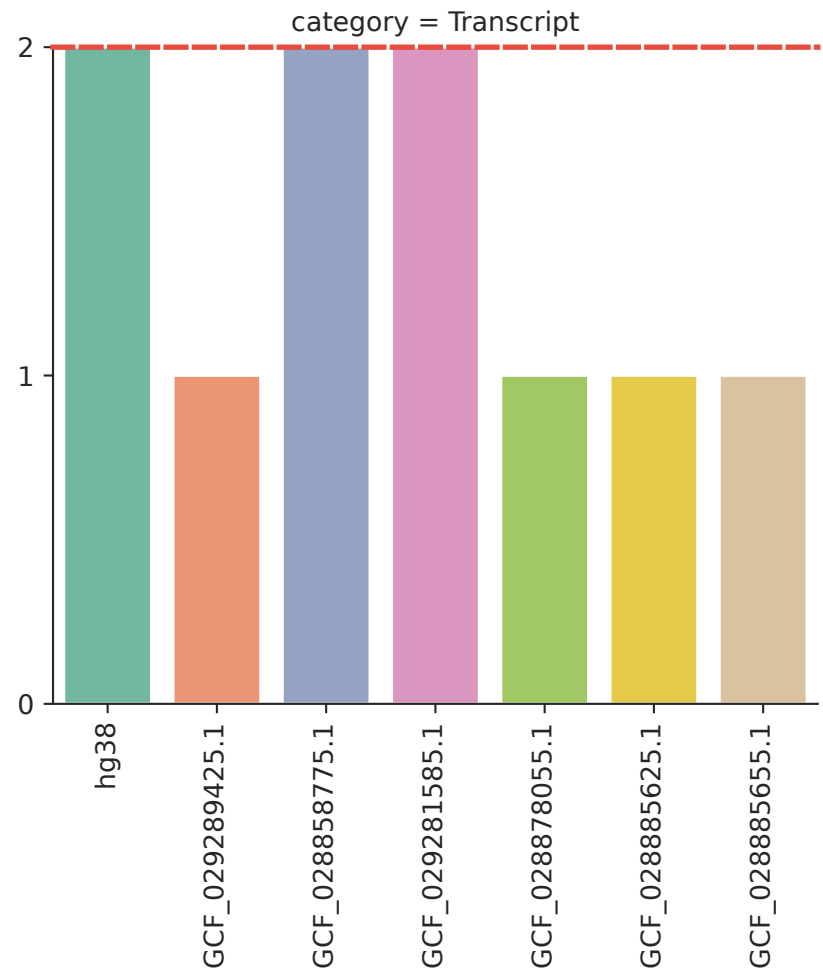

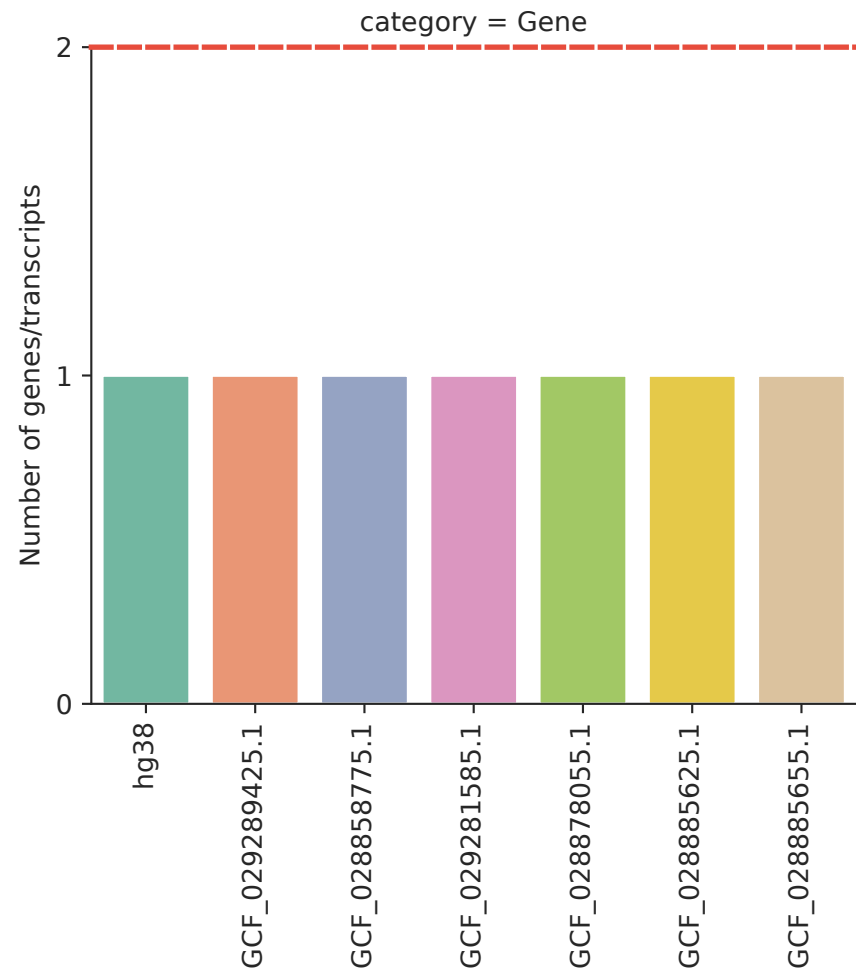

Number of comparative genes/transcripts present for biotype ribozyme

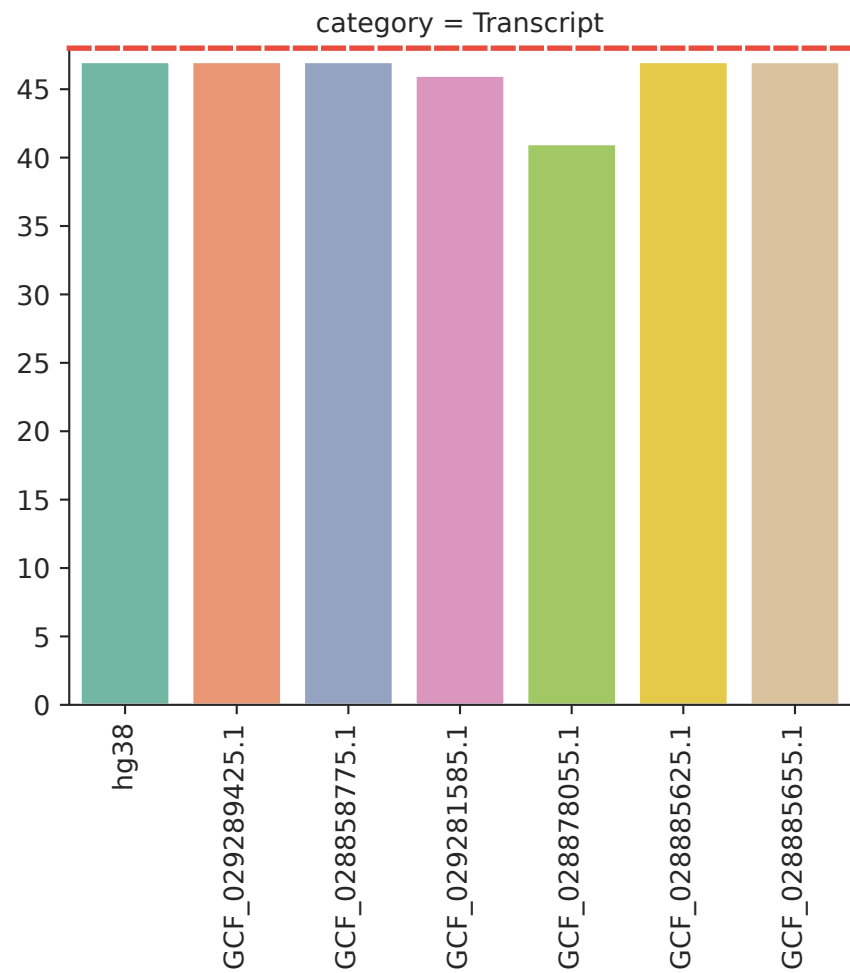

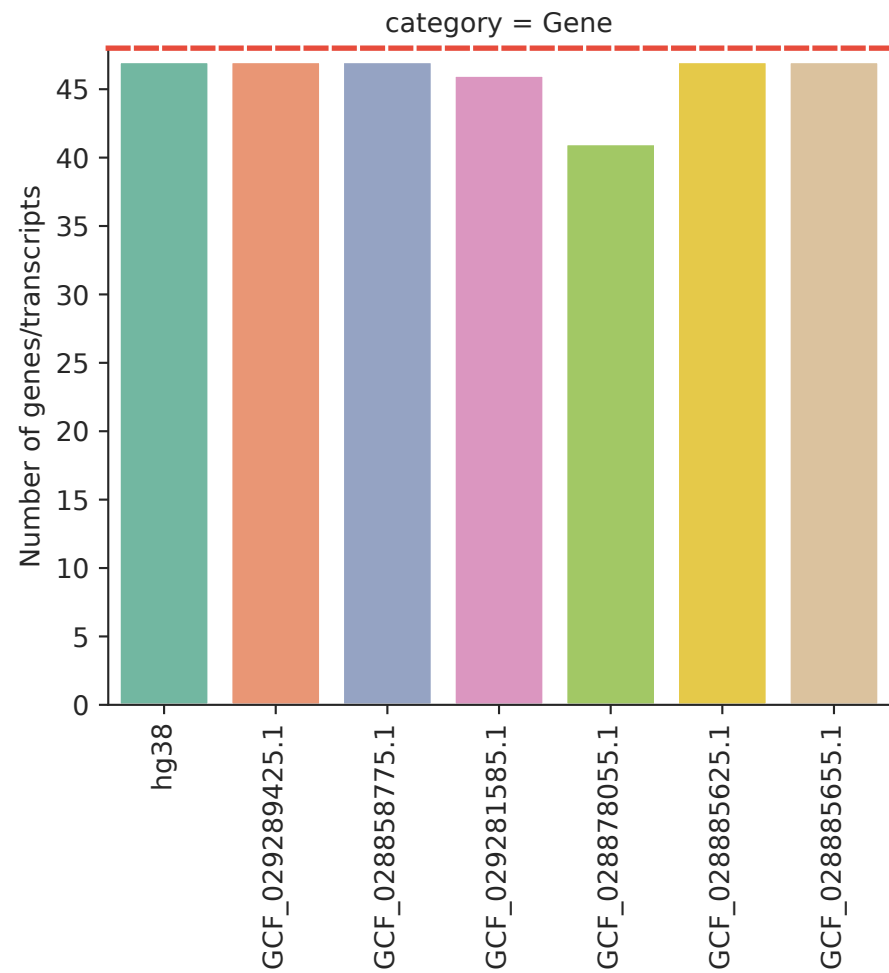

Number of comparative genes/transcripts present for biotype sRNA

Number of comparative genes/transcripts present for biotype scRNA

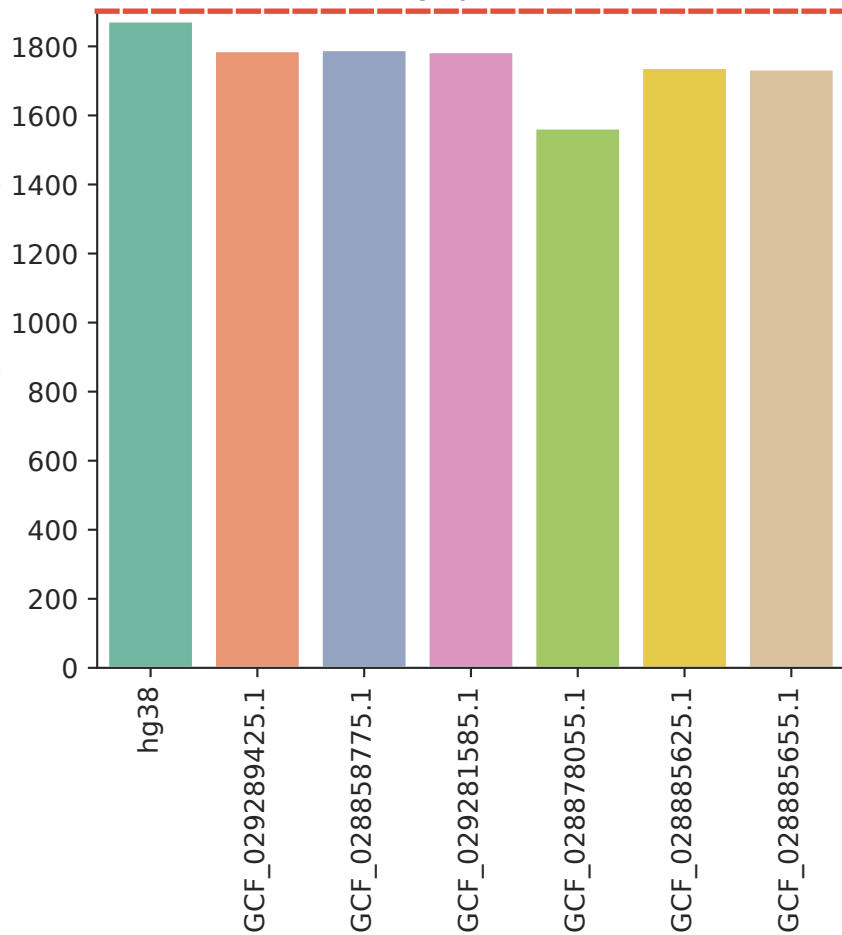

Number of comparative genes/transcripts present for biotype scaRNA

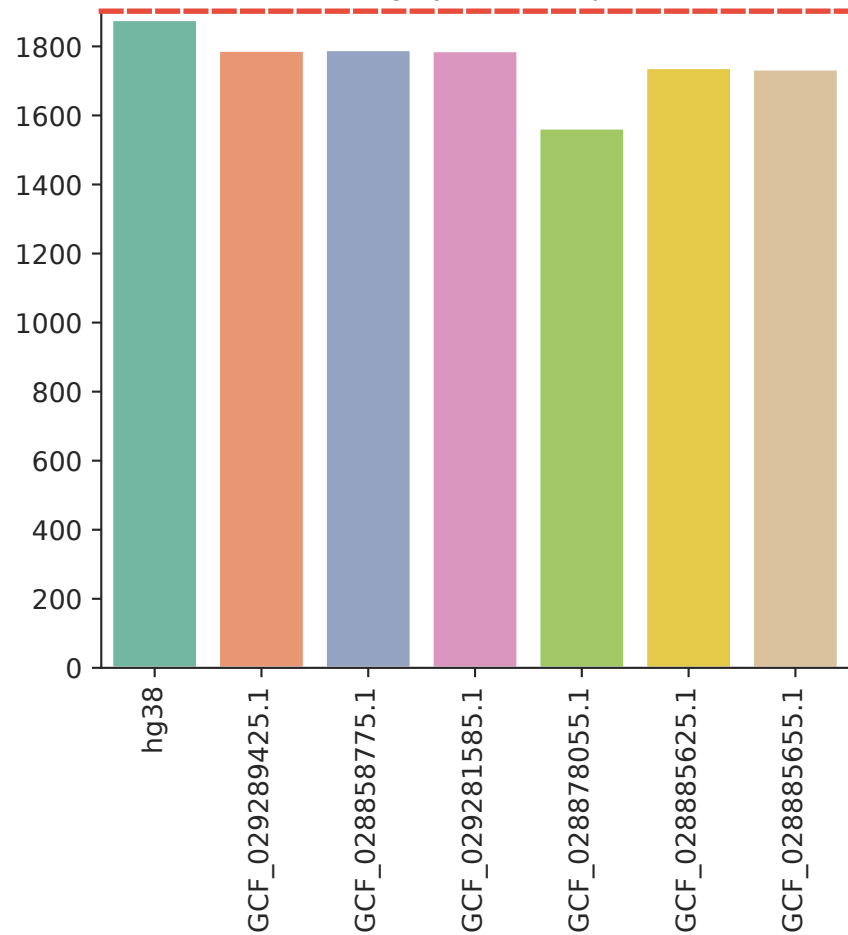

Number of comparative genes/transcripts present for biotype snRNA

category = Gene

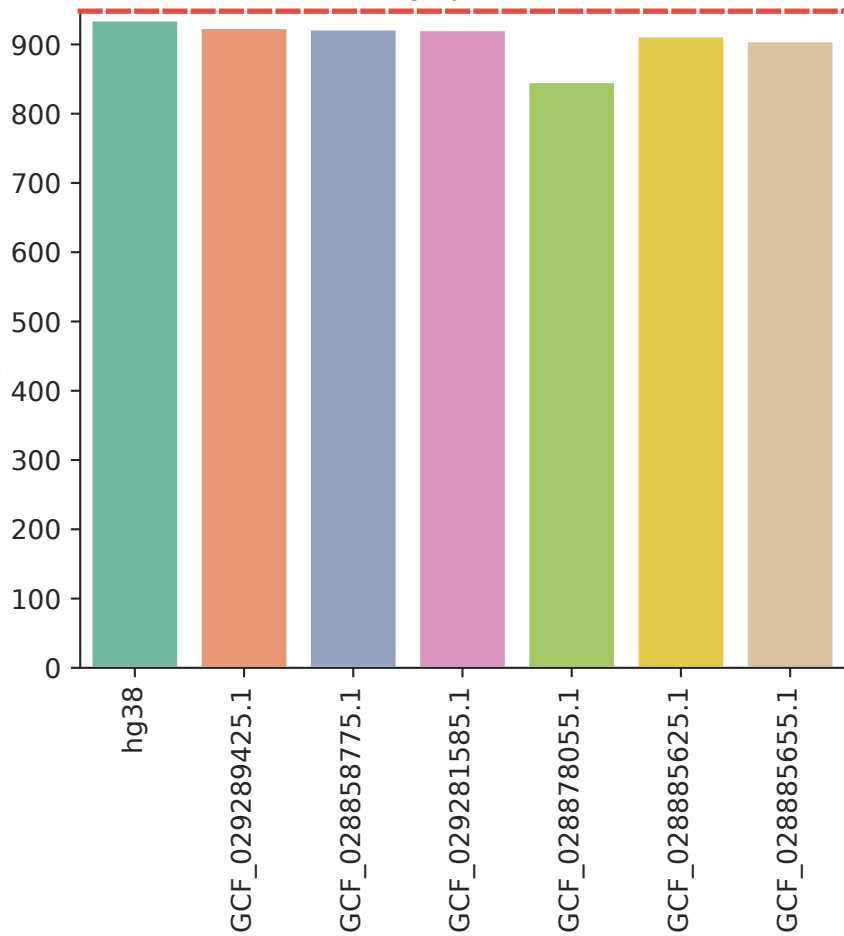

category = Transcript

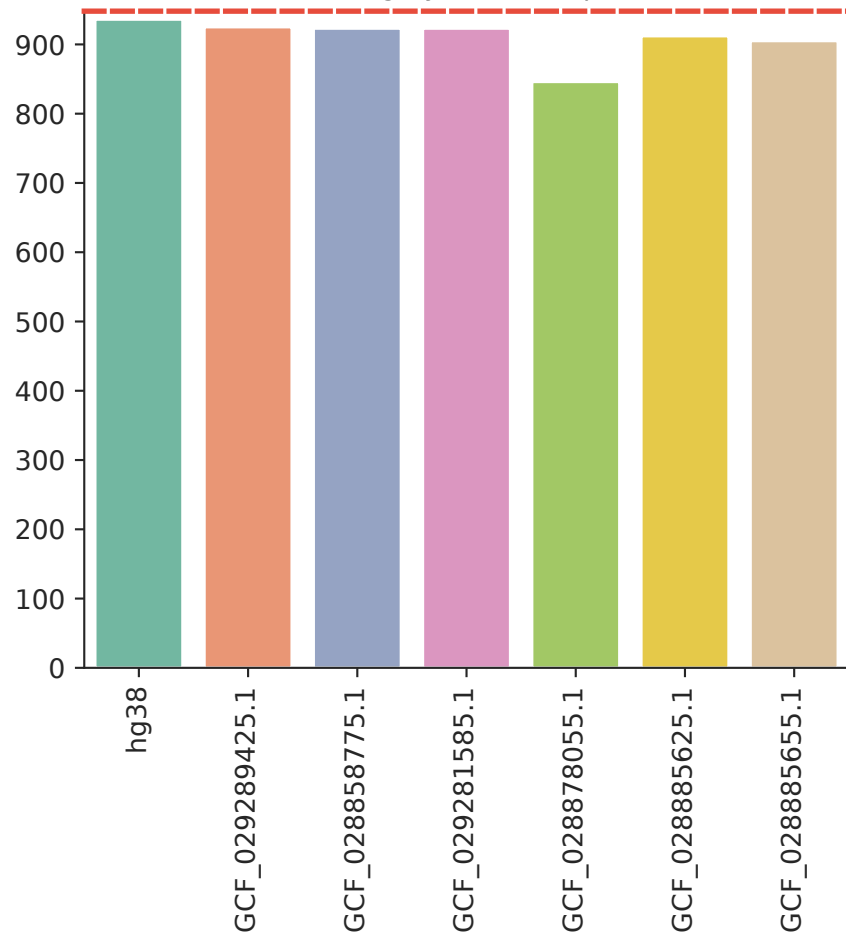

Number of comparative genes/transcripts present for biotype snoRNA

category = Gene

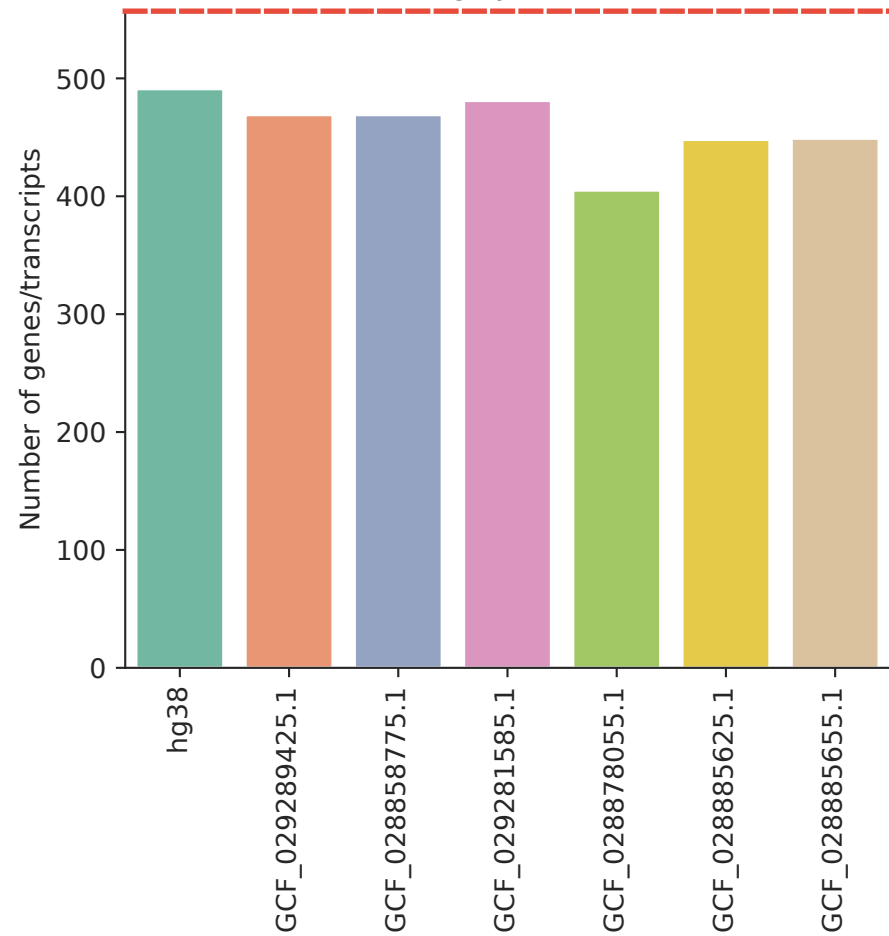

category = Transcript

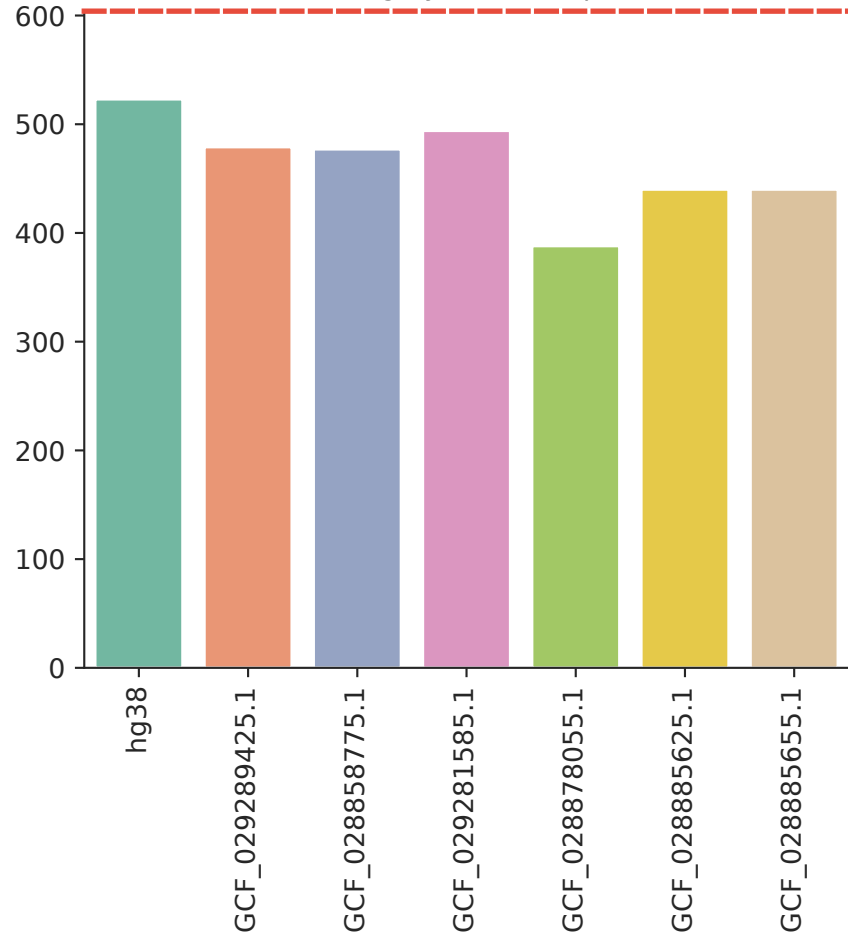

Number of comparative genes/transcripts present for biotype transcribed_processed_pseudogene

category = Gene

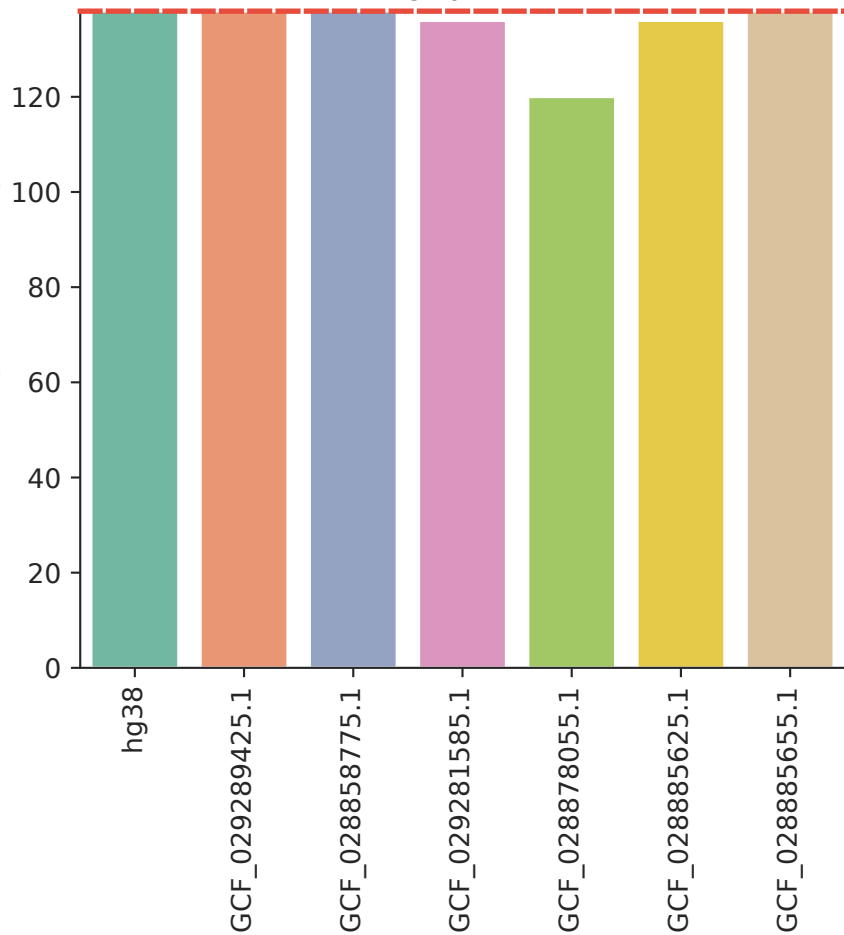

category = Transcript

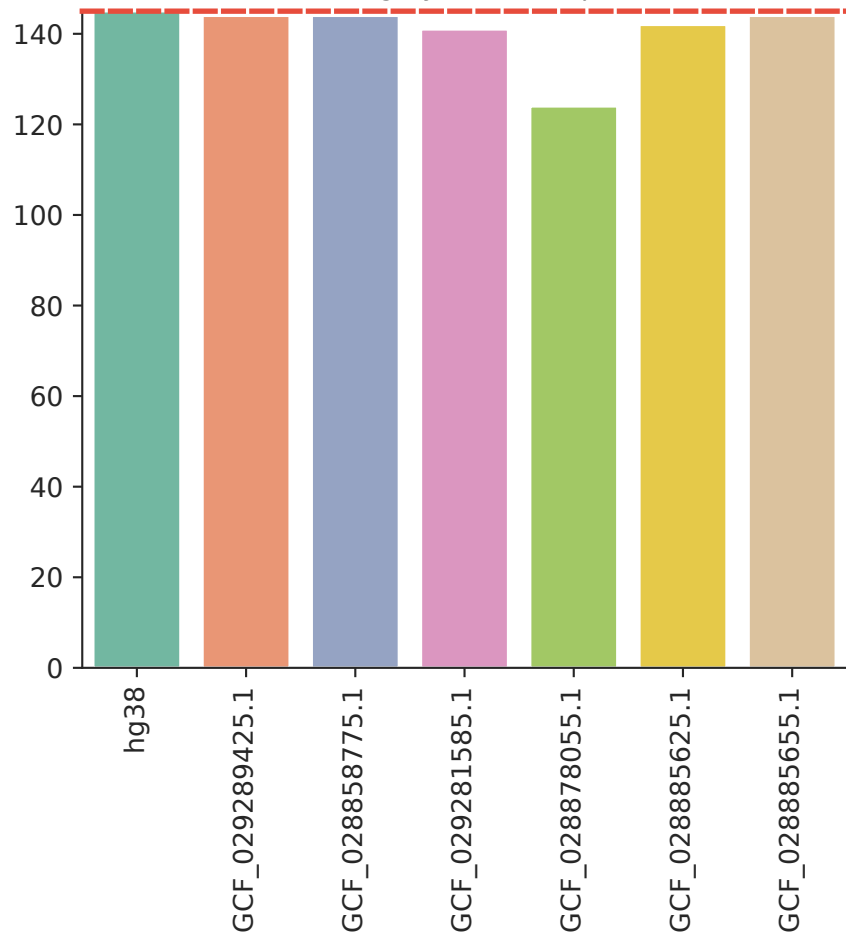

Number of comparative genes/transcripts present for biotype transcribed_unitary_pseudogene

category = Gene

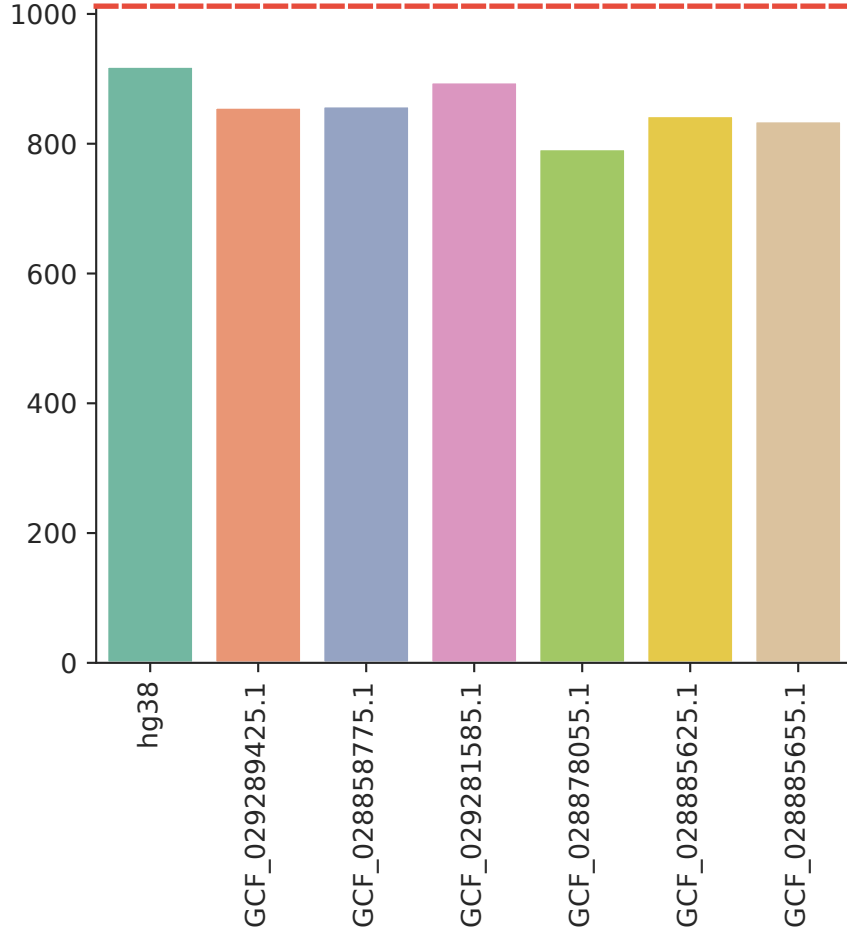

category = Transcript

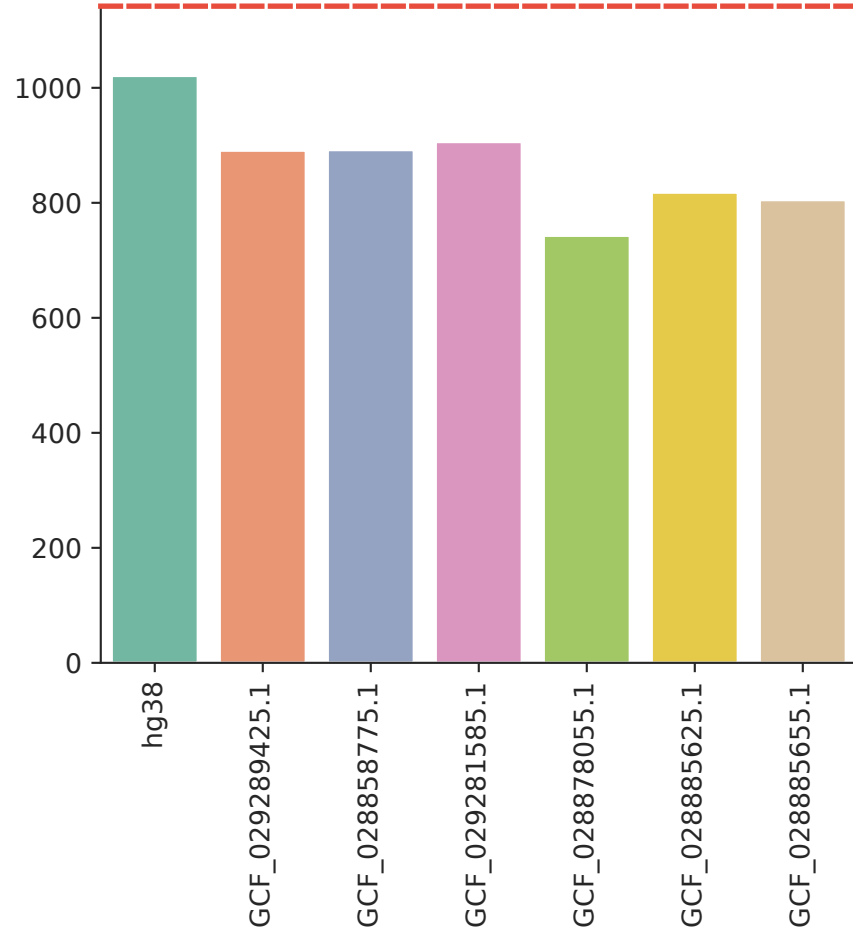

Number of comparative genes/transcripts present for biotype transcribed_unprocessed_pseudogene

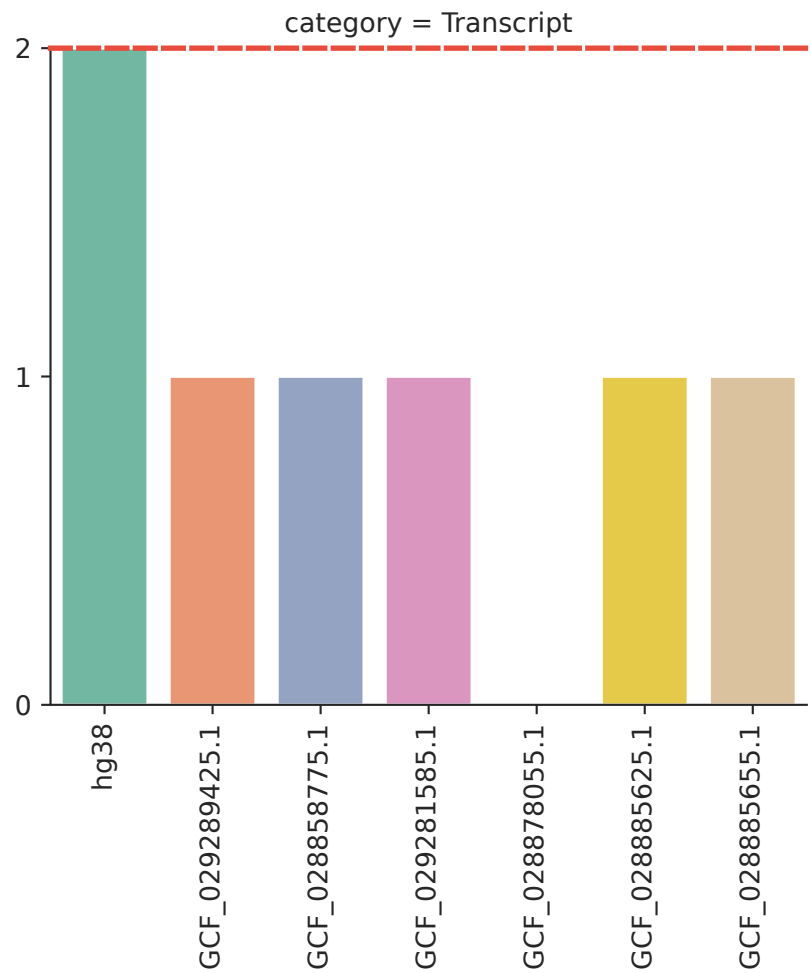

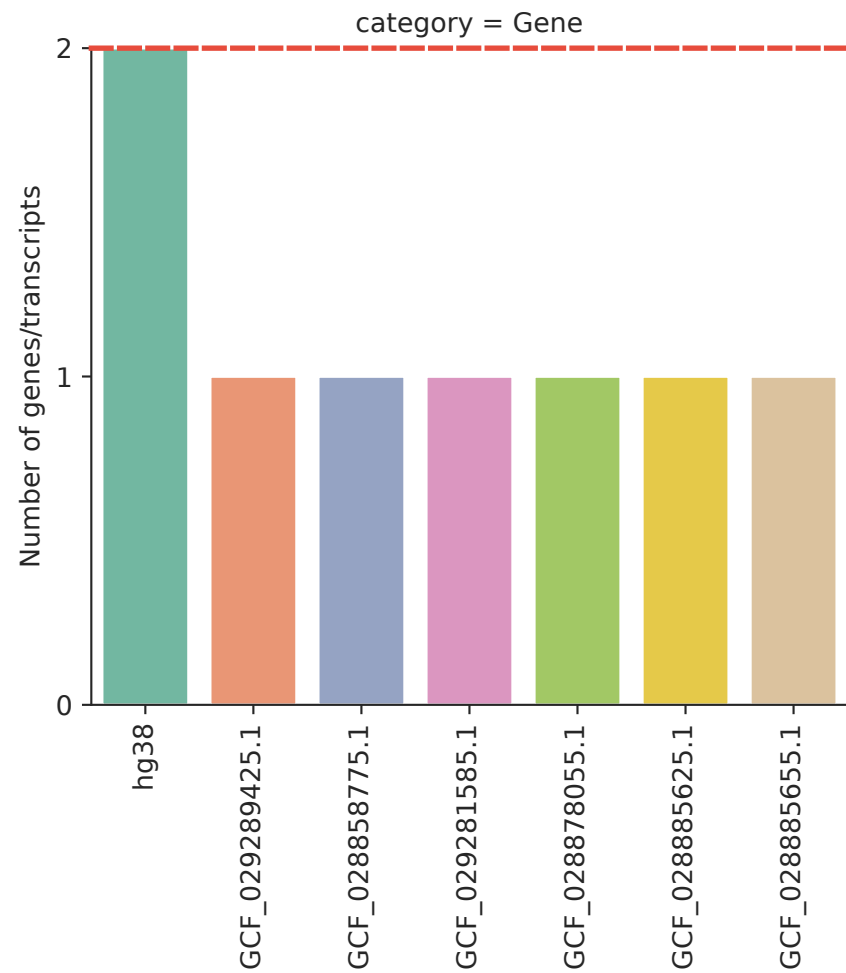

category = Gene

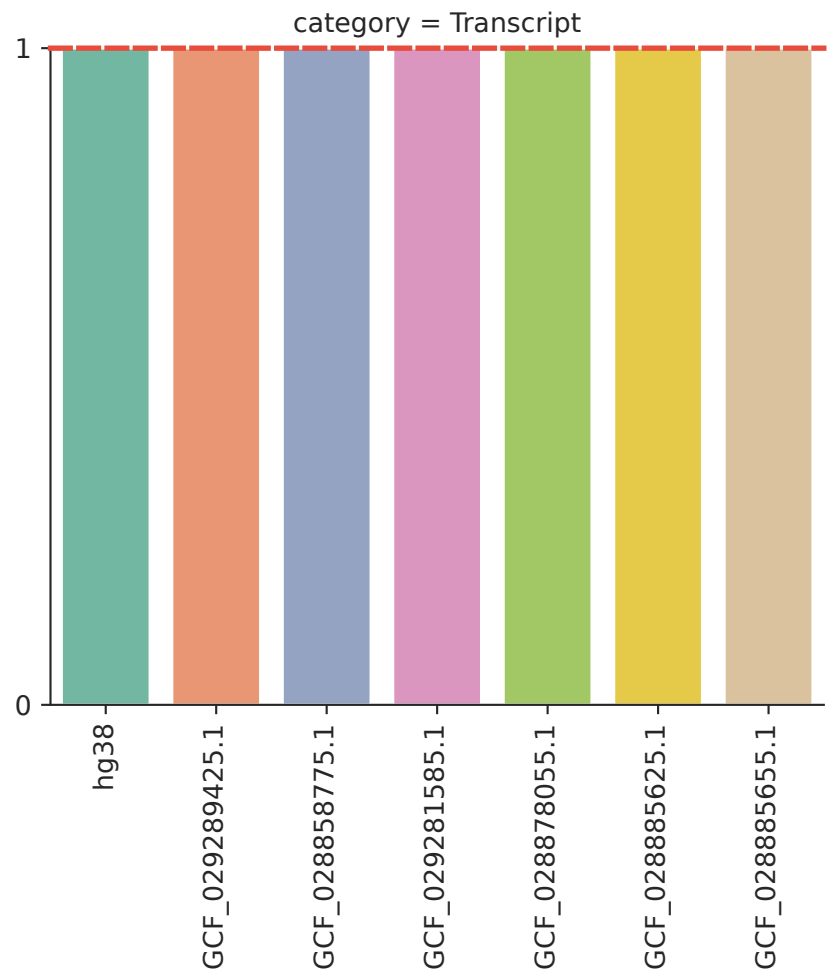

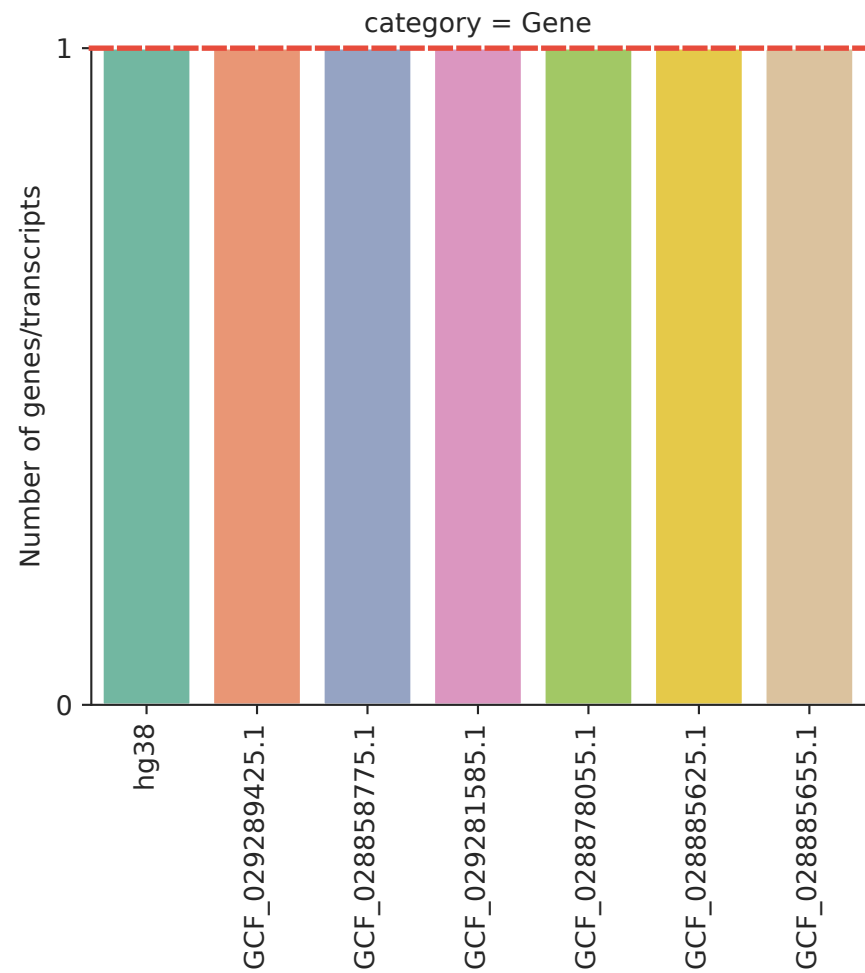

category = Transcript

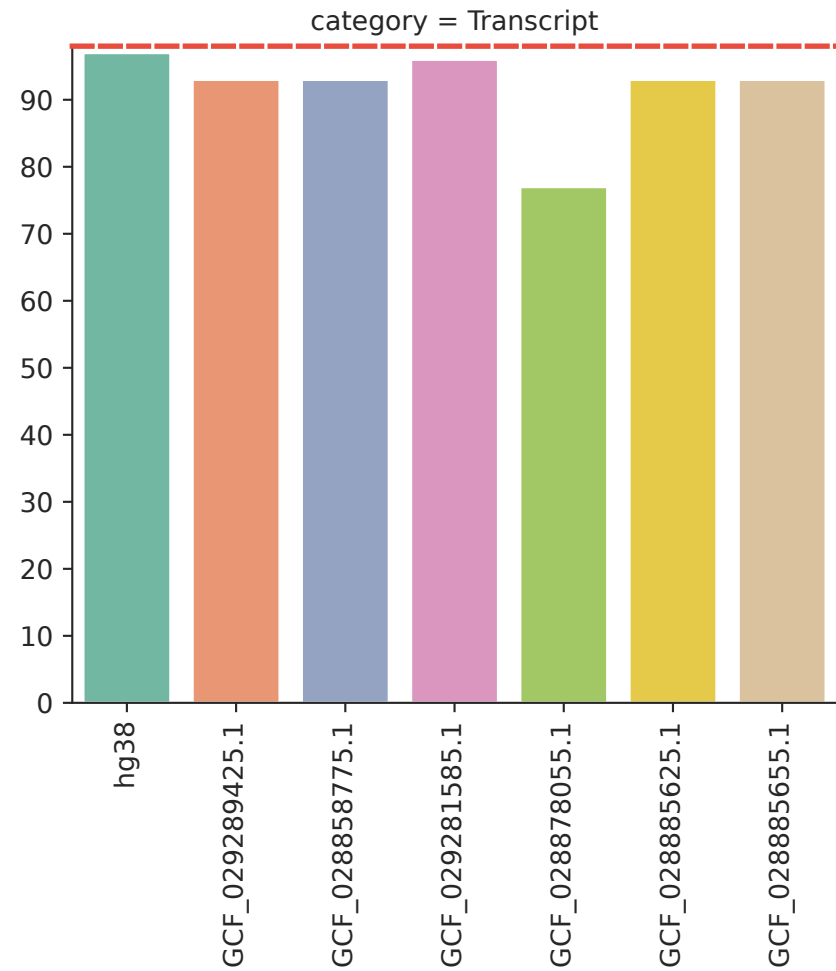

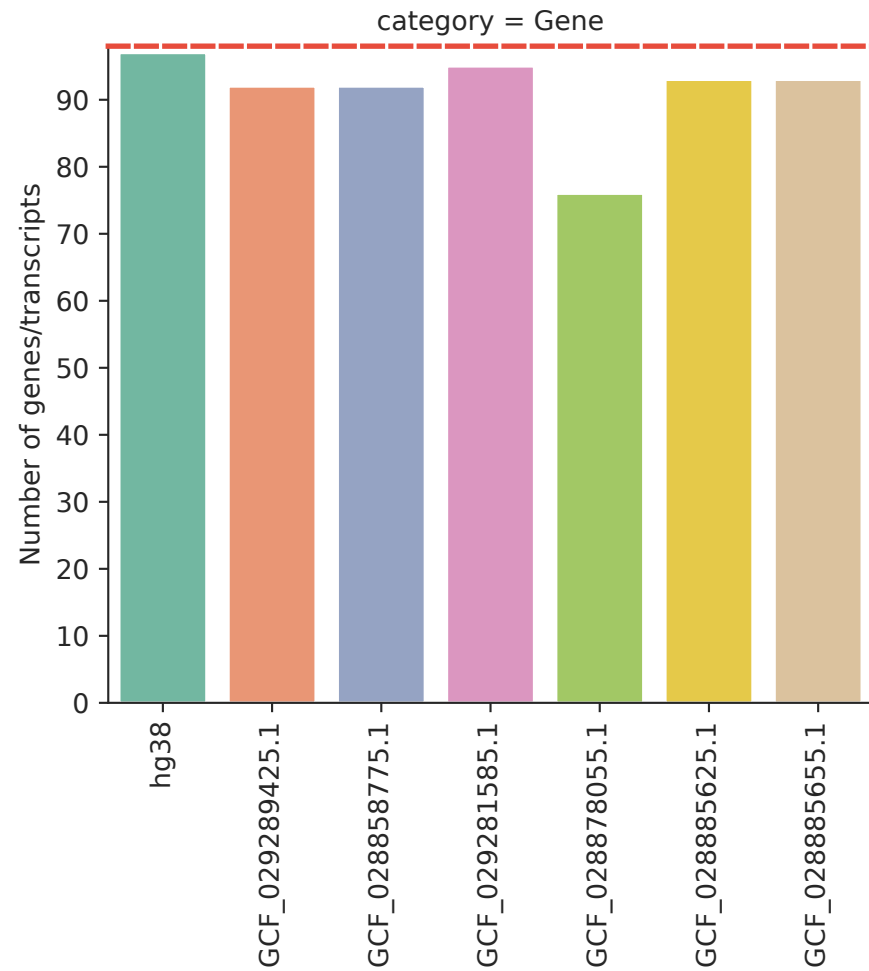

Number of comparative genes/transcripts present for biotype translated_pseudogene

Number of comparative genes/transcripts present for biotype translated_unprocessed_pseudogene

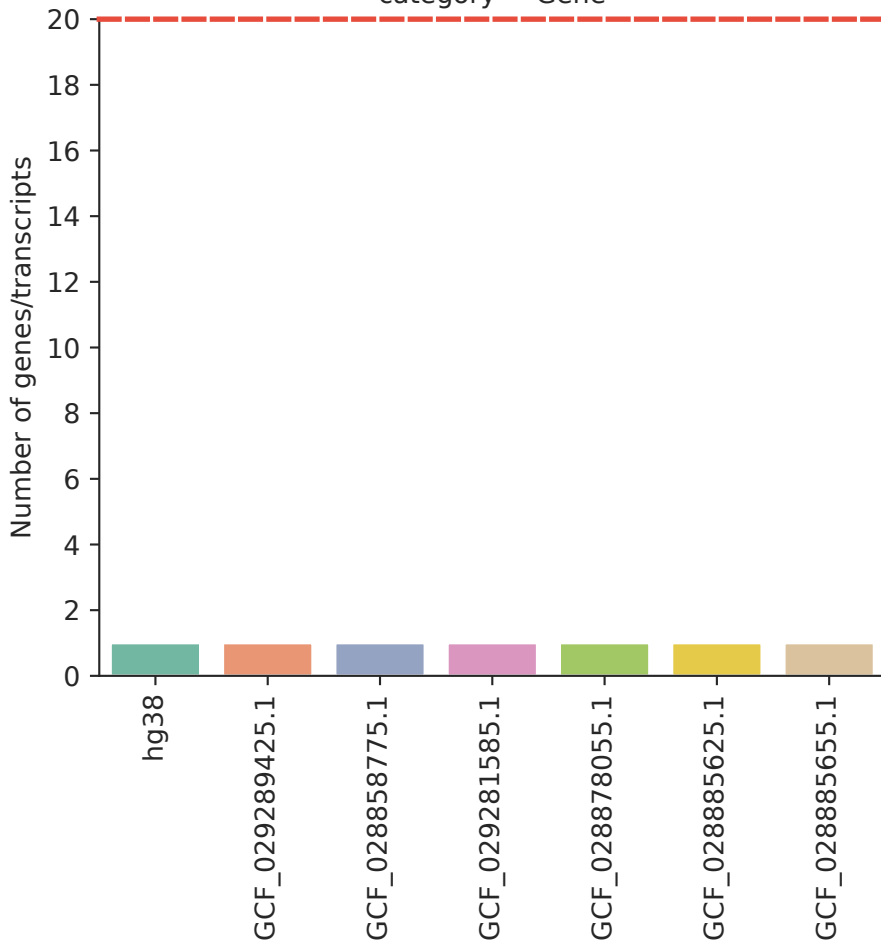

Number of comparative genes/transcripts present for biotype unitary_pseudogene

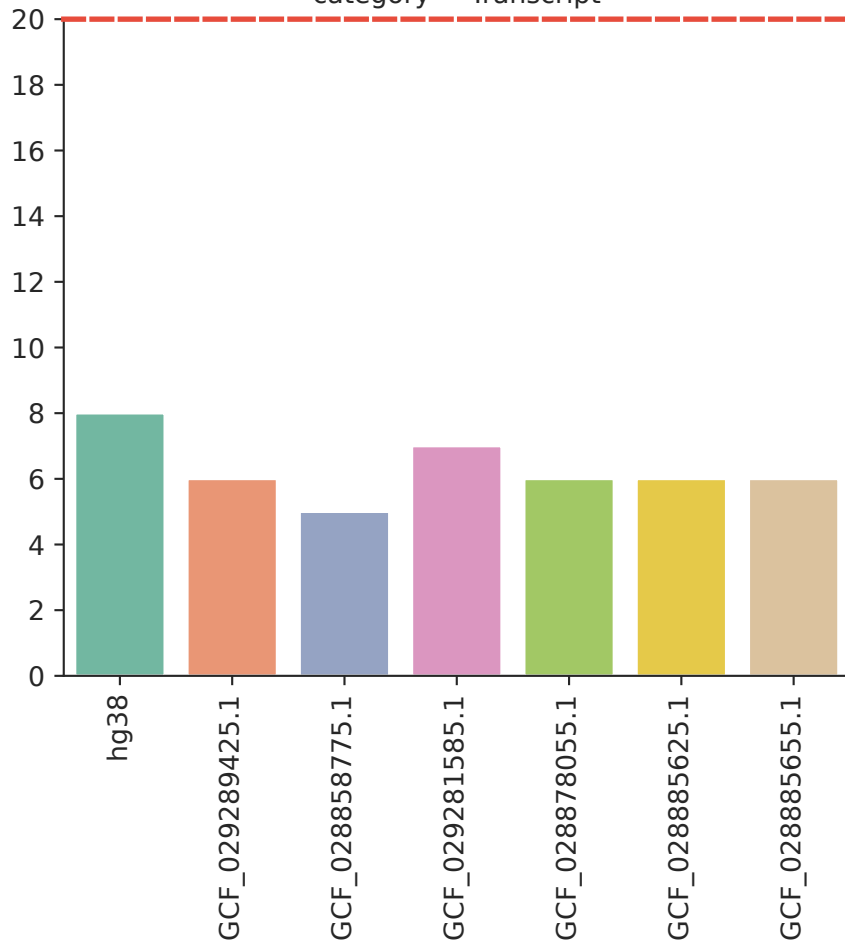

Number of comparative genes/transcripts present for biotype unknown_likely_coding

category = Gene

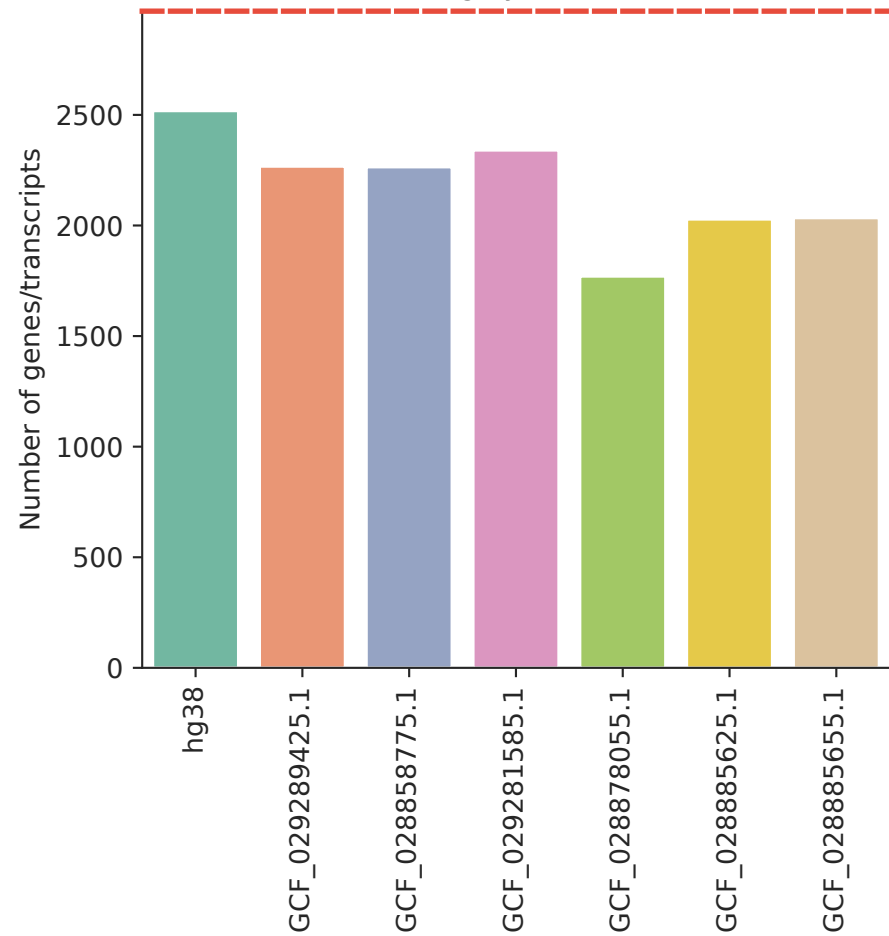

category = Transcript

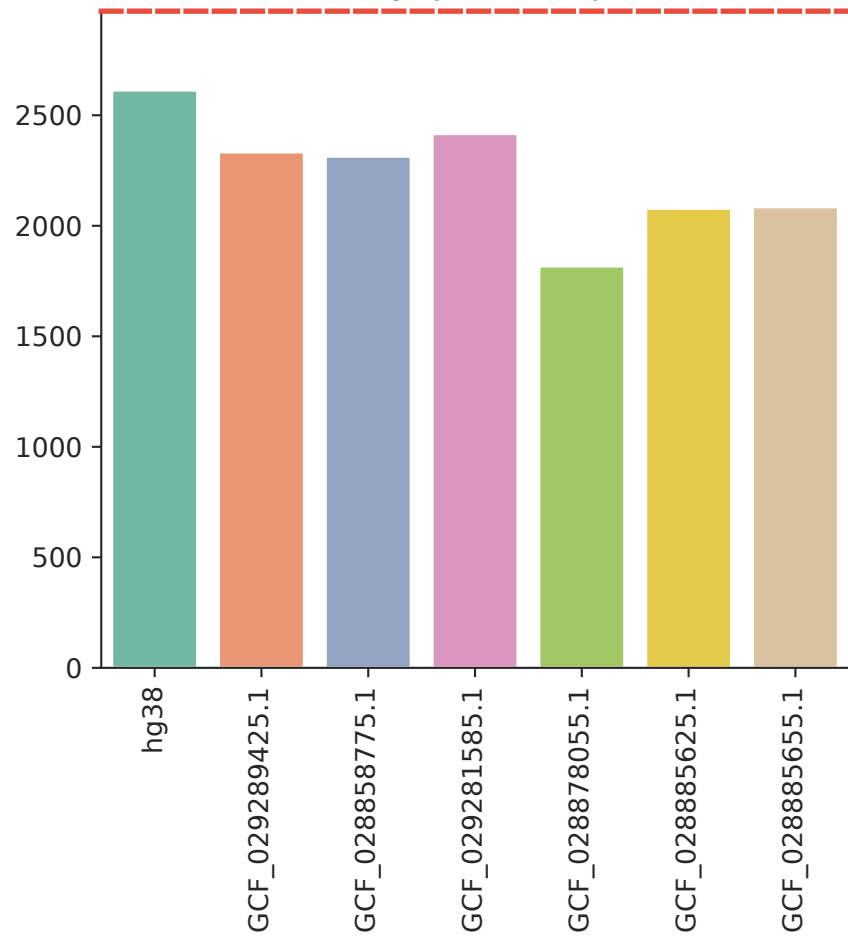

Number of comparative genes/transcripts present for biotype unprocessed_pseudogene

category = Gene

category = Transcript

Number of comparative genes/transcripts present for biotype vault_RNA
